Annexure No.	Description	Page No.
Annexure -I	The Committee's recommendations to the Government of Sikkim, basis which a letter was written by Secretary, TRAI to DoT (DO Letter No M-5/9/(4)/2021-QoS dated 07.10.2022)	108
Annexure -II	List of 6136 Villages yet to be covered with any Mobile Technology by any TSP in NE States	131
Annexure -III	List of 119 Blocks with no OFC from any TSP or any PSU in NE States	366
Annexure -IV	List of 161 Blocks having OFC connectivity of only One TSP or one PSU - NE States	369
Annexure -V	District wise number of CSCs operational as on 31st Mar 2023 in NE States	373
	List of Acronyms	377

Chapter-1

INTRODUCTION

- 1.1. The Northeastern Region (NER) of India comprises of the States of Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, and Tripura. They form part of the East Himalayan region. These eight States cover an area of 2,62,189 sq. km, about 8% of the country's total geographical area. The region has a long international boundary of 5,182 Km, about 99% of its total geographical boundary. The boundary of this region has China and Bhutan in the north and north-west, Myanmar in the east, Nepal in the west and Bangladesh in the south and west. Many of the States in the region like Arunachal Pradesh, Meghalaya, Mizoram, and Nagaland have large tribal population. The region is characterized by an extremely tough terrain with relatively poor infrastructure like rail, roads, electricity, and telecom.
- 1.2. Only about 30 to 35% of the area of Northeast is plain land, mostly in three valleys namely the Brahmaputra, the Barak and the Imphal Valleys. The rest is hilly/mountainous region. It is thus evident that the terrain profile of eight North East States except Assam and Tripura are relatively more inhospitable and experience extremities during monsoon and winters. Further analysis of the implications of terrain profile of the Northeast States is indicative of the fact that, the population pockets in Arunachal Pradesh, Nagaland, hilly regions of Manipur and Mizoram and Sikkim are relatively sparse and scattered over the landscape.
- 1.3. Road, rail, electricity, and telecom services are all crucial for development of any region. They support region's overall social cohesion and economic prosperity. A national policy (National Digital Communication Policy-2018 or NDCP-2018) of the Government of India aims at provision of broadband for all and to provide universal broadband connectivity at 50 Mbps to every citizen by the year 2022. Telecom services, specifically the internet, have

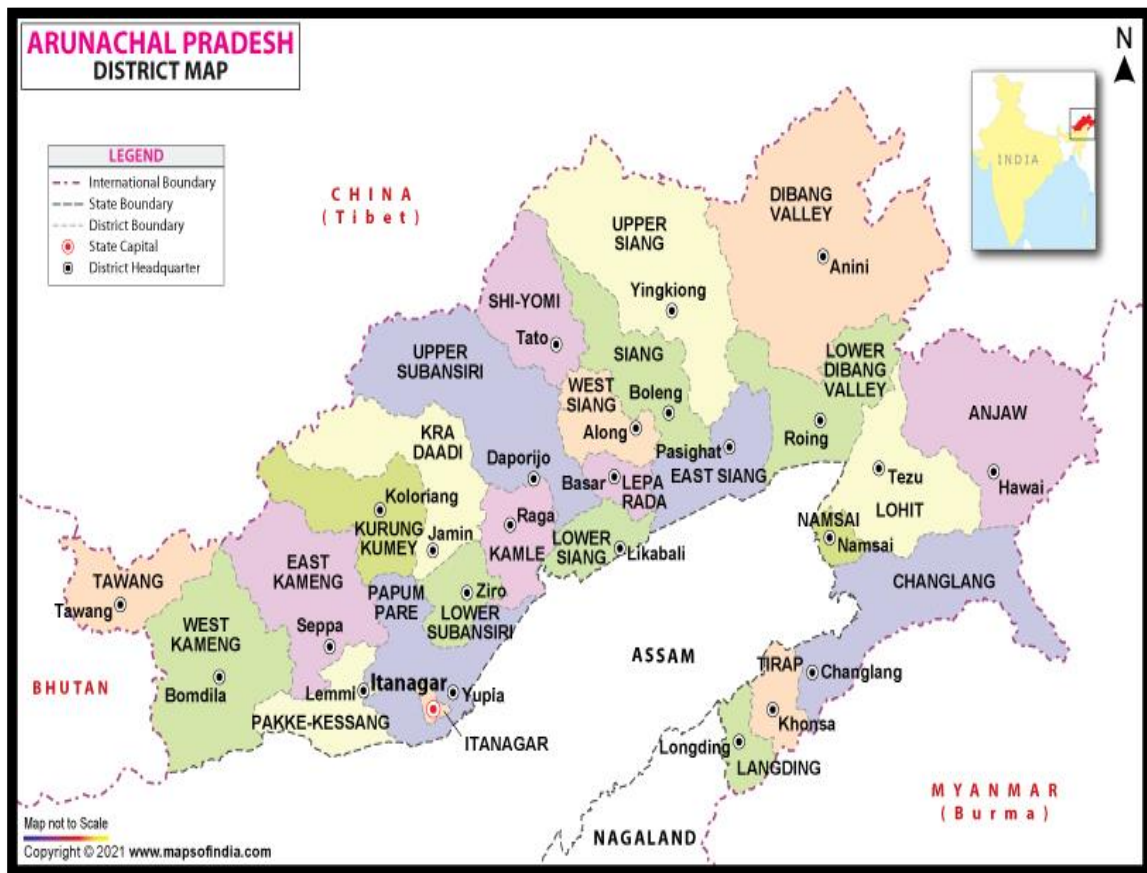

grown to be significant contributors of socio-economic development in the age of digital economy. Its significance was successfully established during the most recent global pandemic of COVID-19, wherein various socio-economic requirements were successfully met by telecom and internet riding on network of robust digital infrastructure in the country. According to TRAI reports, the average tele-density of India as of April 2023 stood at **84.46%** but tele-density in Assam state is **71.09%** and that of Northeast Licensed Service Area (LSA) [consisting of six states of Arunachal Pradesh, Nagaland, Manipur, Meghalaya, Mizoram, and Tripura] is **79.66%**. Though the gap in the tele-density figures between NE-States and the national average has reduced over the recent years but there exists non-uniform proliferation of telecom and internet infrastructure cum services in the states, with major Telecom Service Providers (TSPs) emphasizing on rollout and consolidation of digital infrastructure mostly in plain and valley area compared to its hilly regions. Despite having reasonable tele-density, there is considerable intra-state disparity/ non-uniformity in mobile connectivity in the NE states. This will be more evident from the analysis of the uncovered villages that has been undertaken in Chapter II.

Brief Information on Socio-Demographic Status and Overall Telecom Statistics of Northeastern States:

Arunachal Pradesh

- 1.4. Arunachal Pradesh is one of the six states under Northeast LSA of DoT, having its international boundary with Bhutan (160Km) in the West, with China (1080Km) in North and with Myanmar(440Km) in south-east and south.

Figure 1.1: Map of Arunachal Pradesh (Source: Maps of India)

1.5. Arunachal **Pradesh at a glance** (based on publicly available data, and census of 2011)

a. Geographical area of the state	: 83,743 Sq Km
b. Revenue Districts	: 25 [16 as per 2011 Census]
c. Gram Panchayats	: 2108
d. Villages (inhabited)	: 6123 (5484 as per 2011 census)

The district-wise village no. and population density of Arunachal Pradesh (based on publicly available data, and census of 2011) of the 25 revenue districts and the overall telecom scenario (as per TRAI data of **Quarter Ending December 2022**) of the State are tabulated in tables **Table 1.1A & Table 1.1B** respectively as below:

Table 1.1A: District-wise village no. and Population density Arunachal Pradesh

Sl. No.	District	No. of villages	Population	Area (in Sq Km)	Population Density
1	Anjaw	305	21167	6190	3
2	Changlang	362	148226	4662	32
3	Dibang Valley	142	8004	9129	1
4	East Kameng	382	78690	4134	19
5	East Siang	167	81882	3603	27
6	Itanagar Capital Complex	105	122930	200	615
7	Kra Daddy		22290		New Dist.
8	KurungKumey	368	45372	3838	12
9	Lepa Rada				New Dist.
10	Lohit	123	49776	3735	13
11	Longding		56953	1192	48
12	Lower Dibang Valley	314	54080	3900	14
13	Lower Siang				New Dist.
14	Lower Subansiri	536	83030	3460	24
15	Namsai		95950	1587	60
16	PakkeKessang				New Dist.
17	Papum Pare	485	176573	3462	51
18	Shi Yomi			2875	
19	Siang		24788		New Dist.
20	Tawang	218	49977	2172	23
21	Tirap	190	111975	2362	47
22	Upper Siang	99	35320	6188	5
23	Upper Subansiri	483	83448	7032	12
24	West Kameng	260	83947	7422	11
25	West Siang	168	112274	8325	13
Arunachal Pradesh		5484	13,83,727	83,743	17

From above Table 1.1A, it is inferred that the population density of all districts (except Itanagar Capital Complex) of Arunachal Pradesh is less than 100 and average population density is only 17, compared to national average of 382. The average village density is around 0.067 villages/sq. Km.). It is therefore obvious that major part of the state is un-inhabitable, and villages are scattered which is directly proportional to low Return of

Investments (ROI) on CAPEX invested for telecom infrastructure roll out by TSPs in the state.

Table 1.1B: Overall Telecom statistics of Arunachal Pradesh

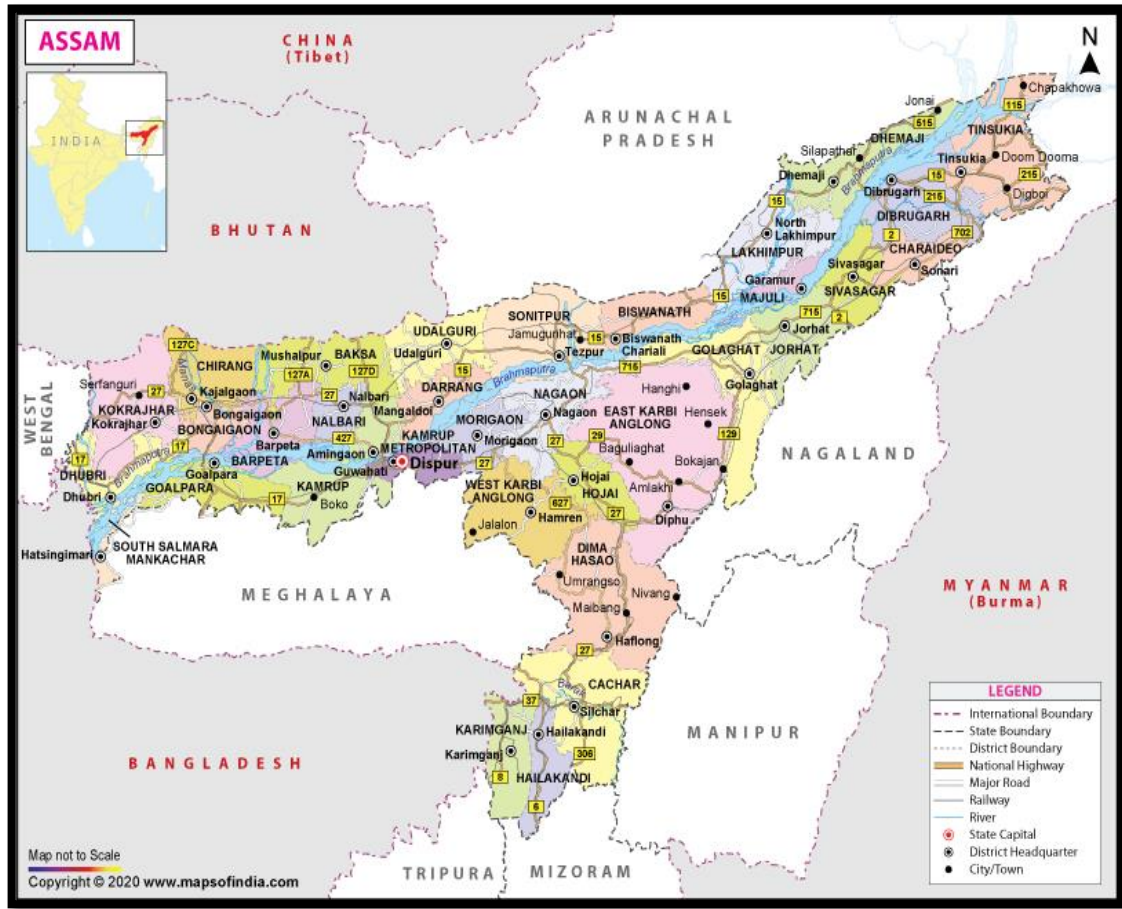

<u>Parameters</u>	Arunachal Pradesh			All India		
	Total	Rural	Urban	Total	Rural	Urban
Subscriber base (wireline + wireless) (In Mn)	1.32	0.78	0.54	1171.92	520.30	651.61
Tele-density (wireline + wireless) (In %)	84.92	67.70	135.19	84.86	58.01	134.62
Wireless Subscribers (In Mn)	1.3	0.78	0.52	1145.45	518.31	627.14
Wireless Tele-density (In %)	83.75	67.32	131.70	82.94	57.79	129.56
Wireline Subscribers (In Mn)	0.02	0.004	0.01	26.47	1.99	24.48
Wireline Tele-density (In %)	1.17	0.37	3.48	1.92	0.22	5.06

Note: Tele-density figures are based on the no. of subscribers and projected population of the current year

Assam

- 1.6. For the purposes of telecom services, Assam is under a separate Licensed Service Area (LSA). Assam share international border with Bhutan in the North and Bangladesh in the south and surrounded by other six NE states.
- 1.7. Assam **at a glance** (based on publicly available data, and census of 2011)
 - a. Geographical area of the state : 78,438 Sq Km
 - b. Revenue Districts : 31 (27 as per Census 2011)
 - c. Gram Panchayats : 2904 (2200 as per Census 2011)
 - d. Villages (inhabited) : 26429 (26389 as per Census 2011)

Figure 1.2: Map of Assam (Source: Maps of India)

The district-wise village no. and population density of Assam (based on publicly available data, and census of 2011) of the 31 revenue districts and the overall telecom scenario (as per TRAI data of **Quarter Ending December 2022**) of the State are tabulated in tables **Table 1.2A & Table 1.2B** as below:

Table 1.2A: District-wise village no. and Population density of Assam

Sl. No.	District	No. of villages	Population	Area (in Sq Km)	Population Density
1	Baksa	692	950075	2457	387
2	Barpeta	844	1693622	2282	742
3	Bongaigaon	568	738804	1093	676
4	Cachar	1061	1736617	3786	459
5	Charaideo	327	471418	1069	441
6	Chirang	510	482162	1923	251

7	Darrang	564	928500	1585	586
8	Dhemaji	1323	686133	3237	212
9	Dhubri	1100	1394144	2176	641
10	Dibrugarh	1359	1326335	3381	392
11	Dima Hasao	699	214102	4888	44
12	Goalpara	840	1008183	1824	553
13	Golaghat	1132	1066888	3502	305
14	Hailakandi	334	659296	1327	497
15	Jorhat	871	924952	1758	526
16	Kamrup	1084	1517542	3105	489
17	Kamrup Metropolitan	229	1253938	955	1313
18	Karbi Anglong	2073	655993	7399	89
19	Karimganj	943	1228686	1809	679
20	Kokrajhar	1072	887142	3296	269
21	Lakhimpur	1188	1042137	2277	458
22	Majuli	243	167304	875	191
23	Morigaon	638	957423	1551	617
24	Nagaon	1431	2823768	3973	711
25	Nalbari	467	771639	1052	733
26	Sivasagar	516	692435	1599	433
27	Sonitpur	1889	1924110	5204	370
28	South Salmara-Mankachar	152	388673	568	684
29	Tinsukia	1186	1327929	3790	350
30	Udalguri	803	831668	2012	413
31	West Karbi Anglong	855	300320	3035	99
Assam		26389	31,205,576	78,438	398

From the above Table 1.2A, it is evident that the population density of different districts of Assam is widely varying ranging from less than 100 in Districts like Dima Hasao, East & West Karbi Anglong, to around 900 in Dhubri District. It is to be noted that DoT took initiative to extend mobile coverage in these sparsely populated districts of Dima-Hasso and Karbi-Anglong during 2014-17, and BSNL was given the job of installing mobile towers but due to various reasons the project could not be completed. However, at present RJIL is installing 4G mobile towers under a USO funded project in these two districts.

