

Subject: **YES TO THE TELECOMMUNICATION TARIFF (SIXTY FIFTH AMENDMENT) ORDER, 2020.**

Date: 02/21/20 04:17 PM

From: ANURAG ANAND <anurag.anand@gov.in>

To: Kaushal Kishore <advfea1@traf.gov.in>

On Indian Railways, messages are being done on very regular interval for:

1. Safety of passengers and road users at Level crossings gates to create awareness in public by safety directorate.
2. For monitoring the health of the Equipment, which are predictive in nature and avoid breakdowns. by technical departments.
3. Used for faster dissemination of information during Accidents and vital for Disaster management.
4. For issuing various advisories like Vigilance, saving of electricity, cleanliness drives etc.

All these activities are related to the safety of train operations and life of railway passengers and road users also. Since now, TRAI has come up with technology-driven solution to deal with UCC, it would be in right earnest to repeal the limit of 100 SMS per day and implement TELECOMMUNICATION TARIFF (SIXTY FIFTH AMENDMENT) ORDER, 2020.
