

**TELECOM REGULATORY AUTHORITY OF INDIA
NEW DELHI**

Dated 5th February, 2010

NOTICE

Subject : Pre-consultation paper on “Telecom Towers and Related Issues”.

Telecom Regulatory Authority of India (TRAI) is contemplating to come up with a consultation paper on “Telecom Tower Requirements, Design, Structure, Right of Way (ROW) and Methods to ensure safe mobile radiation”.

In this regard a notice on 12th January 2010 was issued seeking views of stakeholders at pre-consultation stage. The comments received have been analyzed and following main topics have been identified for consultation process.

- Future projections of telecom tower requirements and identification of tower location.
- Tower design specification and camouflaging
- Tower sharing among service providers
- Ensuring safe radiation from mobile towers
- Encouraging alternate source of energy for telecom tower to reduce pollution
- Right of Way (ROW) for tower installation and laying of backhaul network
- Methods to reduce number of telecom towers while providing better coverage for wireless services.

All stakeholders are requested to send their views, comments at pre-consultation stage on email cn@traigov.in by 26th February 2010.

For any clarification the undersigned may kindly be contacted.