Table 1.2B: Overall Telecom Statistics of Assam

<u>Parameters</u>	Assam			All India		
	Total	Rural	Urban	Total	Rural	Urban
Subscriber base (wireline + wireless) (In Mn)	24.69	15.45	9.24	1171.92	520.30	651.61
Tele-density (wireline + wireless) (In %)	69.41	51.41	167.44	84.86	58.01	134.62
Wireless Subscribers (In Mn)	24.44	15.43	9.01	1145.45	518.31	627.14
Wireless Tele-density (In %)	68.70	51.34	163.26	82.94	57.79	129.56
Wireline Subscribers (In Mn)	0.25	0.02	0.23	26.47	1.99	24.48
Wireline Tele-density (In %)	0.71	0.07	4.18	1.92	0.22	5.06

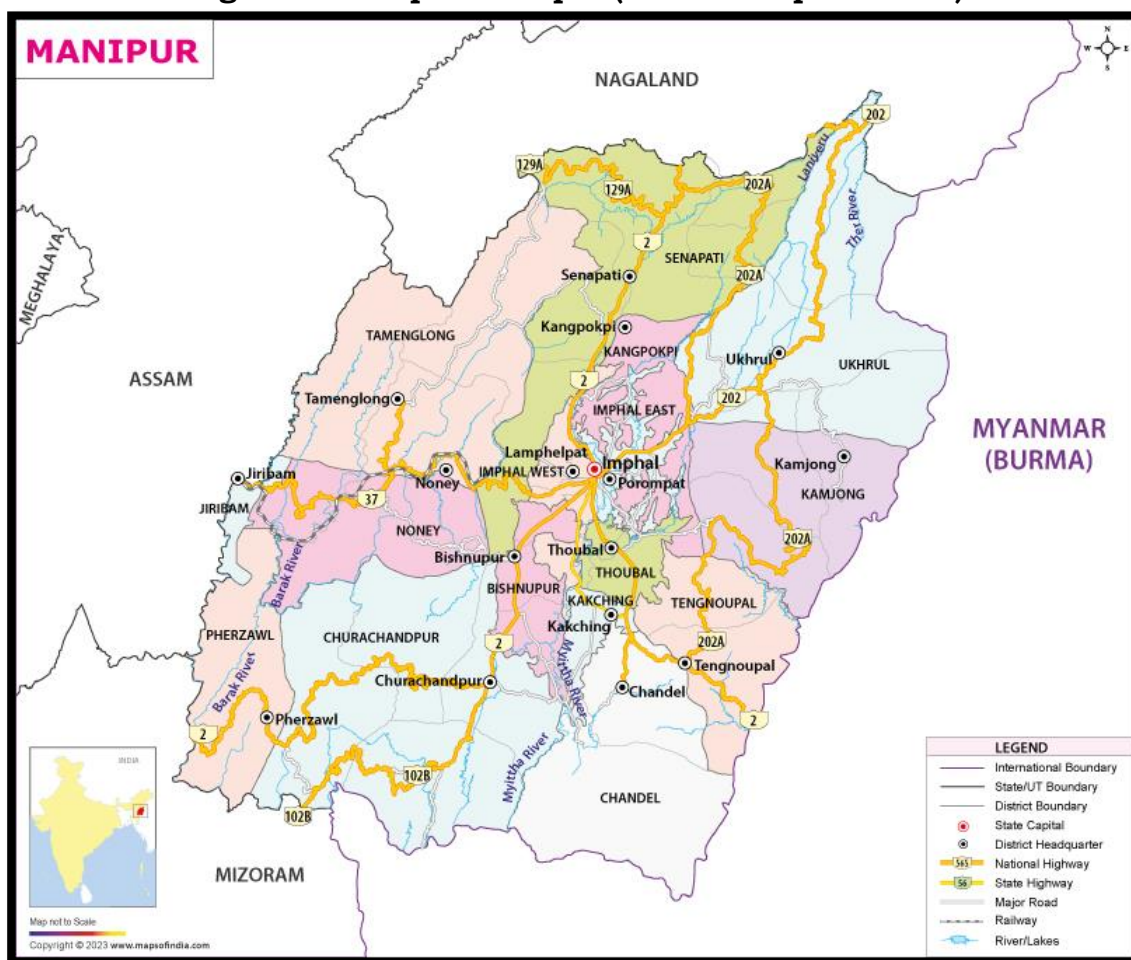

Note: Tele-density figures are based on the no. of subscribers and projected population of the current year

From above Table 1.2B, it is observed that rural tele-density in Assam is less than that of national average, but in contrast, the urban tele-density of Assam is far above national average. One of the possible reasons could be the that people living in urban areas (only 14 % of the population) might be having SIMs of multiple TSPs to get seamless service when they visit rural areas, as no single TSP has coverage in major part of rural areas (86 % of population), rather they have coverage in pockets.

Manipur

- 1.8. Manipur is also one of the six states under NE LSA having its international boundary with Myanmar(440Km) in the eastern side. A major part of the state is hilly area, and the valley area is very less.

Figure 1.3: Map of Manipur (Source: Maps of India)

1.9. Manipur **at a glance** (based on publicly available data, and census 2011; Few districts have no GP structure) :

a. Geographical area of the state	: 22,327 Sq Km
b. Revenue Districts	: 16 (9 as per census 2011)
c. Gram Panchayats	: 325 (161 as per Census 2011)
d. Villages (inhabited)	: 4091 (2582 as per Census 2011)

The population density of Manipur (based on publicly available data, and census of 2011) of the 16 revenue districts and the overall telecom scenario (as per TRAI data of **Quarter Ending December 2022**) of the State are tabulated in tables Table **1.3A** & Table **1.3B** as below:

Table 1.3A: District-wise village no. and Population density of Manipur

Sl. No.	District	No. of Villages	Population	Area (in Sq Km)	Population Density
1	Bishnupur	64	237399	496	479
2	Chandel	264	85072	2100	40
3	Churachandpur	596	274143	4750	60
4	Imphal East	195	456113	709	643
5	Imphal West	178	517992	519	998
6	Senapati	686	479148	3271	146
7	Tamenglong	129	156784	4391	32
8	Thoubal	103	287687	324	888
9	Ukhrul	213	183998	4544	40
10	Kangpokpi	534	193744	1698	114
11	Tengnoupal	263	59110	1142	52
12	Pherzawl	99	40390	2285	18
13	Noney				New Dist.
14	Kamjong	123	45616	2000	23
15	Jiribam	58	43838	232	189
16	Kakching	46	135481	192	706
Manipur		2582	28,55,794	22,327	128

The population density among the districts of Manipur is widely varying and in 7 out of 16 districts it is less than 50. It indicates that a major part of these districts are sparsely populated , and villages are scattered (av. village density 1.2 villages/10 sq. Km.).

Table 1.3B: Overall Telecom Statistics of Manipur

<u>Parameters</u>	Manipur			All India		
	Total	Rural	Urban	Total	Rural	Urban
Subscriber base (wireline + wireless) (In Mn)	2.38	1.03	1.35	1171.92	520.30	651.61
Tele-density (wireline + wireless) (In %)	74.14	47.56	129.82	84.86	58.01	134.62
Wireless Subscribers (In Mn)	2.34	1.03	1.31	1145.45	518.31	627.14
Wireless Tele-density (In %)	72.83	47.43	126.06	82.94	57.79	129.56
Wireline Subscribers (In Mn)	0.04	0.003	0.04	26.47	1.99	24.48
Wireline Tele-density (In %)	1.31	0.14	3.76	1.92	0.22	5.06

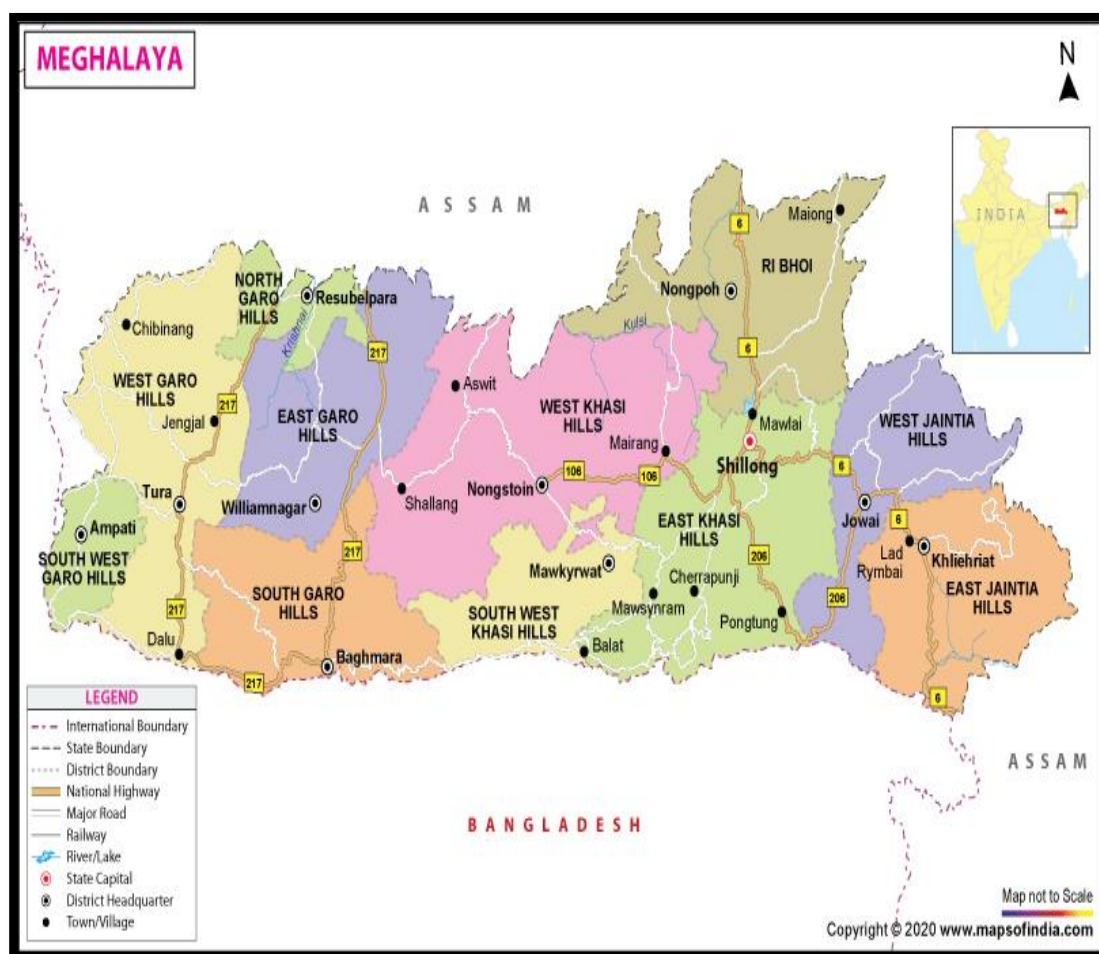

Note: Tele-density figures are based on the no. of subscribers and projected population of the current year

From above **Table 1.3B**, it is observed that rural wireless tele-density in Manipur (having 71% population) is less than that of all India average even though the urban tele-density is comparable to that of all India average. This reflects inadequate mobile coverage in rural areas in this state.

Meghalaya

- 1.10. Meghalaya is also one of the six states under NE LSA having its international boundary with Bangladesh in the South and West side. A major part of the state is the hilly areas of Khasi and Garo hill ranges.

Figure 1.4: Map of Meghalaya (Source: Maps of India)

1.11. Meghalaya **at a glance** (based on publicly available data, and census of 2011)

- a. Geographical area of the state : 22,429 Sq Km
- b. Revenue Districts : 12 (7as per Census 2011)
- c. Gram Panchayats (GP) : No GP structure
- d. Villages (inhabited) : 7155 (6839 as per Census of 2011)

The population density of Meghalaya (based on publicly available data, and census of 2011) of the 12 revenue districts and the overall telecom scenario (as per TRAI data of **Quarter Ending December 2022**) of the State are tabulated in tables **Table 1.4A & Table 1.4B** as below:

Table 1.4A: District-wise village no. and Population density of Meghalaya

Sl. No.	District	No. of villages	Population	Area (in Sq Km)	Population Density
1	East Garo Hills	492	145798	1517	96
2	East Khasi Hills	1024	824059	2748	301
3	East Jaintia Hills	206	122436	2040	10360
4	RiBhoi	579	258840	2448	106
5	South Garo Hills	804	142334	1887	75
6	West Garo Hills	1209	578390	3416	169
7	West Khasi Hills	1117	383461	5247	73
8	Southwest Khasi Hills	216	110152	1341	82
9	West Jaintia Hills	293	270352	1693	160
10	North Garo Hills	579	152524	1086	140
11	Southwest Garo Hills		170794	822	208
12	Eastern West Khasi Hills				New Dist.
Meghalaya		6839	29,64,007	22,429	132

From above Table 1.4A, it appears that the population density does not vary as widely as is the case in few other states of NE, however, it is quite less in 3 districts as a considerable part of these districts is uninhabitable.

Also, the tele-density figures of the state compared to overall tele-density figures of the country is an issue of concern.

Table 1.4B: Overall Telecom statistics of Meghalaya

<u>Parameters</u>	Meghalaya			All India		
	Total	Rural	Urban	Total	Rural	Urban
Subscriber base (wireline + wireless) (In Mn)	2.51	1.48	1.03	1171.92	520.30	651.61
Tele-density (wireline + wireless) (In %)	75.10	55.84	149.21	84.86	58.01	134.62
Wireless Subscribers (In Mn)	2.46	1.48	0.99	1145.45	518.31	627.14
Wireless Tele-density (In %)	73.81	55.76	143.24	82.94	57.79	129.56
Wireline Subscribers (In Mn)	0.04	0.002	0.04	26.47	1.99	24.48
Wireline Tele-density (In %)	1.29	0.08	5.97	1.92	0.22	5.06

Note: Tele-density figures are based on the no. of subscribers and projected population of the current year

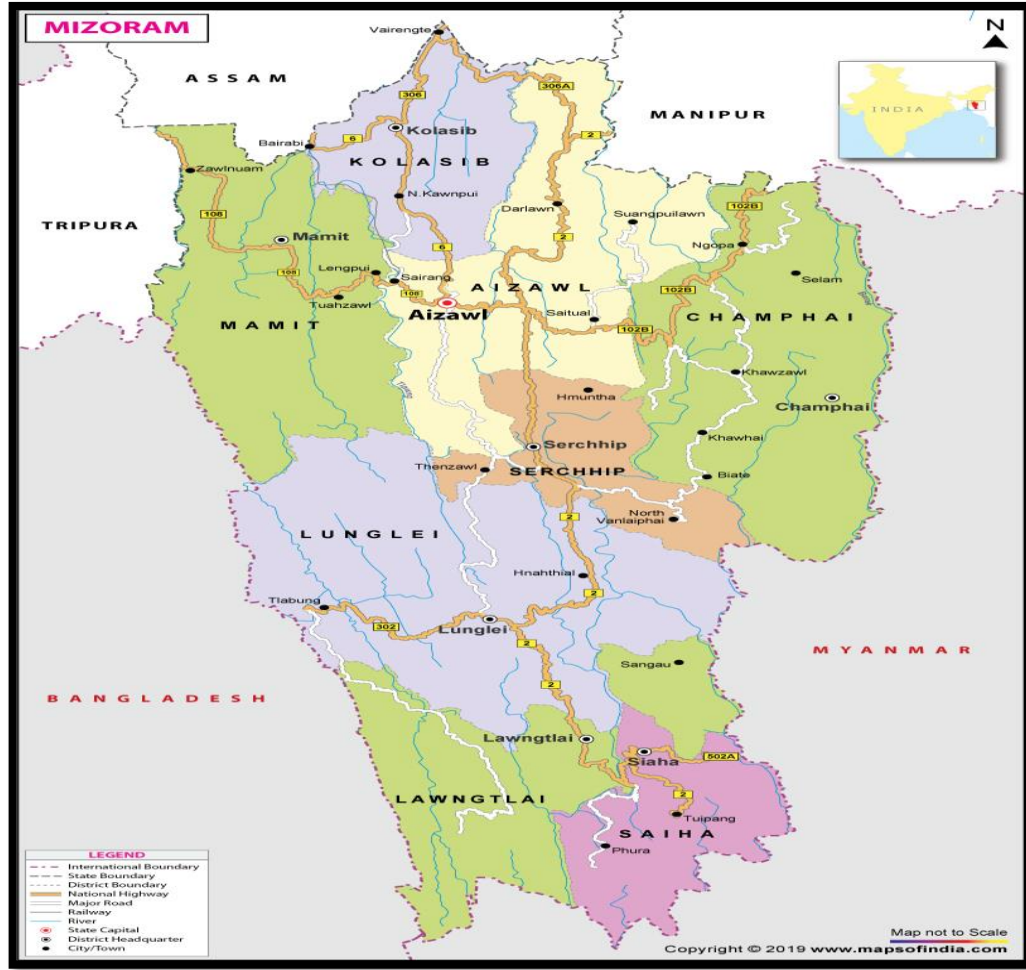

Mizoram

1.12. Mizoram is also one of the six states under NE LSA having its international boundary with Myanmar in the South and East side and Bangladesh in West Side. A major part of the state is the hilly area of Lusai hill ranges.

1.13. Meghalaya **at a glance** (based on publicly available data, and census of 2011)

- a. Geographical area of the state : 22,429 Sq Km
- b. Revenue Districts : 12 (7as per Census 2011)
- c. Gram Panchayats (GP) : No GP structure
- d. Villages (inhabited) : 7155 (6839as per Census of 2011)

Figure 1.5: Map of Mizoram (Source: Maps of India)

1.14. The population density of Mizoram (based on publicly available data, and census of 2011) of the 11 revenue districts and the overall telecom scenario (as per TRAI data of **Quarter Ending December 2022**) of the State are tabulated in tables **Table 1.5A & Table 1.5B** as below:

Table 1.5A: District-wise village no. and Population density of Mizoram

Sl. No.	District	No. of Villages	Population	Area (in Sq Km)	Population Density
1	Aizawl	107	404054	3576	112
2	Champhai	60	127660	3185	40
3	Kolasib	39	83054	1472	61
4	Lawngtlai	169	117894	2557	46
5	Lunglei	198	161428	4536	36

6	Mamit	86	86364	3025	29
7	Saiha	92	56574	1399	40
8	Serchhip	49	64937	1421	46
9	Hnahthial	26	28468	1030	28
10	Saitual	37	50575		New Dist.
11	Khawzawl	28	36381		New Dist.
Mizoram		864	10,91,014	21,087	52

From above Table 1.5A, like Arunachal Pradesh, population density in all but one district (i.e., the district of state capital) of Mizoram is less than 100 and village density is only 0.4 villages/10 sq. Km. It indicates that major part of Mizoram is sparsely populated , and villages are scattered.

Table 1.5B: Overall Telecom Statistics of Mizoram

<u>Parameters</u>	Mizoram			All India		
	Total	Rural	Urban	Total	Rural	Urban
Subscriber base (wireline + wireless) (In Mn)	1.39	0.62	0.77	1171.92	520.30	651.61
Tele-density (wireline + wireless) (In %)	113.65	110.90	115.90	84.86	58.01	134.62
Wireless Subs. (In Mn)	1.37	0.62	0.76	1145.4	518.31	627.14
Wireless Tele-density (In %)	111.18	110.7	111.5	82.94	57.79	129.56
Wireline Subscriber (In Mn)	0.03	0.001	0.03	26.47	1.99	24.48
Wireline Tele-density (In %)	2.47	0.11	4.40	1.92	0.22	5.06

Note: Tele-density figures are based on the no. of subscribers and projected population of the current year

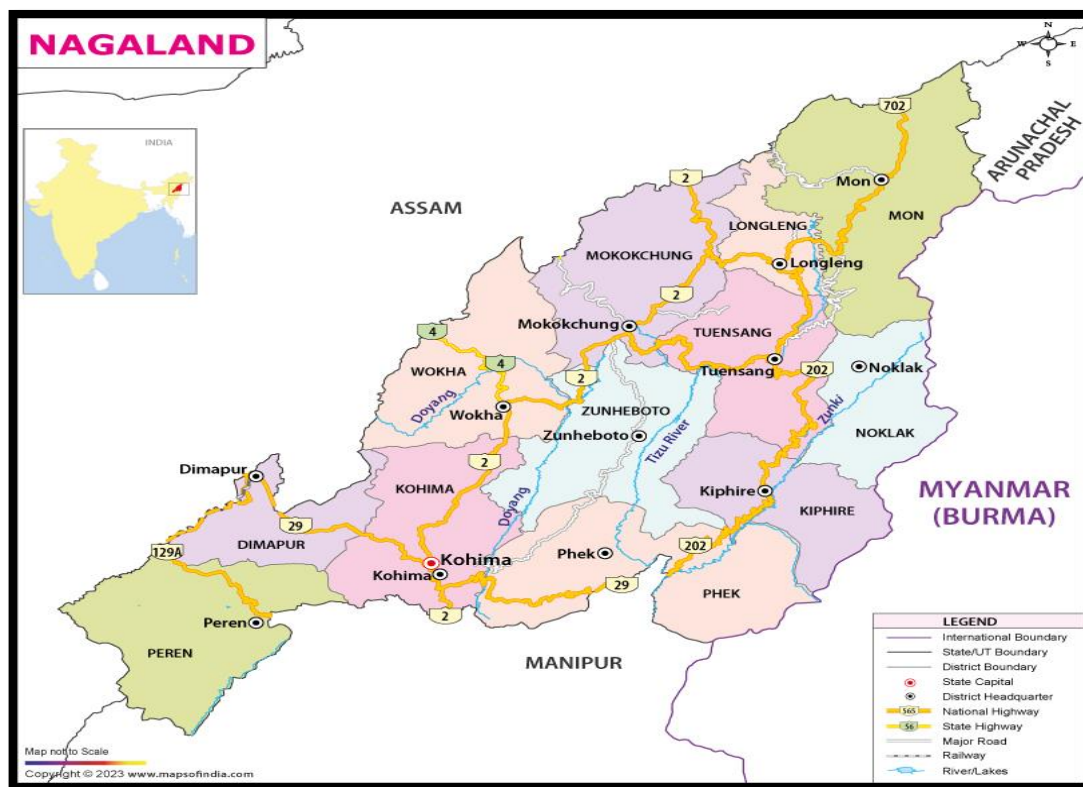

From above **Table 1.5B**, it is observed that rural wireless tele-density in Mizoram is much higher (i.e. 110.79) than that of all India average and even more than 100. This could be due to the facts that:

- Small population of 48% of the total population are living in rural area in Mizoram compared to 70% national average.
- People are likely using SIMs of 2-3 TSPs as none has adequate coverage throughout the state.

Nagaland

1.15. Nagaland is also one of the six states under NE LSA having its international boundary with Myanmar in the East. A major part of the state is the hilly area of Naga and Patkai hill ranges.

Figure 1.6: Map of Nagaland (Source: Maps of India)

1.16. Nagaland **at a glance** (based on publicly available data, and census of 2011)

a.	Geographical area of the state	: 16,579 Sq Km
b.	Revenue Districts	: 16 (11 as per Census 2011)
c.	Gram Panchayats (GP)	: No GP structure
d.	Villages (inhabited)	: 1641

The population density of Nagaland (based on publicly available data, and census of 2011) of the 16 revenue districts and the overall telecom scenario (as per TRAI data of **Quarter Ending December 2022**) of the State are tabulated in tables **Table 1.6A & Table 1.6B** as below:

Table 1.6A: District-wise village no. and Population density of Nagaland

Sl. No.	District	No. of villages	Population	Area (in Sq Km)	Population Density
1	Dimapur	220	378811	927	409
2	Kiphire	104	74004	1255	65
3	Kohima	96	267988	1463	183
4	Longleng	63	50593	885	57
5	Mokokchung	114	220052	1615	136
6	Mon	131	250671	1786	140
7	Peren	110	95219	1799	53
8	Phek	98	163418	2026	81
9	Tuensang	131	196801	2135	92
10	Wokha	154	166343	1628	102
11	Zunheboto	193	140757	1255	112
12	Chümoukedima*	81	166911	610	274
13	Niuland		11876		New Dist.
14	Noklak	42	55434	1152	48
15	Shamator				New Dist.
16	Tseminyu				New Dist.
Nagaland		1641	19,78,502	16,579	119

From above **Table 1.6A**, it is inferred that population density in 6 out of 16 districts of Nagaland is less than 100. It indicates that a substantial part of Nagaland is sparsely populated , and villages are scattered (0.1 villages/ sq. Km.).

Table 1.6B: Overall Telecom statistics of Nagaland

Parameters	Nagaland			All India		
	Total	Rural	Urban	Total	Rural	Urban
Subscriber base (wireline + wireless) (In Mn)	1.60	0.91	0.69	1171.92	520.30	651.61
Tele-density (wireline + wireless) (In %)	71.72	74.33	68.55	84.86	58.01	134.62
Wireless Subs. (In Mn)	1.58	0.91	0.67	1145.45	518.31	627.14
Wireless Tele-density (In %)	70.80	74.29	66.57	82.94	57.79	129.56
Wireline Subs. (In Mn)	0.020	0.001	0.02	26.47	1.99	24.48
Wireline Tele-density (In %)	0.92	0.04	1.98	1.92	0.22	5.06

Note: Tele-density figures are based on the no. of subscribers and projected population of the current year

From above **Table 1.6B**, it is observed that rural wireless tele-density in Nagaland (i.e. 74.29%) is much higher than that of all India average of 57.79%. In contrast, urban tele-density is much lower than that of National average. This could likely be due to the facts that :

- a. A relatively small population (30% of the total) are rural population.
- b. People are likely using SIMs of 2-3 TSPs as none has adequate coverage throughout the state.

Sikkim

- 1.17. Sikkim is a state in the Northeast Region of India having its international boundary with Nepal in the west, China in the North and East and Bhutan in the East. A major part of the state is the hilly area of Eastern Sub-Himalaya hill ranges. It is a part of West Bengal Telecom Licensed Service Area (LSA).

Figure 1.7: Map of Sikkim (Source: Maps of India)

1.18. Sikkim **at a glance** (based on publicly available data, and census of 2011)

- a. Geographical area of the state : 7,096 Sq Km
- b. Revenue Districts : 6 (4 as per Census 2011)
- c. Gram Panchayats : 181
- d. Villages (inhabited) : 482

The population density of Sikkim (based on publicly available data, and census of 2011) of the 6 revenue districts and the overall telecom scenario (as per TRAI data of **Quarter Ending December 2022**) of the State are tabulated in tables **Table 1.7A & Table 1.7B** as below:

Table 1.7A: District-wise village no. and Population density of Sikkim

Sl. No.	District	No. of Villages	Population	Area (in Sq Km)	Population Density
1	Gangtok	288	283583	954	297
2	Gyalshing/ Geysing	125	136435	1166	117
3	Mangan	120	43709	4226	10
4	Namchi	150	146850	750	196
5	Pakyong		74583		New Dist.
6	Soreng	127	64760	293	221
Sikkim		482	6,10,000	7,096	86

Table 1.7B: Overall Telecom statistics of Sikkim

Parameters	Sikkim			All India		
	Total	Rural	Urban	Total	Rural	Urban
Subs. base (wireline + wireless) (In Mn)	0.96	0.57	0.39	1171.92	520.30	651.61
Tele-density (wireline + wireless) (In %)	138.74	159.91	115.98	84.86	58.01	134.62
Wireless Subs. (In Mn)	0.95	0.57	0.38	1145.45	518.31	627.14
Wireless Tele-density (In %)	137.874	159.85	114.25	82.94	57.79	129.56
Wireline Subs. (In Mn)	0.0060	0.0002	0.01	26.47	1.99	24.48
Wireline Tele-density (In %)	0.87	0.06	1.73	1.92	0.22	5.06

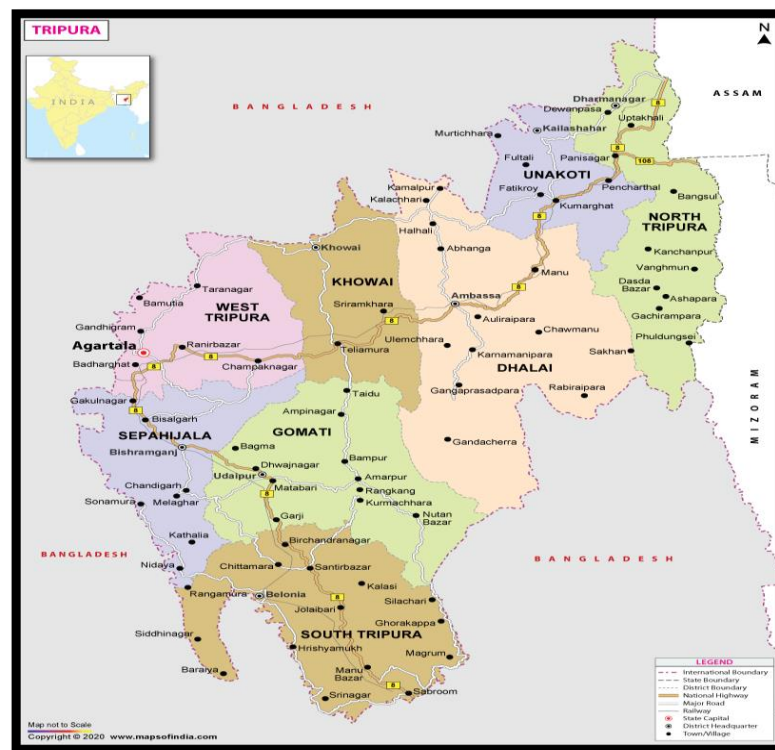

Note: Tele-density figures are based on the no. of subscribers and projected population of the current year

From above **Table 1.7B**, it is observed that rural wireless tele-density in Sikkim is much higher than that of all India average. This could be since mobile service, especially 2G, is available in most of the villages through scattered signals from multiple TSPs; and people are likely using SIMs of 2-3 TSPs as none has adequate coverage. Another possibility is the presence of large numbers of floating populations like defense personnel and tourists, who purchase mobile connections in the state but don't get reflected in the local population count. As per the information furnished by DoT (Sikkim) to TRAI, currently only 6 villages do not have mobile coverage of any technology from any TSP. Also, as per DoT (Sikkim), a large number of villages in Sikkim have 2G but inadequate 4G coverage.

Tripura

- 1.19. Tripura is also one of the six states under NE LSA having its international boundary with Bangladesh in the North, South and West directions. The state is having plain area in and around the capital city Agartala as well as a vast hilly area of Eastern Sub-Himalaya hill ranges.

Figure 1.8: Map of Tripura (Source: Maps of India)

1.20. Tripura **at a glance** (based on publicly available data, and census of 2011,
Districts have both GP and Village Committee structure)

- a. Geographical area of the state : 10,486 Sq Km
- b. Revenue Districts : 8 (4 as per Census 2011)
- c. Gram Panchayats : 625
- d. Villages (inhabited) : 875

The population density of Tripura (based on publicly available data, and census of 2011) of the 8 revenue districts and the overall telecom scenario (as per TRAI data of **Quarter Ending December 2022**) of the State are tabulated in tables **Table 1.8A & Table 1.8B** as below:

Table 1.8A: District-wise village no. and Population density of Tripura

Sl. No.	District	No. of Villages	Population	Area (in Sq Km)	Population Density
1	Dhalai	151	378230	2312	157
2	North Tripura		444579	1422	312
3	South Tripura		453079	1514	299
4	West Tripura	172	918000	984	933
5	Unakoti	91	298194	687	434
6	Gomati	173	441538	1523	290
7	Sepahijala	169	542731	1043	520
8	Khowai	69	327564	1377	238
Tripura		904	36.74 Lakh	10,486	350

Table 1.8B: Overall Telecom statistics of Tripura

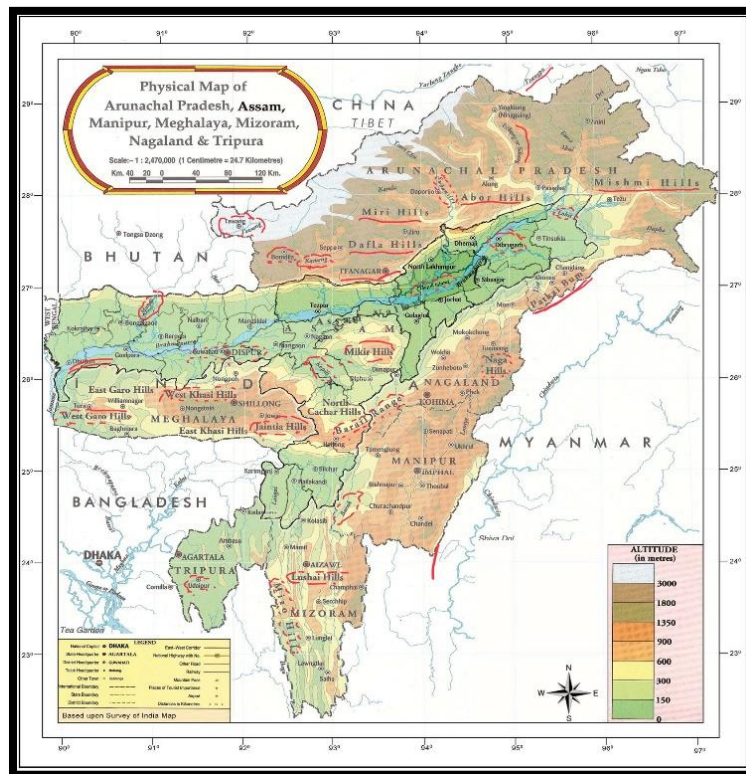

<u>Parameters</u>	Tripura			All India		
	Total	Rural	Urban	Total	Rural	Urban
Subscriber base (wireline + wireless) (In Mn)	3.12	1.49	1.63	1171.92	520.30	651.61
Tele-density (wireline + wireless) (In %)	75.43	58.74	101.82	84.86	58.01	134.62
Wireless Subscribers (In Mn)	3.08	1.48	1.60	1145.45	518.31	627.14

Note: Tele-density figures are based on the no. of subscribers and projected population of the current year

Terrain diversity in NE states and its impact on Telecom penetration

1.21. Terrain in NE states varies widely. As evident from the terrain profile and altitude depicted in the physical map of Northeastern states shown below in figure 1.9, major parts of Assam, Agartala City & adjoining area, Dimapur City & adjoining area, Imphal City & adjoining area are plains like most other parts of India. In contrast Arunachal Pradesh, Mizoram and Sikkim have mountainous terrain with sparsely populated and scattered villages. Geographical terrain diversity in NE states imposes serious challenges in infrastructure development activities, and as a result wide disparity is observed in the availability and use of Telecom Services.

Figure 1.9 : Physical map of Northeastern states (Source : Online)

1.22. The following paras summarize the discussions and the data that various tables above in this chapter refer to. It is observed that there is a disparity in the wireless tele-density in the 8 NE states compared to all India average of 82.94. The lowest wireless tele-density is 68.70 in Assam and highest wireless tele-density is 137.87 in Sikkim. Further, a comparison of

wireless tele-density in rural and urban areas of the respective states will reveal diversity within the states themselves. There is quite a variance in socio-demographic structures and administrative setups of the individual NE states and therefore, a one-size-fits-all policy approach for telecom infrastructure roll out may not work to bring in parity of digital divide prevailing in these states with rest of the country. To examine the diversity between rural and urban mobile coverage among the NE states, state wise rural and urban wireless tele-density figures have been compared in **Table 1.9 below:**

Table 1.9: Wireless Tele-Density in NE States – Inter State Comparison

State	Area	Population (2011 census)	Pop. Density	Wireless Tele-Density	Rural Wireless Tele-Density	Urban Wireless Tele-density
Arunachal Pradesh	83,743	13,83,727	17	83.75	67.32	131.70
Assam	78,438	31,205,576	398	68.70	51.34	163.26
Manipur	22,327	28,55,794	128	72.83	47.43	126.06
Meghalaya	22,429	29,64,007	132	73.81	55.76	143.24
Mizoram	21,087	10,91,014	52	111.18	110.79	111.51
Nagaland	16,579	19,78,502	119	70.80	74.29	66.57
Sikkim	7,096	6,10,000	86	137.87	159.85	114.25
Tripura	10,486	36,74,000	350	74.54	58.59	99.77
NE States	2,62,185	4,57,62,620	175	72.21	54.81	135.43
All India	32,87,263	1,210,854,977	382	82.94	57.79	129.56

Note: Tele-density figures are based on the no. of subscribers and projected population of the current year

- 1.23. From the Table 1.9 above it is observed that rural wireless tele-density in Assam is 51.34 which is less than that of all India average of 57.79 but in contrast the urban tele-density of Assam is 163.63, which is far greater than that of all India average of 129.56. Similarly, it is observed that wireless tele-density in the rural areas of Manipur and Meghalaya is less than that of all India average even though the urban tele-density is comparable to that of all India average. This indicates inadequate mobile coverage in rural areas of these two states.

- 1.24. In contrast, it is observed that rural wireless tele-density in Arunachal Pradesh, Mizoram, and Nagaland is much higher than that of all India average rural wireless tele-density of 57.79. This could be due to the facts that population density in major part of these states (as can be seen in Tables 1.2A, 1.5A, and 1.6A) is less than 100, and villages are scattered. Also, less than required no of mobile sites have so far been commissioned in rural areas under USO funded projects in these states. Another reason for the higher tele-density can also be attributed to the significant deployment of security forces (SF) in northeastern states as these states share international borders amounting to almost 5182 Km with countries like Bangladesh, Myanmar, Bhutan and Tibetan Autonomous Region (TAR).
- 1.25. It is also observed that rural wireless tele-density and total wireless tele-density in Sikkim is much higher than that of all India average. This could be due to the fact that mobile service, especially 2G, is available in most of the villages in Sikkim through scattered/reflected signal from far away sites. As per report of DoT (Sikkim) as on date only 6 villages do not have mobile coverage of any technology from any TSP. However, as per record of DoT (Sikkim) a large no of villages (around 359) have 2G but inadequate 4G coverage.
- 1.26. From the above discussion it can be inferred that there is a significant diversity amongst NE states when it comes to telecom connectivity and infrastructure. Due to wide diversity in the socio-demographic structure (e.g., population density, no. of villages per sq. Km. etc.) and due to other factors (e.g., delay in execution of government funded projects as can be seen in forgoing paras, etc.) there exist a gap in the mobile coverage in the villages/rural area in the NE States. Further, due to poor Return on Investment (RoI) prospects, considerable coverage by TSPs is still continuing on older generation technologies (like 2G and 3G) which needs to be upgraded to next generation technologies (like 4G and 5G).

- 1.27. The launch of 5G services in India in October 2022, is currently leading to implementation of numerous 5G use cases in the B2B and B2C spheres for the target population, which is mostly concentrated in the hinterland and metropolitan areas. However, the states of NER continue to experience a substantial digital divide between the places that have easy access to the most cutting-edge information and communications technology services vis-a-vis those in un-served and under-served regions that are still devoid of basic telecom and internet services. Bringing the state-of-the-art digital connectivity and services to NER, especially to remote and far-flung regions is an inescapable part of implementing the Digital India strategy.
- 1.28. Several initiatives by the Government are currently underway to connect the remote areas through special projects like, Comprehensive Telecom Development Plan (CTDP) for the Northeastern Region, extending mobile coverage in NE States during 2013 to 2021, and recently launched 4G-Saturation project to provide 4G mobile service to the uncovered villages etc. Successful implementation of the ongoing projects is expected to provide the desired level of broadband connectivity to the remote and far-flung areas of the Northeastern region. In addition, there are USOF funded projects to connect the Gram Panchayats (GP) with the Blocks through Optical Fiber Cable (OFC); and Department of Expenditure's '*Special Financial Assistance to the States for laying OFC for last mile connectivity to villages*'.
- 1.29. TRAI has been working towards improving telecom infrastructure in remote areas of the country from time to time. Earlier, TRAI had made the following key recommendations for improving telecom connectivity in remote and far-flung regions of India:
- a) *The Recommendations on "Improving Telecom Services in the Northeastern States: An Investment Plan" dated 26.09.2013.*

b) Recommendations on Improving Telecom Services in Andaman and Nicobar Islands and Lakshadweep dated 22.07.2014.

c) Recommendations on Improving Telecom Connectivity/Infrastructure in far-flung areas of Himachal Pradesh dated 12.12.2022.

d) Recommendations on Improving Telecom Coverage and Backhaul Infrastructure in far-flung areas of Ladakh” dated 24th Apr 2023

1.30. Though a no. of initiatives has been taken by the government of India to improve telecom connectivity in the Northeastern states, still there is lack of high-speed mobile based internet and fixed broadband connectivity mainly due to lack of adequate transmission bandwidth (OFC/ Microwave/ Satellite). The Northeast states continue to grapple with a significant digital divide, characterized by limited access to reliable telecom connectivity and services as the Northeastern states are geographically challenging, characterized due to its rugged terrain conditions, dense forests, and riverine landscapes. These barriers pose significant obstacles to establishment of reliable telecom connectivity. This divide hampers the region's socio-economic growth, restricts access to essential services and information, and exacerbates the developmental gap between the Northeast and the rest of the country.

Identification of Key challenges in rolling out telecom network in remote and far-flung regions of Northeastern Region

1.31. The TSPs and associated stakeholders, providing telecom and internet services in Northeast Region have put forth some key challenges being encountered during the interactions with TRAI. Followings are some of the major connectivity and digital infrastructure that have been highlighted by the stakeholders that are typically associated with remote and far-flung regions in Northeastern states:

- a. **Inhospitable Terrain Conditions:** Most of the inhabited population pockets of the states of Arunachal Pradesh, Assam (Dima-Hassao & Karbi Anglong Districts), Nagaland, Mizoram, Meghalaya, Manipur (hill district), Tripura, Sikkim (North Sikkim District) have very limited or poor motorable road network. These regions have multiple ridge lines of varying heights and remain inaccessible during monsoon and winter months and as a result, establishing networks and providing wireless coverage in shadow zones of cellular mobile tower (Base Trans-Receiver Station - BTS/ e-NodeB) is a major concern. Further, non-feasibility of Radio Line of Sight (RLOS) backhauls for microwave links due to inherent terrain conditions severely impedes the prospects of cellular mobile tower rollout in such regions.
- b. **Poor Availability of Power Supply:** The extant of power supply arrangements and duration of availability of commercial power supply is not very encouraging for TSPs in these relatively inaccessible areas. This leads to existing BTSs being run on Diesel Generator sets (DG sets); however, poor road network and extreme weather conditions severely affect the regular supply of diesel to these upper reaches, and therefore, these towers frequently remain non-functional. As noted in Para 2.4 below, the sub-committee constituted for submitting recommendation for Telecom infra development in Sikkim observed that a large number of BTSs is running only on DG sets in Sikkim. It was also observed that commissioning of a large number of BTS sites by TSPs is getting delayed due to delay in provisioning of electricity connections by state Government departments. The cost charged for erecting poles/wires for electricity connection is very high due to long distance from existing electric poles. Sub-committee on Sikkim recommended that State Government shall give priority for regular electricity supply (including those from other non-conventional energy sources e.g., Wind, solar, hydro, etc.) for all such site which are running only on DGs. Sub-committee also recommended that DoT/USOF may be requested for grant of CAPEX for setting up of such

non-conventional energy resources. Data from the TSPs as of Dec 2022 (**Table 4.3**) suggest that a very high percentage of the sites in the hilly states (e.g. 22% in Arunachal Pradesh) are powered by Diesel Generator.

- c. **Transmission Media Related Limitations:** In the hilly terrain of the states of Northeastern Region, it is exceedingly challenging to lay Optical Fiber Cable (OFC) due to the predominately inhospitable terrain. Based on information received from TSPs/BSNL/PGCIL/RailTel, it can be inferred that there is relatively less OFC based Points of Presence (POP) in the State of Arunachal Pradesh, few districts of Assam, Meghalaya, Mizoram, Northern districts of Nagaland, hilly districts of Manipur and Tripura well as North and West Sikkim. The lack of a reliable transmission medium with adequate capacity (e.g. OFC networks) has also contributed to the presence of very less broadband penetration both through fixed line (e.g., FTTH) and wireless i.e., 4G in these areas. Authority while visiting Arunachal Pradesh during Oct-Nov 2022 was apprised of, by local administration, about frequent isolation of telecom services in the entire District due to inadequate backhaul capacity & non-availability of alternate OFC routes.
- d. **Poor Return of Investment (RoI) prospects for TSPs:** As mentioned above, (i) all districts of Arunachal Pradesh (except Papumpare and Tirap), (ii) Dima-Hassao, Karbi-Anglong Districts of Assam (iii) Ukhrul, Chandel and Tamenlong Districts in Manipur, (iv) Lunglei, Champhai, Mamit and Serchhip of Mizoram, and (v) North Sikkim district in Sikkim are very thinly populated. Factors like low population density pose serious challenges regarding revenue and ROI for operating TSPs and hence their focus is more on revenue generating regions and districts within the respective telecom circles. For this reason, most of the previous and ongoing efforts being undertaken by DoT to

extend telecom coverage to these remote and far-flung areas are being rolled out and operated through USO funds since 2012.

- e. **Right of Way (RoW) related issues** - Most of the operating TSPs during interaction with the Authority have highlighted the issue of high RoW costs for OFC laying (*Rs 2000/meter; an additional 25% development charges are levied in tribal areas*) prevalent in Sikkim along with delay experienced towards processing of pending RoW applications in various Northeast States. One of the TSPs in the meeting with Authority at Dirang, West Kameng District in Arunachal Pradesh informed that ROW permission for only 677 km out of 1553 km has been received from the Arunachal State Government till Oct 2022. However, with the recent amendment in the Right of Way rules (of 22 August 2022) and launch of Gatishakti Sanchar Portal, the RoW process has significantly got streamlined, except in a few states. It is expected that pending RoW issues will be substantially resolved over time. However, there are additional challenges like limitation in hilly terrain in laying overhead/underground OFC along the same route (due to inadequate space both in the hill side and valley side) by multiple TSPs especially for last mile connectivity to mobile sites.

Consultation with Stakeholders for framing these recommendations

1.32. Extensive consultation/ interaction was carried out with all major stakeholders which has been briefly explained below:

- a. The Authority undertook extensive consultations (in the form of meetings, review of progress, field visits, etc) with the major stakeholders like TSPs (i.e. Airtel, RJIL, VIL), Infrastructure Providers, Telecom PSUs (i.e. BSNL, RailTel, PGCIL), State Government departments, DoT field units, USOF, Gram Panchayat Administrations, Common Service Centre (CSCs) at Arunachal Pradesh, Assam, and Sikkim, and Tripura to assess the current status of the telecom infrastructure, issues in the deployment of telecom

infrastructure, and policy measures required for further improvement for providing seamless connectivity to all population in NE States.

- b. The Authority and its officers also visited different parts of Arunachal Pradesh, Assam, and Sikkim, and interacted with state government officials, consumer representatives, representatives from security forces etc, to obtain first-hand information from the user's perspective. The Authority also interacted with the state government administration, representatives of the local population, and defense personnels posted in different NE states to discuss issues related to grievance redressal mechanism.
- c. TRAI undertook the assessment of quality and coverage of mobile services especially on the highways in all the NE states during September 2021 to March 2023. It was observed that a large proportion of highways have poor mobile coverage (especially for 4G services).
- d. The Authority, accompanied by a team of TRAI officials held a meeting with CGMs of BSNL Assam & NE Circles along with Sr.DDG DoT of Assam LSA at Guwahati in October 2022 to discuss various issues regarding telecom services, including the services being provided through BharatNet. The Authority also visited different parts of Assam and Arunachal Pradesh, in the month of October and November 2022 to carry out a review of the telecom infrastructure with district administration and all concerned stakeholders at Dirang, Jung, Tawang and Rupa in Arunachal Pradesh, and at Udalguri in Assam. The Authority undertook extensive interactions with relevant stakeholders viz BSNL, Bharat Broadband Network Limited (BBNL), school administration, local consumer representatives, and local district/block level state government officials to evaluate the extant condition of telecom infrastructure in the remote and far-flung areas

of these states. The TRAI team also visited a few CSCs in Tripura and obtained their suggestions for strengthening CSCs in NE states for delivering services. The team also visited BharaNet connectivity established on OFC and VSAT in Manipur and Tripura respectively and had discussions with the Gram Panchayat (GP) administrations to comprehend the ongoing BharatNet related issues.

- 1.33. The development of telecom services in Northeastern States, particularly in the remote areas is lagging compared to rest of India due to the key challenges mentioned above. Additionally, adequate bandwidth for high-speed internet is not available at these places due to absence of a commensurate transmission backbone (comprising of OFC, Microwave, and Satellite). As a result, there is considerable difference between the telecom infrastructure and service rollout in the Northeastern states, particularly in hilly areas vis-a-vis other states in India.
- 1.34. The strategic significance of the NER, with its border proximity to neighboring countries, necessitates robust telecom infrastructure for national security and defence purposes. Improved telecom infrastructure is vital for unlocking the economic potential of the NER. Deployment of robust telecom networks can attract investments, stimulate economic activities, and foster entrepreneurship. Enhanced connectivity will facilitate e-commerce, enable seamless communication for businesses, and create employment opportunities, thereby uplifting the socio-economic status of the region. While the nation is at the cusp of fastest roll out of 5G network infrastructure in the world, framing of comprehensive recommendations for improving telecom infrastructure in the far-flung areas of the Northeastern states is imperative to bridge the digital divide, unlock economic potential, overcome geographical challenges, foster collaboration, and ensure national security. Based on the consultation/ interaction and detailed analysis of the data obtained

from the relevant stakeholders, these suo-moto recommendations have been prepared by the TRAI.

- 1.35. For the purpose of these recommendations, mention of North-Eastern Region (NER) States includes Sikkim as well, unless specifically excluded.
- 1.36. The current set of recommendations will significantly contribute towards strengthening the region's telecom backbone, facilitating seamless communication, efficient surveillance, and effective coordination in the border areas. The purpose of this recommendation is to address the pressing need for improving telecom connectivity and infrastructure in the Northeast region of India with an aim to bridge the digital divide and unleash socio-economic growth. **Chapter-2** briefly describes the approach, methodology and consultation with the stakeholders and **Chapter-3** analyses the gap in the infrastructure to provide seamless 4G mobile coverage in the northeastern states. **Chapter-4** discusses the telecom infrastructure development approach in NER. **Chapter 5** discusses provision and sustenance of high-speed Broadband Connectivity for digital inclusion and overall Socio-economic development in the NE states and **Chapter-6**, the final chapter, contains summary of all the recommendations.

Chapter-2

Approach and Methodology

- 2.1 The Authority has formulated these recommendations to improve telecom infrastructure in the NE for bridging the digital divide, unlock economic potential, overcome geographical challenges, foster collaboration, and ensure national security. In order to support seamless 4G connectivity and digital inclusion in NE States, the approach and methodology adopted for framing these recommendations is based on following:
- a) Analysis of existing infrastructure, rolled out by TSPs in NE.
 - b) Analysis of Government/ USOF sponsored schemes in NE.
 - c) Analysis to identify the gaps in telecom infrastructure.
- 2.2 Following aspects have also been examined in detail for making these recommendations:
- a. TRAI recommendations made earlier.
 - b. Initiatives of USOF/DoT taken during 2010 to 2022 in improving the mobile coverage in NE states and their implementation status.
 - c. Initiatives of USOF/DoT taken during 2010 to 2022 in improving the OFC backhaul connectivity from DHQ to SDHQ (i.e. Block) in NE states and their implementation status.
 - d. Initiatives of USOF/DoT/Government of India taken in improving the utilization of BharatNet OFC already laid from Block to GP in NE states and their implementation status.
- 2.3 In addition, a Workshop/ Seminar on “**Vision for Socio-economic transformation in NE States- Role of 5G technologies and Digital infrastructure**” was held by TRAI at Guwahati, Assam on 04 November 2022, wherein the subject matter was deliberated upon, by various stakeholders including senior officers of the concerned departments of the NE States.

- 2.4 During the visits, interactions were held with the Department of Information Technology (DIT) of the Government of Assam, Arunachal Pradesh, and Sikkim to ascertain the verified details of uncovered villages and prioritize the suggested efforts via TRAI recommendation. A sub-committee comprising of Secretary, Information and Technology, Govt of Sikkim; Deputy Director General, Department of Telecommunications, Sikkim and Advisor, Telecom Regulatory Authority of India, Regional Office Kolkata was also formed for recommending various steps to be taken for improvement of Telecom Infrastructure in the state of Sikkim. The committee had held three meetings with all stakeholders, interacted with them and obtained data and feedback from operating TSPs, BBNL, PGCIL, RailTel, power transmission and distribution companies, operating in the state. The Committee submitted the recommendations to the Government of Sikkim, basis which a letter (DO Letter No M-5/9/(4)/2021-QoS dated 07.10.2022) was written by Secretary, TRAI to DoT which is enclosed as **Annexure-I**.
- 2.5 The Authority would like to mention here that it has been working over these recommendations for quite some time and the data used to assess the gaps and progress of the ongoing schemes have been collected over a period and therefore in some cases it may differ from ‘as on date’ data.
- 2.6 Based on the above-mentioned efforts, the Authority has suo-moto framed these recommendations, which are aimed at undertaking suitable efforts to bridge the extant digital divide in NER states.

Chapter-3

Gaps in the infrastructure to provide seamless 4G mobile coverage

Infrastructure Gap Analysis

- 3.1 For arriving at the current status and identifying gaps thereof, data was obtained from, DoT LSAs, TSPs, and USOF/DoT with regards to the ongoing USO funded projects, and USO funded projects implemented during the period of 2010 to 2022. A detailed analysis of the mobile coverage and connectivity data furnished by the stakeholders was undertaken to arrive at those areas which are lagging as far as last mile connectivity is concerned. The village-wise coverage details received from DoT/LSAs was analyzed and has been taken into consideration to arrive at the list of un-covered villages. Data from TSPs was collected regarding the ongoing USOF funded mobile coverage projects by private TSPs (i.e., Airtel and RJIL) while the data from BSNL was collected regarding the project status of the ongoing **‘4G Saturation Project’**.

Present Status of mobile coverage and connectivity in the NE-States

- 3.2 Mobile Network connectivity for the uncovered villages is being monitored by a division in DoT LSAs. TRAI approached the concerned DoT LSAs i.e., Assam, Northeast, and Sikkim, as well as all the major operating TSPs in Assam and Northeast states to obtain the existing telecom coverage details for further analysis. Amongst the TSPs, M/s RJIL is offering 4G Volte based coverage throughout all its operational sites, whereas M/s Bharti Airtel is offering 4G and 2G based coverage respectively at its operational sites in the 8 NE states. M/s VIL is majorly offering 4G services along with 2G services at few locations. M/s BSNL is predominantly providing 2G/3G based services with 4G services limited only to selected sites. TSP-wise no. of Mobile tower sites and OFC connectivity information as received from the respective TSPs is shown in **Table 3.1** below:

Table 3.1: The TSP-wise Mobile Network for the Northeast States

State	TSP	No of Macro Sites	No of Micro/ Small cells	No of Sites with 3G or 4G	No of Sites on OFC	% of Macro Sites on OFC	% of all sites on OFC
Arunachal Pradesh	AIRTEL	706	0	688	191	27.05%	27.05%
Arunachal Pradesh	BSNL	306	0	205	177	57.84%	57.84%

Tripura	BSNL	444	1	295	262	58.78%	59.01%
Tripura	RJIO	1318	60	1378	586	39.91%	44.46%
Tripura	VIL	398	0	268	60	15.08%	15.08%
Total		34099	3137	34597	12287	26.83%	36.03%

Coverage gap analysis

- 3.3 Based on an earlier reference received from DoT on the subject i.e. *‘Augmentation/Revamping of Telecom Services in North Eastern States including the State of Sikkim-Study regarding gap and investment required for formulation of a telecom plan’*, TRAI in its recommendation on *“Improving Telecom Services in the Northeastern States: An Investment Plan”* dated 26.09.2013, had brought out at that, out of the 43,200 no. of inhabited villages in the NER, total uncovered **villages (e.g. villages with no mobile coverage) were 9190** (Arunachal Pradesh-2886, Assam-2885, Meghalaya- 2389, Mizoram-258, Manipur-610, Nagaland-137, Sikkim-23, and Tripura-2) (**Table 2.8, page-33 of TRAI recommendations dated 29.09.2013 refers**). TRAI in above recommendations of 2013 had recommended *that*:
- a. *In the first phase, 2G mobile coverage should be extended to all remaining BHQs, towns and such villages which have a population of more than 250 in the NE Region.*
 - b. *After execution of the first phase, the actual number of uncovered villages should be assessed, and the remaining uncovered villages should be taken up subsequently.*
- 3.4 Further, recognizing the importance of healthy telecom connectivity along the National Highways for economic development of the region, TRAI in the aforementioned recommendations had brought that, out of the 9,846 Km length of National Highways passing through the NE region, 1,631 Km length (16.56 %) did not have mobile coverage.
- 3.5 Subsequent to the above recommendation, a no. of initiatives has been undertaken by the government to improve telecom connectivity in the Northeastern region. Such initiatives also did bear fruit as is evident from the improved tele-density and other figures discussed in Chapter 1 above. TRAI also undertook extensive RF drive tests to assess the coverage in all NE states and important highways during Aug 2021 to Mar 2023. It has

been observed that mobile sites are more concentrated at certain pockets which are urban, and densely populated. RF drive test although is a good tool to provide accurate information on village coverage but it is practically not possible to undertake RF drive test in all villages and highways. It has also been observed that DoT periodically monitors village level coverage data based on reports from TSPs and based on physical inspection. Accordingly, the village level coverage data maintained by DoT LSA units have been resorted to for mobile coverage gap analysis. A village which at present does not have any mobile coverage of 2G, 3G or 4G technology from any TSPs has been considered as an uncovered village. The data (from DoT LSA units) regarding no. of villages yet to be covered by any TSP (as per **Table 3.2** below) indicates that, in the NE States there is disparity/non-uniformity in terms of mobile connectivity within the region. State wise detailed list of **6136 uncovered villages** is attached as **Annexure-II**.

Table 3.2: State wise number of villages that does not have Mobile coverage

State	Total no of inhabited villages (2022) #	No of uncovered villages in 2012##	No of uncovered villages in 2022	% of villages yet to have mobile coverage in 2022	Remarks
Arunachal Pradesh	6123	3126	2834	46.28	Work is in Progress (WIP) by Airtel & BSNL under two USO funded projects
Assam	26429	3536	796	3.01	WIP by RJIO& BSNL under two USO funded projects
Manipur	4091	634	833	20.36	WIP by BSNL under 4G Saturation Project
Meghalaya	7155	2612	940	13.14	--do--
Mizoram	877	268	163	18.59	--do--
Nagaland	1658	143	340	21.68	--do--
Sikkim	425	27	6	1.65	--do--
Tripura	1176	2	224	23.58	--do--
Total	47844	10348	6136	12.89	--do--

Figures have been taken from state government reports available on-line

Figures reproduced from TRAI Recommendations dated 26.09.2013

USOF Projects/ Schemes for extending Mobile Coverage in NE States:

3.6 Efforts have already been undertaken by DoT (through USOF sponsored projects) towards rollout of telecom and internet services to cover remote and far-flung uncovered villages by initiation of projects for extension of mobile coverage, for extension of mobile broadband networks, to cover the uncovered villages and through rollout of OFC based project (District to Block OFC connectivity, BharatNet & DoE's Financial incentive i.e. Special Assistance Scheme to states for extending last mile OFC connectivity to villages). The details of DoT- USOF funded projects initiated during the period of 2013 to 2021 to improve mobile coverage and connectivity, are as mentioned below:

3.6.1 Comprehensive Telecom Development Plan (CTDP) for North-Eastern Region:

On 10th September 2014, a Comprehensive Telecom Development Plan (CTDP) for the Northeastern Region (NER) was approved by the government with an estimated expenditure of Rs. 5,336.18 Crore. This project was aimed to cover 8621 villages out of the 9190 unconnected villages (see Para 3.3 above) by installing 6673 towers. The project also envisaged seamless connectivity on national highways through 321 mobile towers, and the laying of OFC of total 3208 km. The break-up of the state-wise number of unconnected villages, no. of towers, associated cost, etc., as envisaged in the plan is shown in Table 3.3 below.

Table 3.3: State-wise number of unconnected villages, no. of towers, associated cost, etc., of CTDP-2014 for NER (Note 1)

Sl No.	State	No. of Villages	No. of Towers	No. of Towers on NH	OFC to be laid (Km.)	Total Cost (Rs. Cr.)
1	Arunachal Pradesh	2805	1893	149	1584	1561.44
2	Assam	2503	1874	33	228	1542.2
3	Manipur	610	528	53	171	351.95
4	Meghalaya	2389	2374	11	123	1390.3

5	Mizoram	258	252	19	747	282.46
6	Nagaland	137	134	48	154	157.08
7	Tripura	2	2	7	76	19.36
8	Sikkim	23	23	1	125	30.74
	Total	8727	7080	321	3208	5335.5

Note1: Booklet of DoT viz. ‘Connecting Bharat’ released in 2015

- a. The initial tender for the above project was published in Sept 2014, but no one participated in the tendering process. Later, the project was divided into two parts: (a) for tough terrain that included Arunachal Pradesh, and two districts of Assam (i.e. Dima-Hasso and Karbi-Anglong), the job of project execution involving installation of about 2,817 mobile towers was given to BSNL, and (b) for the other 6 states, the project was planned for execution by private telecom operators.
- b. BSNL was nominated to execute the work related to Arunachal Pradesh and two districts of Assam (Dima-Hasao& Karbi-Anglong) to cover **4119 villages** (2805 in Arunachal Pradesh and 1314 in two districts of Assam) by installing 2817 mobile towers (2G or enhanced capabilities). However, the project was a non-starter due to various reasons. Later, the project for providing mobile connectivity in the uncovered villages of Arunachal Pradesh and two districts of Assam (i.e., Dima-Hasao and Karbi- Anglong) was accorded to *M/s Airtel & RJIL* respectively.
- c. After a gap of 3 years, on 08.12.2017, DoT (USOF) entered into an agreement with M/s Bharti Airtel Limited (BAL) (for Assam & Sikkim) and Bharti Hexacom Limited (BHL) (for rest of NE States except Arunachal Pradesh & Meghalaya) for installation of 2004 nos of mobile towers in 2128 villages and 321 mobile towers along national highways at a cost of Rs 1655.66 crore.

The state-wise no. of villages planned to be covered under the project is shown in Table-3.4 below).

Table 3.4: State-wise USO funded projects on improving mobile coverage in NER

S1 No.	State	Implementing agency	No. of Villages	No. of Towers on NH	Total Cost (Rs. Cr.)
1	Arunachal Pradesh	---	---	321	1665.66
2	Assam	Bharti Airtel	1190		
3	Manipur	Bharti Hexacom	528		
4	Meghalaya	---	---		
5	Mizoram	Bharti Hexacom	252		
6	Nagaland	Bharti Hexacom	133		
7	Tripura	Bharti Hexacom	2		
8	Sikkim	Bharti Airtel	23		

As per the USOF website (accessed on 01.09.2023), 1358 mobile towers have been commissioned for connecting 1246 villages and additional 281 sites have been commissioned for National Highway. The remaining towers could not be commissioned due to various reasons such as pre-existence of mobile coverage, population migration/ pending forest/defence clearances/ villages washout/ villages not found/ accessibility issues etc and the project roll out phase is over.

3.6.2 USO funded 4G based Mobile Coverage Projects in NER

- a. An agreement was signed with M/s Bharti Hexacom Limited on 04.09.2020 for a project that envisages 4G-based mobile coverage in uncovered areas and along national highways in Meghalaya. The details of the project are given in **Table-3.5**.

Table 3.5: USO funded 4G mobile coverage Project in Meghalaya

Sl No.	State	Implementing agency	No. of Villages	No. of Towers to be installed		Total Cost (Rs. Cr.)
				In the villages	Along NH	
1	Meghalaya	Bharti Hexacom	1164	878	11	726.65

As per July 2023 update posted on USOF website (accessed on 01.09.2023), 355 towers have been commissioned covering 526 villages and 3 national highway sites.

- b. Similarly, another project for **4G mobile coverage to a total of 2,374 identified uncovered villages** in Arunachal Pradesh and two districts of Assam (Dima-Hasao& Karbi Anglong) at a cost of Rs 2028.80 crore was approved by USOF/DoT on 09.12.2020. The details of the project are given in **Table-3.6**.

Table 3.6: USO funded 4G mobile coverage Project in Arunachal Pradesh & Assam (2 Districts)

Sl No.	State	Implementing Agency / Agreement date	No. of Villages	No. of Towers to be installed in the villages	Total Cost (Rs. Cr.)
1	Arunachal Pradesh	Bharti Hexacom / 29.10.2021	1683	980	2028.80
2	Assam (two districts)	Reliance Jio / 01.11.2021	691	531	

As per July 2023 update posted on USOF website (accessed on 01.09.2023), survey work has been completed and 222 towers have been commissioned in two districts of Assam covering 303 villages and 192 towers have been commissioned in Arunachal Pradesh covering 348 villages.

3.6.3 Saturation of 4G Mobile Services: On 27 July 2022, the Central Government approved the USOF sponsored initiative to provide 4G mobile coverage to all unconnected villages in the nation. The “**4G Saturation Project**” aimed at extending 4G connectivity to all the uncovered villages and the villages that have only 2G/3G connectivity. The project seeks to provide 4G mobile services in 24,680 untapped villages (by installing 16,464 mobile towers) in challenging and isolated places. The project also incorporates a clause that allows for the addition of 20% more villages (4,936 villages with 3,258 mobile towers) due to reasons like rehabilitation, new settlements, withdrawal of services by existing providers, etc. Additionally, 6,279 villages having only 2G or 3G access shall also be upgraded to 4G. M/s Bharat Sanchar Nigam Limited (BSNL), utilizing the indigenously developed Atmanirbhar Bharat’s 4G technology stack, is the Project Implementation Agency (PIA) for carrying out the project execution.

The project is being supported by the Universal Service Obligation Fund with a target date of completion as December 2023. The no of villages and sites included under 4G coverage extension projects being executed by Airtel & RJio, and the 4G saturation projects being executed by BSNL, and the progress as of Mar 2023, is shown in **Table-3.7** below:

Table 3.7: Villages Planned to be covered with 4G by USOF/DoT funded Projects in NE States

State	PIA for USOF/DoT funded project execution	No of Villages uncovered as per Record of DoT	No of uncovered Villages given to TSP for 4G coverage by USOF	No of Villages that have no population or are untraceable	No of Villages (in Col. B) included in other USOF/DoT Proj.	No of Villages (in Col. B) already covered by TSPs	No of Villages to be covered by 4G (B-C-D-E)	No of 4G sites planned to cover all villages (in Col. F)	Sites Commercialised.	No of Sites planned on OFC	No of Sites planned on MW	No of Sites planned on Satellite	Remarks
		A	B	C	D	E	F	G	H				
Arunachal Pradesh	BSNL (4GS)	2834	2659	158	73	364	2064	713	0	38	107	568	Survey in 755 villages WIP
	Airtel (4GEP)		1683	206		441	1036	980	116	101	460	50	4G extension Project
Assam	BSNL (4GS)	796	658	51		219	388	388	0	99	239	50	
	Jio (4GEP)		691				691	531	163	0	163	0	4G extension Project
Manipur	BSNL (4GS)	833	973	50	87	626	210	186	0	15	140	31	
Meghalaya	BSNL (4GS)	940	990				990	365	0	7	353	5	
	Airtel (4GEP)		1164	17			1147	878	340	23	317	0	4G extension Project
Mizoram	BSNL (4GS)	163	244	5	0	90	149	68	0	0	32	36	
Nagaland	BSNL (4GS)	340	520				502	315	0	9	279	27	
Sikkim	BSNL (4GS)	6	359			273	86	56	0	14	22	30	Survey in 30 villages WIP
Tripura	BSNL (4GS)	224	362				362	140	0	19	100	21	
Total		6136	10303	487	160	2013	7625	4620	619	325	2212	818	

Note: Data has been gathered from DoT/USOF, BSNL and TSPs over the period of Dec 2022 to Apr 2023. 4GS – 4G Saturation Project. 4GEP – 4G extension Project which is extension of comprehensive telecom development plan for NER.

Chapter-4

Issues affecting the Telecom Infrastructure Development in NER

- 4.1 There are various reasons which are causing delays in the timely completion of the projects in NE states. While some of them are controllable, others are difficult to manage. From the analysis quoted at Para 3.6.1, 3.6.2 and 3.6.3 of Chapter 3 above, it is evident that significant efforts have been initiated by the Central Government to bridge the connectivity gap of Northeastern states and bring them at par with other states of India. Unfortunately, there has been an inordinate delay in completion of the majority of the USO funded projects in these states as can be seen from the Table 4.1, 4.2A and 4.2B below:

Table 4.1: Progress of USOF/DoT funded Projects to cover uncovered villages in NE Region during 2013 to 2020

Sl No.	State	Project Implementing TSP	Year of Start of the project	No. of villages as per Agreement	No of Sites on Highway as per Agreement	Total sites Commercialised on Mar 23	No of Highway sites Commercialised	No of Villages Covered
1.	Arunachal Pradesh	Details Not Available	2017	0	149	138	138	-
2.	Assam	Airtel	2017	1189	33	439	25	530
3.	Manipur	Airtel	2017	528	53	404	55	382
4.	Mizoram	Airtel	2017	252	19	214	17	213
5.	Nagaland	Airtel	2017	134	48	151	45	112
6.	Sikkim	Airtel	2017	23	1	8	0	9
7.	Tripura	Airtel	2017	2	7	3	1	-
8.	Meghalaya	Airtel	2020	1164	11	340	-	510
9.	Arunachal Pradesh	Airtel	2021	1683	Details Not Available	116	Details Not Available	198
10.	Assam (2 Districts)	RJIL	2021	691	Details Not Available	163	Details Not Available	222
	Total NE States during 2014 to 2021			5666	321	1976	281	2176

- 4.2 The Authority has also tried to carry out an assessment of the implementation of CTDP-NER Plan 2014 that the government has formulated after TRAI's gave its recommendations on "*Improving Telecom Services in the Northeastern States: An Investment Plan*" in 2013. The same has been summarized in table 4.2A and 4.2B below. Ironically the data indicates that there have been significant delays in implementing the CTDP-NER Plan 2014.
- 4.3 As per CTDP -2014, a total of 87,27 villages were proposed to be covered using 7,080 sites in villages, and 321 sites for highway (HW) coverage. Project initiation itself got delayed, and the first phase of these projects commenced in 2017 in 6 states. However, projects for village coverage in Meghalaya and Arunachal Pradesh could not be commenced simultaneously. Projects in 6 states (excluding Meghalaya and Arunachal Pradesh) were scheduled to be completed in December 2019, but they got delayed due to various unavoidable reasons. Projects for village coverage in Arunachal Pradesh, 2 districts in Assam and Meghalaya were subsequently initiated in 2020-21. The project was initiated in Meghalaya in 2020 by M/s Bharti Airtel and was scheduled to be completed in September 2022 but is already delayed. Projects initiated in Arunachal Pradesh in 2021 by M/s Bharti Airtel and in Assam (2 districts) in 2021 by M/s RJIL were scheduled to be completed in April 2023 however, they also stand delayed.
- 4.4 In addition, there were significant deviations from what was planned and what finally got implemented. TRAI in its 2013 recommendations had carried out a detailed analysis of the transmission core network in NER and had recommended that USOF should fund core network connectivity as well. This was based on detailed research. The recommendations laid significant emphasis on gaps between desired bandwidth and existing transmission bandwidth at the State Capital and District Headquarters and suggested investing through USOF for improving the same. USOF /DoT had not taken any action on this part of the TRAI recommendations. As a result, even till today, unavailability of desired core transmission network remains a bottleneck in roll out of telecom networks and services to block headquarters in NER and also in implementation of BharatNet project.

Table 4.2A: Delay in Plan and Execution of Government funded Projects in NER

* Coverage means 4G coverage;

- Meghalaya (PDC- Sep 2022) and Arunachal Pradesh & Assam (2 Districts) – PDC Apr 2023 (PDC – Projected date of completion)

- 4.5 Delay in execution of projects for extending mobile coverage defeats the very purpose. For any project execution, it is imperative that the possible reasons for delay in completion of the projects are examined in detail beforehand and suitable correction mechanisms are implemented during the project execution. As per interaction with the stakeholders, the delays in project execution in the NER states can be attributed to following reasons:
- a. Delay in site acquisition.
 - b. Delay in getting permission from local authorities.
 - c. Delay in getting commercial power supply.
 - d. Non-availability/feasibility of backhaul media connectivity.
- 4.6 The Authority has analyzed these reasons in detail in following paragraphs and is of the opinion that most of these issues can be taken care of at the time of planning itself by adequate consultation with the potential implementing agencies, DoT field units and respective state Government departments.

Issues that Impose Delays in Site Acquisitions & Permissions from Local Authorities

- 4.7 During interaction with stakeholders, the district administrations of two districts of Arunachal Pradesh have informed that the administration did not have any prior information on the activities (e.g., site acquisition) carried out by TSPs regarding the installation of new sites but learnt about site acquisition process by TSPs only when site acquisition related disputes were brought to their notice. It was suggested by district administration that TSPs should give prior intimation to district administration and local bodies on the proposed mobile tower installation activities. This will help in identifying sites to be commissioned as a priority for extending mobile services. The Authority was also apprised that there is an urgent need to provide 4G services to all schools, health centres, police stations, home stay location (for boosting tourism), etc. This clearly indicates that detailed prior consultation with all the stakeholders is essential before finalizing USO funded projects. Delay in

site acquisition will reduce if sites are finalized according to the priority of local government. It is to be noted that issues related to site acquisition for installation of mobile tower in NER was also observed earlier by TRAI, and accordingly TRAI in 2013 recommended that “*State Government of NER may provide land for erection of Ground Based Towers (GBT) and Govt buildings for erection of Roof Top Towers (RTT)*”.

- 4.8 Most of the TSPs during interaction with the Authority have also highlighted the issue of high RoW costs for OFC laying (i.e. **Rs 2000/metre; additional 25% development charges in tribal areas**) along with delay experienced in processing of RoW applications. The problem becomes even more critical when it comes to laying OFC or setting up of mobile tower sites in Forest/Defence land in various NE States. One of the TSPs has informed that ROW permission for only 677 km out of 1553 km was received from the State Government of Arunachal Pradesh. Similar delay in RoW permission for laying OFC through forest land has been reported by other TSPs in Sikkim. The Authority is of the opinion that for solving the problem of digital communication infrastructure (DCI) and to provide digital communication networks and services in every nook and corner of the NER, the first issue that needs to be resolved is that of quick processing of RoW permissions and provision of support by state governments in site acquisition. The Authority has noted the fact that the Government of Sikkim and Government of Tripura are providing free land for erection of Ground Based Towers (GBT). They are also providing roof top space in Govt buildings (e.g, Schools, health centers, police stations, etc,) for erection of Roof Top Towers (RTT) for extending telecom services in rural areas. The Authority is of the opinion that DoT should also engage with other state governments in NER to make a similar arrangement.
- 4.9 The Authority is informed about the fact that Ministry of Defence (MoD) is already onboard the ‘*GatiShakti Sanchar Portal*’ and subject to compliance of its security conditions stipulated at Annexure A to its O.M. folio No.

1126/1/2005/D (Lands) issued on 18 January 2023, MoD has already implemented mechanisms for RoW applications to be processed within 60 days from the date of application. The Authority also acknowledges the challenges being faced by telecom service providers (TSPs) and Universal Service Obligation Fund (USOF) nominated implementing agency(ies) in rolling out telecom infrastructure in sparsely populated rural, tribal, and hilly regions of Northeastern India, including Sikkim. The Authority is of the view that by removing the financial burden of RoW charges, the telecom operators can focus on expanding network coverage and improving connectivity in these underserved areas.

4.10 **The Authority recommends that Department of Telecommunications (DoT) should engage with respective state governments of Northeastern States of India including Sikkim to harmonize their respective state RoW policy in line with “The Indian Telegraph Right of Way Rules, 2016 (RoW Rules, 2016)” and its amendments thereon, at the earliest.**

4.11 **The Authority also recommends for DoT to engage with the respective state governments of the northeastern states including Sikkim, to implement the following recommendations:**

a. Exemption of Right-of-Way (RoW) Charges in Rural, Tribal and Hilly Regions – The Authority recommends that the DoT must actively pursue discussions with respective state governments to secure a complete exemption of RoW charges in their rural, tribal and hilly regions for a duration of five years. This exemption will provide an incentive for TSPs and will give them a nudge to invest in the deployment of telecom projects in sparsely populated regions of Northeastern India.

b. Waiver of ‘Tribal Development Charges’ - To further facilitate expansion of telecom infrastructure roll out in the tribal regions of Northeastern India, the Authority recommends that wherever

applicable in the Northeastern states of India including Sikkim, DoT must also engage with the respective state governments, seeking a complete waiver of the additional 25% 'Tribal Development Charges' being imposed upon TSPs. However, it should be made incumbent upon the TSPs to ensure that any damage(s) to the private property/ public infrastructure is made good.

- 4.12 **Collaboration and Monitoring** - The Authority acknowledges the fact that a substantial amount of time has already been lost due to inordinate delays in rolling out and commercializing the critically essential USOF sponsored telecom infrastructure project in various northeastern states including Sikkim. Continuous engagement and coordination will be critical in realizing the objectives of bridging the digital divide in the rural, tribal, and hilly regions of Northeastern India.
- 4.13 The National Broadband Mission has already envisaged a four-level implementation structure of committees to steer, drive, and achieve the Mission's objectives —
- a. Governing Council for Broadband
 - b. Broadband Steering Committee at the National level
 - c. State Broadband Committees in every State/ UTs
 - d. District/ Municipal Monitoring Committee
- 4.14 The States/UTs are provisioned to set up a District/Municipal Monitoring Committee within the District /Municipal area to monitor the progress on a monthly basis and submit reports to the State Committee. The Authority in its recommendations on Roadmap to Promote Broadband Connectivity and Enhanced Broadband Speed dated 31.08.2021 had recommended that -

“District Level Committees, with District Magistrate as Chairman, a representative from LSA unit of DoT, and Superintend Engineer (SE)/ Executive

Engineer (Ex. Eng.) of Public Works Department (PWD), be set up to streamline RoW permissions framework at district level. The District Level Committees could necessarily include representatives from:

- a. Irrigation Department,*
- b. Forest Department,*
- c. Rural Development Department,*
- d. Local Bodies like Municipal Corporation, Municipality etc.*
- e. Utility service providers like telegraph, electricity, water, gas etc”.*

- 4.15 **The Authority recommends that DoT should take it up with State Governments of NER including Sikkim to immediately form the District Level Committees as already recommended vide paragraph 5.50 (iii) of its earlier recommendations on ‘Roadmap to Promote Broadband Connectivity and Enhanced Broadband Speed’ dated 31.08.2021. The meetings of these District Level Committees should be held online every month to ensure that regular monitoring and evaluation is carried out to assess the progress made in deploying telecom infrastructure and to address any issues that may arise during effective implementation of TSP/USOF sponsored telecom projects.**

Issues that delay the provisioning of power supply to mobile site:

- 4.16 Availability of commercial power supply works as the lifeline of telecom networks, and telecom networks cannot function without the availability of reliable, continuous uninterrupted power supply. Delay in providing power connectivity to sites results in delay in rolling out telecom related schemes. It has been brought out by the stakeholders that many a times, the charges levied for providing the last mile electricity connection to telecom sites are exorbitant, thus making the site unviable. Further, high electricity tariffs also affect the financial viability of providing telecom services.

- 4.17 Stakeholders have also submitted that due to extreme climate conditions and erratic power supply in the hilly regions/ far-flung areas of various states of NE States, it is difficult to maintain the battery backup and up-time of the equipment. Though the power situation in NER is improving but limited power availability with poor quality of supply i.e., voltage instability remains an issue. The costs of extending the power connectivity up to all mobile tower sites, which sometimes include the cost of transformers, are simply passed on to the TSPs by the DISCOMs. TSPs, in turn, prefer to run the sites on diesel generators (DGs) rather than bearing the costs of transmission lines. As per information received from the stakeholders, non-availability of power connection to these sites are due to distance of more than 2-3 km from the nearest electric poles, and cost of erecting poles and drawing power cable is very high in the hilly terrains, and as a result it is commercially unviable for TSPs to get power connection on payment basis.
- 4.18 TSP wise no of mobile tower sites running only on DG as on Dec 2022, due to non-availability of commercial power supply is provided in **Table 4.3** on the adjacent page:

Table 4.3: Number of Mobile Sites Running on DG in NE States

State	TSP	No of Macro Sites	No of Sites on DG only	% of Sites on DG
Arunachal Pradesh	AIRTEL	706	144	20.40%
Assam		6955	127	1.83%
Manipur		1276	44	3.45%
Meghalaya		937	116	12.38%
Mizoram		618	33	5.34%
Nagaland		719	11	1.53%
Sikkim		219	9	4.11%
Tripura		1005	1	0.10%
Arunachal Pradesh	BSNL	306	2	0.65%
Assam		1741	3	0.17%
Manipur		232	4	1.72%
Meghalaya		326	0	0.00%
Mizoram		142	0	0.00%
Nagaland		167	0	0.00%
Sikkim		89	6	6.74%
Tripura		444	0	0.00%
Arunachal Pradesh	RJIO	497	52	10.46%
Assam		6946	191	2.75%
Manipur		1081	45	4.16%
Meghalaya		1219	101	8.29%
Mizoram		493	48	9.74%
Nagaland		806	29	3.60%
Sikkim		333	17	5.11%
Tripura		1318	39	2.96%
Arunachal Pradesh	VIL	262	97	37.02%
Assam		3453	126	3.65%
Manipur		369	6	1.63%
Meghalaya		367	64	17.44%
Mizoram		183	3	1.64%
Nagaland		278	4	1.44%
Sikkim		214	0	0.00%
Tripura		398	6	1.51%
Total		34099	1328	3.89%

- 4.19 From the above Table 4.3 it can be inferred that quite a number of mobile sites are still running only on DG. Though most of the villages in NE states now have power connectivity however, owing to poor quality of commercial power supply available in these areas augmented with erratic power outages and high CAPEX with inordinate processing delay involved in extending last mile power connectivity to telecom sites in such remote and hilly regions, sites are commissioned using DG sets. Further, obtaining environmental clearance for installing DG sets involves substantial time and costs. **The Authority recommends that DoT should engage with Ministry of Environment and Forests of respective Northeastern states including Sikkim to facilitate creation of enabling provisions in their policy to expedite accord of environmental clearance to TSPs for installing Mobile towers and DG sets for tower locations.**
- 4.20 TSPs also informed that Power Departments of NER are charging the electricity at commercial rates, and it should be charged at industrial or utility rate for sites in rural and remote areas to make such sites commercially viable. It is to be noted that the sub-committee formed for improvement of coverage and quality of Telecom Services in Sikkim had also highlighted this issue in its report submitted to the Government of Sikkim during August 2022. This Report was also shared with Secretary DoT vide TRAI letter dated 07-10-2022 for taking necessary action (Copy of the letter is attached as **Annexure-I**).
- 4.21 Further, it has been observed that DoT vide a letter No. 16-12/2014-CS-III dated 28.10.2014 communicated to all states that “Telecom Towers” have been given infrastructure status by Government of India vide Gazette Notification No. 81 dated 28.03.2012 and all benefits, as applicable to infrastructure industry, should be extended for telecom towers also. The Authority is of the opinion that it is the responsibility of the states to provide uninterrupted power supply at affordable costs in time bound manner to Telecom Service/Infra providers. The Authority has already recommended

above that State Governments should provide land and government building roof top sites where power is available to Telecom Service/Infra providers.

4.22 On lines of its '*Recommendations on Improving Telecom Coverage and Backhaul Infrastructure in far-flung areas of Ladakh*' dated 24 April 2023, the Authority is of the opinion that DoT should take it up with respective State Governments of NER including Sikkim to consider waiving off last mile installation charges for extending electric connection to telecom sites in remote, far-flung, hilly and tribal regions and to also consider providing electricity to these telecom sites on priority (within 15 days of connections request) at Utility/Industrial tariffs.

4.23 The Authority has noted that some of State Electricity Regulatory Commissions (SERCs) have declared separate tariffs for public utilities which is far below tariff offered even for industrial establishment. An example of such a tariff can be seen in table 4.5 below for Delhi Electricity Regulatory Commission (DERC).

Figure 4.1: Tariff slabs stipulated by DERC

ELECTRICITY TARIFF SCHEDULE FOR FY 2020-21 – BRPL, BYPL, TPDDL & NDMC							
Sr. No.	CATEGORY	FIXED CHARGES	ENERGY CHARGES				
1	DOMESTIC						
1.1	INDIVIDUAL CONNECTIONS		0-200 Units	201-400 Units	401-800 Units	801-1200 Units	>1200 Units
A	Upto 2 kW	20 Rs./kW/month	3.00 Rs./kWh	4.50 Rs./kWh	6.50 Rs./kWh	7.00 Rs./kWh	8.00 Rs./kWh
B	> 2kW and ≤ 5 kW	50 Rs./kW/month					
C	> 5kW and ≤ 15 kW	100 Rs./kW/month					
D	>15kW and ≤ 25 kW	200 Rs./kW/month					
E	> 25kW	250 Rs./kW/month					
1.2	Single Point Delivery Supply for GHS	150 Rs./kW/month	4.50 Rs./kWh				
2	NON-DOMESTIC						
2.1	Upto 3kVA	250 Rs./kVA/month	6.00 Rs./kVAh				
2.2	Above 3kVA	250 Rs./kVA/month	8.50 Rs./kVAh				
3	INDUSTRIAL	250 Rs./kVA/month	7.75 Rs./kVAh				
4	AGRICULTURE	125 Rs./kW/month	1.50 Rs./kWh				
5	MUSHROOM CULTIVATION	200 Rs./kW/month	3.50 Rs./kWh				
6	PUBLIC UTILITIES	250 Rs./kVA/month	6.25 Rs./kVAh				
7	DELHI INTERNATIONAL AIRPORT LTD. (DIAL)	250 Rs./kVA/month	7.75 Rs./kVAh				

4.24 The Authority is of the opinion that DoT should take it up with respective state governments of NE states so that the State Electricity Regulatory Commissions (SERCs) should spell out utility tariff for those organizations

that are providing utility services. This tariff should be lower than the industrial tariff. Telecom Service/Infrastructure Providers should be subjected to such utility tariffs only.

- 4.25 As per data obtained from TSPs (**Table 4.3**), 1328 sites were running only on DG in NE states as of Dec 2022. TSPs are facing major problems in maintaining transportation of diesel at these sites located at remote and hilly areas round the year due to poor road condition as well as higher transportation cost. This further increases the OPEX for these sites. To add to these, during instances of disturbances, strike/bandhs, the supply of diesel to mobile tower sites gets disturbed, affecting the uptime, and hence the QoS. In some states like Sikkim, local people have imposed restrictions on the running of DG sets during night hours. This leads to disruption of telecom services during night hours. Considering all these factors as well as the fact that technological improvements has led to reduced requirement of power at telecom installation sites, in such situations solar power or other renewable energy sources (viz. small hydro power, wind power, etc.) can be an alternative. Even though the solar power solutions in NER have its own limitations because of the terrain and weather conditions but wherever such solutions can work, they can be used in hybrid mode of working along with DGs to solve the problem of non-availability of commercial power supply. However, providing solar power backups to sites may adversely impact their commercial viability.
- 4.26 It is observed that a scheme has now been made operational by MNRE (vide No. F. No. 318/331/2017-GCRT dated 27-01-2023) for Rooftop Solar (RTS) plant where Central Financial Assistance is made available under Rooftop Solar Program Phase-II in residential sector to individual household or by Resident Welfare Associations/Group Housing Societies (RWA/GHS). Based on representation from NER, MNRE has now decided to provide higher CFA for residential consumers of NE States and those of Sikkim, Uttarakhand, Himachal Pradesh, UT of Jammu & Kashmir, Ladakh, Lakshadweep, and

Andaman & Nicobar Islands. Following benefits are available under this scheme:

- a. Individual Household - For first 3 kW: Rs. 17662/ kW and for RTS capacity beyond 3 kW and upto 10 kW: Rs. 8831/kW.
- b. Resident Welfare Associations/Group Housing Societies (RWA/GHS) - Rs. 8831/kW for common facilities up to 500 kWp @ 10 kWp per house.

- 4.27 The Authority is of the view that DoT should take up with the MNRE for coming up with a scheme to fund installation of solar panels at important strategic telecom sites in remote hilly areas on lines of their scheme for RWA/GHS.
- 4.28 The Authority has noted that for LTE Phase-I project executed by BSNL, USOF funded Rs 20 lakhs per 2G mobile site for the solar plant of capacity 7.5KW in 2012. In a similar way, USOF provided subsidy of Rs 86.45 lakhs per 4G mobile site including solar plant of capacity 10 KW to Airtel for LTE Phase-II project in 2021. For another LTE Phase-II project USOF provided subsidy of Rs 87.30 lakhs per 4G mobile site including solar plant of capacity 10 KW to RJio in 2021. Similarly, for 4G Saturation Project being executed by BSNL with 100% subsidy from USOF, provision has been made for 5KVA DG or Solar Plant of adequate capacity at an estimated total CAPEX cost of 84.07 lakhs per site (including DG/Solar Plant). The Authority is of the opinion that on similar lines USOF should continue to provide full reimbursement support for installing solar backup at such USOF funded sites that do not have any power connectivity and are running on DG sets only. For sites where electric connection can be obtained from state DISCOM, the preference should be given to the same. As has been discussed above, the State Governments should be persuaded to provide such connectivity either at zero cost or at a subsidized cost. Whatever costs are being incurred by service providers for obtaining such a connection, should be reimbursed fully.

- 4.29 The Authority accordingly **recommends that DOT should take it up with the State Governments of NER including Sikkim for:**
- a. **Providing electricity to telecom sites as a priority (within 15 days of connections request) at Utility/Industrial tariff.**
 - b. **Waiving off or subsidizing last mile installation charges for extending electricity connection to telecom sites in remote and hilly areas.**
 - c. **Respective State Electricity Regulatory Commissions (SERCs) to spell out utility tariffs which should be lower than the industrial tariff. Telecom Service/Infrastructure Providers should be subjected to such utility tariffs only.**
- 4.30 The Authority further recommends that USOF should continue to provide full reimbursement support for installing solar backup at such USOF funded sites that do not have any power connectivity and are running on DG sets only. For sites where electric connection can be obtained from state DISCOM, the preference should be given to the same.
- 4.31 The Authority also recommends that the DoT should take up with the MNRE and concerned state Government for coming up with a scheme (in line with Central Financial Assistance for RWA/GHS under Roof Top Solar Program Phase-II) to fund installation of renewable energy sources at all important (existing and new) strategic telecom sites in remote hilly areas immediately.

Delays due to non-availability/ non-feasibility of backhaul link to mobile Sites:

4.32 TSP wise no of sites with OFC backhaul connectivity as of Dec 2022, is given in Table 4.1. From Table 4.1 it can be seen that in NE states out of 34099 macro sites for all TSPs, only 9150 sites i.e. 26.83% are on OFC backhaul; majority of the sites i.e. 72.78% (24816 out of 34099) are on MW and 0.39% (133 out of 34099) are on satellite media. TRAI through its recommendation in 2013 had observed that as of 2012, nearly 22% mobile sites were having OFC backhaul. Present status of OFC media connectivity to mobile sites shows that over the period of last 10 years progress of connecting mobile sites on OFC is very slow and has only increased marginally from 22% to 27%. The present status of OFC connectivity at block level by all TSPs, and Central Government PSUs like BSNL, RailTel, and PGCIL has been compiled and provided in **Table 4.4**. State wise list of Blocks which does not have OFC either from any TSP or from any Government PSU is attached in **Annexure-III**. It is also observed that in a large number of blocks i.e. 161 out of total 621, OFC is available only from one TSP or from one PSU (**Annexure-IV**). From the tables it can be seen that as of Dec 2022, there were around 19% (119 out of total 621) blocks which are yet not connected on OFC. Even BSNL has an inadequate presence of OFC in about 6 NE states.

Table 4.4: Presence of OFC by no of TSP and no of PSU at Block level

No of District and Blocks				Presence of OFC by no of TSP and no of PSU at Block level							
Sl No	State/UT	Total No of District	Total No of Blocks	No of Blocks with OFC connectivity						No of Blocks which have OFC either from one PSU or from one TSP	No of Blocks which do not have OFC either from any PSU or from any TSP
				One TSP	Two TSPs	Three TSPs	One PSU	Two PSUs	Three PSUs		
1	Arunachal Pradesh	25	98	24	18	3	18	3	0	25	46
2	Assam	31	217	112	72	9	111	9	0	70	11
3	Manipur	16	67	28	17	4	14	5	3	18	18
4	Meghalaya	12	46	14	13	10	22	6	0	7	6
5	Mizoram	11	27	12	10	1	5	2	0	10	3
6	Nagaland	16	75	23	17	6	15	3	1	18	27
7	Sikkim	6	33	10	7	7	10	3	0	11	8
8	Tripura	8	58	33	14	7	22	35	1	2	0
	Total	125	621	256	168	47	217	66	5	161	119

- 4.33 Efforts were earlier undertaken by DoT (i.e., USOF), through initiation of projects for establishing robust OFC backbone networks to connect to:-
- a. District to Block and
 - b. Block to GP/Village OFC connectivity under BharatNet.

These projects were initiated during 2010 to 2013.

- 4.34 To create robust OFC backbone networks with adequate bandwidth up to block level in NER, USOF/DoT took initiatives to establish intra-district OFC networks from District Headquarters (DHQ) to SDHQ i.e. Block Head Quarter (BHQ) for Assam and other 6 NE states (except Sikkim). The work for establishing OFC networks in Assam was given by USOF/DoT to BSNL in 2010 and works for establishing OFC networks for remaining 6 NE states was given to RailTel in 2012. The Projects initiated by USOF were aimed at creation of general infrastructure in rural and remote areas for development of telecom facilities in the NER. As a part of this initiative, and to address the gaps in OFC connectivity between BHQ and DHQ an agreement was signed with BSNL on 12th Feb 2010 (based on an open tender) for augmentation, creation and management of **intra-District SDHQ-DHQ OFC network** for transport of rural/remote area traffic on bandwidth sharing basis in Assam. The project on establishing Intra-District DHQ to SDHQ (i.e. Block) OFC transport network was planned on a Build, Operate & Own basis (BOO). Accordingly, BSNL started to build, operate and manage all the equipment/infrastructure for the planned intra-district augmented/created OFC transport network. As per agreement (vide No. 30-170-6/2009-USF dated 12-02-2010) all 354 PoPs (i.e. nodes which are planned to be placed at 27 DHQs, 269 SDHQs/BHQs, 58 additional points enroute) were to be connected on physical OFC Ring Route(s) with the DHQ node, ensuring cable route diversity. A total amount of Rs 98.89 Cr subsidy was granted over a period of 5 years. It was envisaged that at least 70% of the subsidized bandwidth capacity created

under the project will be shared with TSPs in the Assam LSA at a rate not more than 26.22% of the current ceiling tariffs prescribed by TRAI.

- 4.35 Two agreements (vide No. 30-170-8/NE-I/2009-USF dated 16-01-2012 & No. 30-170-8-1/NE-II/2009-USF dated 16-01-2012) were similarly signed by USOF with RailTel in Jan 2012 for augmentation, creation and management of **intra-district SDHQ to DHQ OFC network** for Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland and Tripura. As per the agreements, RailTel was granted a total amount of Rs 388.0 Crores subsidy, and a target was assigned to complete the OFC laying works in 402 Blocks under 82 Districts within two years from the date of agreement i.e. by Jan 2014. The projects of RailTel could not be completed even in 2018, and the status of DHQ to BHQ OFC connectivity of RailTel in all 5 states (except Tripura) as on Dec 2022 is 10.12%; only 32 out of total 316 blocks are connected in these 5 states. Though the Authority could not get exact details of the achievements of these projects but based on the presence of OFC network in number of blocks (as of Dec 2022) of BSNL and RailTel in respective circles (refer table 4.5 below), it can be concluded that the achievements of these projects were not encouraging. As on Dec 2022 BSNL OFC presence is only in 50% (i.e. 112 out of total 223) of blocks in Assam. Also, as on Dec 2022, OFC of RailTel is present in merely 18.45% of the blocks, i.e. 69 out of total 374 Blocks in 6 NE states. It can be inferred from Table 4.5 that either BSNL could not finally complete the OFC connectivity in all the planned DHQ to BHQ routes or OFC laying was completed which subsequently got damaged.

Table 4.5: Plan Vs Achievement of DHQ to Block OFC Connectivity projects funded by DoT/USOF

State	Project Implementing TSP	Year of Start of the project	No of Blocks Planned in 2010-2012	No of Blocks Commercialised	No of Blocks OFC of RailTel is Present as on Dec 2022	No of Blocks OFC of BSNL is Present as on Dec 2022
Arunachal Pradesh	RailTel	2012	173	NA	3	
Assam	BSNL	2010	269	NA		112
Manipur	RailTel	2012	44	NA	13

Tripura	RailTel	2012	39	NA	37	
NE States			671	NA	69	112

Source: Information received from RailTel and BSNL; NA – Data Not Available

- 4.36 As per information received from RailTel the DHQ to BHQ OFC connectivity projects in 6 NE states could not be completed as per plan due to a number of reasons including:
- challenges of laying OFC underground in hilly terrain
 - repeated landslide
 - major road expansion works
 - non-availability of existing OFC of BSNL planned to be used for end-to-end connectivity in order to avoid duplication of infrastructure.
- 4.37 The reasons for the delay in completion of the DHQ to BHQ OFC connectivity projects were analyzed by TRAI while discussing with different stake holders. It seems that the decision to use existing BSNL cable (which was laid long ago) without ascertaining the actual physical/operational condition of the same was one of the major bottlenecks.

4.38 It is observed that along with the above works of DHQ to Block OFC connectivity, DoT/USOF also awarded the works of OFC connectivity from Block to GP/Village Council (VC) to BSNL in Assam and Sikkim, and RailTel in the remaining 6 NE states during 2013-14 under BharatNet Project. In line with the DHQ to Block OFC connectivity projects, in BharatNet also DoT/USOF proposed to use existing BSNL OFC wherever available to avoid duplication of the infrastructure. This was done again without first assessing the physical/operational conditions of the existing OFC of BSNL. The Status of BharatNet OFC connectivity to GP/Village in NE states as on Mar 2022 is provided in **Table 4.6** below.

Table 4.6: Plan Vs Achievement of Block to GP/Village OFC Connectivity under BharatNet (as on Mar 2023)

State	Project Implementing TSP	Year of Start of the project	No of GP/Village as on Mar 2023	No of GP/Village Planned (Ph-I)	No of GP/Village Commercialised On OFC	No of GP/VC OFC Operational	OFC Utilisation in No of GP/VC
Arunachal Pradesh	RailTel	2014	2108	675	88	8	0
Assam	BSNL	2014	2904	2205	1635	660	463
Manipur	RailTel	2014	3704	605	325	44	11

NE States			13154	6654	2919	1119	745

***Indicates cumulative figures of BharatNet Phase I & II for Sikkim**

4.39 BSNL in Assam and RailTel in Tripura could partially complete the OFC laying projects as can be seen in Table 4.6 above. Project of OFC laying by RailTel in the remaining 5 NE states has been short/ closed. Progress in Sikkim is poor, and it has been informed that BSNL is again planning to lay overhead OFC out there.

- 4.40 In recent times Department of Expenditure (DoE) Government of India has initiated schemes for Financial Assistance to states in the form of interest free loan for last mile OFC connectivity to villages in the NE towards rollout of high-speed broadband and internet services to remote and far-flung villages using OFC based FTTH technology and Wi-Fi Hotspot. However, OFC laying works against these projects are yet to start.
- 4.41 Poor availability of OFC backbone from DHQ to Block and Block to GP/Village will severely impact effective and timely completion of 4G extension and 4G Saturation Projects being executed by Airtel, RJio and BSNL. It will also seriously impact the Quality of services (i.e., speed) to be delivered to the rural population. From Table 4.7 it is clearly visible that only 7.62% (325 out of total 4620) sites for 4G have been planned on OFC in the 8 NE states. With such a deployment, the village population will get 4G coverage, but the quality and bandwidth availability may not be adequate.
- 4.42 Considering the poor progress of DHQ to BHQ OFC connectivity Projects funded by USOF, and poor progress of BharatNet OFC connectivity from block to GP/village, and poor availability of OFC media connectivity from BSNL and other central Government PSUs like PGCIL/RailTel, the Authority is of the view that there is an urgent need to establish a robust OFC backhaul connectivity up to block level in all 8 NE states.
- 4.43 **The Authority, therefore, recommends that DoT/USOF should immediately provide CAPEX subsidy on viability gap funding (VGF) model through competitive bidding process for OFC backbone connectivity on ring topology (of commensurate bandwidth with add-drop facility at each BHQ) from DHQ or State Capital to all the 119 BHQ (as per Annexure-IV) which have no OFC connectivity. The Bandwidth created by the agency who wins the project on VGF model, will have to be mandatorily made available to all service providers on a chargeable basis. USOF should fix charges for sharing the bandwidth**

so created on lines it did in an earlier agreement with BSNL dated 12-02-2010.

- 4.44 **The Authority also recommends providing funding through USOF for operation and upkeep of network so created initially for 5 years on service level agreement (SLA) model, beyond which a decision can be taken for further continuation of operational subsidy depending on uptake of services in these BHQs.**
- 4.45 **The Authority recommends that DoT should encourage consortium of IP-I, proposed DCIPs (refer paragraph 2.24 of TRAI “Recommendations on ‘Introduction of Digital Connectivity Infrastructure Provider (DCIP) Authorization under Unified License (UL)’ dated 08 August 2023) and TSPs to participate in the bidding process.**

Need for sharing of OFC Backbone in Blocks where OFC is available from one or more TSPs/PSUs in NER Sates:

- 4.46 Considering the inhospitable terrain conditions, logistic difficulties, and CAPEX intensive nature of laying and maintenance of OFC in the NER states, it may not be profitable venture for any single operating licensed TSP to lay and maintain a self-healing core backhaul media resource all by itself. To gainfully exploit the extant layout of OFC backhaul resource and in order to extend high quality of telecom services (having minimum downtime) to the inhabitants of NER living in remote and far-flung area, it should be prudent for all operating TSPs operating in NER to explore pooling and/or dovetailing of resources.
- 4.47 The Authority vide its recommendations on ‘Improving Telecom Coverage and Backhaul Infrastructure in far-flung areas of Ladakh’ dated 24th April 2023 had recommended that :

‘All operating TSPs having their backhaul transmission media must provide, on fair and non-discriminatory terms and conditions, access to their spare backhaul transmission media resource capacity via lease/ rent or on mutually agreeable terms and conditions, to any eligible licensed TSP/ ISP including implementing agencies of ongoing and futuristic USOF projects, who seeks access to such resource. In this regard, the Authority recommends that a committee headed by a Senior officer from TERM field unit of J&K at LSA level, and also involving suitable representative(s) of all operating TSPs of the LSA be formed at the earliest to help resource pooling across TSPs for optical fibre-based ring formation and to periodically review and resolve such representations at LSA level. In case of any impediment being experienced by any affected entity, a second level Committee at the DoT headquarter should be formed to periodically review all such cases and provide resolution by intervention at higher levels, if required.’

4.48 In view of above, and **in line with recommendations made earlier vide Para 2.34 (a) and (b) of “Improving Telecom Coverage and Backhaul Infrastructure in far-flung areas of Ladakh” dated 24th April 2023, the Authority recommends that-**

- a. All operating TSPs in NER including Sikkim having their backhaul transmission media must provide, on fair and non-discriminatory terms and conditions, access to their spare backhaul transmission media resource capacity via lease/ rent or on mutually agreeable terms and conditions, to any eligible licensed TSP/ ISP including implementing agencies of ongoing and futuristic USOF projects, who seeks access to such resource.**
- b. A committee headed by a Senior officer from DoT field unit of the respective state/LSA level, and also involving suitable representative(s) of all operating TSPs of the NER LSAs**

including Sikkim be formed at the earliest to help resource pooling across TSPs for optical fibre-based ring formation, and to periodically review and resolve such representations at state/LSA level. In case of any impediment being experienced by any affected entity, a second level Committee at the DoT headquarters should be formed to periodically review all such cases and provide resolution by intervention at higher levels, if required.

- 4.49 In order to encourage initiatives and infrastructure sharing practices amongst operating TSPs, the Authority in its recommendations on ‘Use of Street Furniture for Small Cell and Aerial Fibre Deployment’ dated 29th November 2022 had stated that :

‘Charges paid by lessee TSP to lessor TSP for use of shared infrastructure should be reduced from the Gross Revenues of the lessor TSP to arrive at Applicable Gross Revenue (ApGR) of such Lessor TSP. To implement this, a new item named as “Revenue earned from other licensed TSPs from sharing/leasing of infrastructure” should be inserted under existing license condition named as “List of other items to be excluded from GR to arrive at ApGR.’

- 4.50 **The Authority reiterates its earlier recommendation made vide paragraph 2.113 of its recommendations on ‘Use of Street Furniture for Small Cell and Aerial Fibre Deployment’ dated 29th November 2022 that “the charges paid by lessee (a TSP) to any lessor TSP for use of spare backhaul media transmission resource capacity of the latter, should be reduced from the Gross Revenues of the lessor TSP to arrive at Applicable Gross Revenue (AGR) of such Lessor TSP. To implement this, a new item named as “Revenue earned from other licensed TSPs from sharing/leasing of infrastructure” should be inserted under existing license condition, named as “List of other items to be excluded from GR to arrive at AGR”. This modification**

may be carried out in UL, NLD and ISP licenses. Also, the information collected in “Format of Statement of Revenue and License Fee” that is attached with respective authorization chapter in UL, and also in NLD and ISP licenses needs to be modified to capture information from such revenues under a separate head.”

- 4.51 In remote areas where the return on investments is poor, it is important that common sharable infrastructure is created which can be used by all TSPs. The Authority had noted that in most USOF funded projects, even though the infrastructure is being created through Government support, the provisions for mandatory sharing of infrastructure are missing. Further, the hilly regions falling under these NE States are prone to natural disasters. Incidents like landslides, cloudbursts, flash floods, avalanches, earthquakes, etc. can severely affect the connectivity and relief operations in such areas. Cellular communication, especially with Intra-Circle Roaming (ICR) facility enabled, plays a key role in such areas for quick reaction and effective mitigation of disaster. TRAI is already in receipt of a reference on enabling ICR for remote and hilly regions frequently prone to natural disaster-based emergency situations. The subject is currently under examination and TRAI will come up with separate recommendations in this regard after due consultations.

Need for Continuation of Backhaul Connectivity on Satellite:

- 4.52 As per discussions with TSPs it is found that there are few locations where connectivity can be established only on Satellite as connectivity either on OFC or MW will be technically not feasible and not maintainable due to limitations of hilly terrain. For backhaul connectivity to mobile sites mainly two types of media are used through satellite media: (i) IDR- Intermediate Data Rate, traditionally used for end-to-end 2/8/34 Mbps links; and (ii) IP-VSAT, presently used for connectivity to IP based mobile tower sites. No

of Mobile sites connected on satellite media as on Mar 2023 in NE states in given in **Table 4.7 below**.

Table 4.7: Number of Mobile Sites with Backhaul on Satellite Media in NE

State	TSP	No of Macro Sites	No of Sites with 3G or 4G	No of Sites on OFC	No of Sites on Micro wave	No of Sites on Satellite	% of sites connected on Satellite
Arunachal Pradesh	AIRTEL	706	688	191	509	6	0.85%
Arunachal Pradesh	BSNL	306	205	177	60	69	22.55%
Assam	AIRTEL	6955	6932	1299	5656	9	0.13%
Manipur	AIRTEL	1276	1235	218	1043	18	1.41%
Mizoram	AIRTEL	618	594	147	451	21	3.40%
Mizoram	BSNL	142	105	30	112	1	0.70%
Nagaland	AIRTEL	719	705	122	593	5	0.70%
Sikkim	AIRTEL	219	212	78	148	4	1.83%
Total		34099	34188	12287	21679	133	0.39%

4.53 As reported by TSPs, most of the existing sites with satellite backhaul link do not have adequate bandwidth. Sites that are having satellite backhaul are provisioned with only 2Mbps link capacity, which is grossly inadequate for 4G application. As per reports from TSPs large parts of Arunachal Pradesh, Manipur and Mizoram do not have good motorable roads. In many of these parts the mobile sites are connected on satellite media.

4.54 From Table 4.7 above it can be seen that the major proportion of mobile sites are on Satellite media in Arunachal Pradesh and Mizoram. These sites are commissioned with subsidy from DoT/USOF. Airtel/BSNL informed the authority in various meetings that such sites are not commercially viable, and DoT needs to continue to reimburse the cost of satellite bandwidth charges in full to keep these sites operational. During the interactions with the authority, BSNL in Arunachal Pradesh submitted that in around 69 locations in tribal and remote border areas, mobile sites are working on Satellite media. These sites are commercially non-viable for BSNL due to hefty charges being paid to DoT for allocation of

frequency/spectrum required in the space sector and cost of the transponder equipment; while the revenue generated from these sites are negligible compared to the charges paid to DoT/satellite service provider. At present the charges of approximately Rs.33 Crores per annum are being paid by BSNL for Arunachal Pradesh SSA to DoT & Satellite Service providers for the 69 mobile site locations which are working on satellite media. The cost for satellite bandwidth itself is much higher compared to total revenue of BSNL Arunachal Pradesh SSA.

4.55 BSNL has requested to the Authority that in line with the practice being adopted for Andaman & Nicobar and Lakshadweep islands, concerned State Government shall be asked to bear these charges for mobile connectivity using satellite media amounting to Rs 33 Crores per annum from the 'Tribal Fund', as BSNL is not in a position to subsidize these huge charges for loss making BTS sites. The Authority agrees with the concerns that in long run it is not possible for any TSP to spend huge capital and operational costs for running unviable sites in hilly and remote areas. These sites primarily serve strategic, or service delivery needs of Government.

4.56 TRAI further observed that DoT/USOF in its recent agreement made with BSNL for **“4G Saturation Project”**, has made a provision to reimburse the VSAT bandwidth charges (i.e., space sector spectrum usage charges) payable by BSNL to satellite service providers for backhaul connectivity to mobile sites on satellite media. However, this reimbursement is bounded by following conditions:

- a. Maximum No of mobile sites that can use satellite backhaul link is 15% of the total sites under 4G Saturation Project.
- b. Maximum no of months, the reimbursement can be claimed is
=Total no of sites x 1 Month. This equates to: $100/15=6.66$ months

if 15 % of total sites are on satellite links; $100/10 = 10$ months if 10% of total sites are on satellite links, and $100/5 = 20$ months if 5% of total sites are on satellite links.

4.57 The Authority has noted that in the 4G Saturation Project, BSNL has planned a total of 200 sites on satellite out of 1538 sites in 7 NE states (excluding Arunachal Pradesh). This equates to around 13% of sites. If a similar percentage is considered for pan India, then SUC for satellite links will be reimbursed by DoT/USOF for only 8 months. List of sites planned on VSAT in Arunachal Pradesh is 568 out of total 713 sites i.e. 80% of the total sites. A similar agreement has been made with the private TSPs viz. Airtel/RJio for giving subsidies for VSAT links for two years. It is also observed that considering the present OFC availability in NE states it will not be possible for BSNL or any TSP to convert these satellite links to OFC/MW within such a short period. TSPs were of the view that without support from government, running such sites beyond the period of subsidy (i.e. 2 years for TSPs and 6-12 months for BSNL) will not be possible as sites are commercially not viable.

4.58 **Considering the analysis made on the provision of satellite backhaul to mobile tower sites in remote and difficult to access locations in Northeastern states including Sikkim, the Authority makes the following recommendations:**

- a. **In lines with its earlier recommendations made vide para 2.40 of the Recommendations on “Improving Telecom Connectivity/ Infrastructure in far-flung areas of Himachal Pradesh” dated 12.12.2022 the Authority recommends that DoT should do a site-wise analysis of all such sites that are being run by any TSP on VSAT in remote and hilly areas of NER including Sikkim. For all such sites that are being run to serve strategic or service**

delivery needs of the Government, the entire operational costs of running these sites should be borne by the Government.

- b. The Authority recommends that 100% reimbursement on account of the satellite link charges be made by USOF/DoT to BSNL against 4G Saturation Project for all the links for the entire duration of the maintenance agreement i.e., for 5 years in place of the present formula-based duration as made in the agreement.**
- c. The Authority recommends that subsidies on account of the satellite links be given by USOF/DoT to TSPs against the 4G coverage Project for the entire duration of the maintenance agreement i.e., for 5 years in place of 2 years as made in the agreement.**

Actions required by DoT to reduce the delay in execution and effective implementation of Projects funded from USOF:

- 4.59 From the analysis that has been done in sections above on the progress of the ongoing USOF projects, and earlier projects for intra- District DHQ to BHQ OFC connectivity, and issues which are causing delay in project execution, it is observed that generally the pace of work is very slow in NE region due to limitations imposed by geographical terrain, and it is also observed that by the time a project is completed, next generation of technologies arrives and full benefit of the scheme does not reach to the consumers.
- 4.60 The Authority vide its earlier recommendation on 'Improving Telecom Services in the North-Eastern States: An Investment Plan' dated 26 September 2013 had tried to address the issue of delays in USOF funded project execution stating that:

“the Authority recommends that USOF should ensure compliance to stringent timelines and in-built penalty clauses in USO funded projects. In NOFN project, USOF/BBNL should build-in severe penalty clauses for delays in its agreements with the agencies implementing the project. At the same time, USOF/BBNL should also incentivize executing agencies in case the work is completed before the stipulated timeframe”.

4.61 The Authority reiterates its earlier recommendation made vide paragraph 1.20 of its earlier recommendation on ‘Improving Telecom Services in the North-Eastern States: An Investment Plan’ dated 26 September 2013 that “USOF/DoT should ensure compliance to stringent timelines in USO funded projects. USOF should build in severe penalty clauses for delays in its agreements with the agencies implementing the project. At the same time, USOF should also incentivize executing agencies in case the work is completed before the stipulated timeframe.”

4.62 The Authority also recommends that field units of DoT should be entrusted with the task of project monitoring for timely completion of the projects.

Catering to needs of defence/para-military forces in NER:

4.63 Authority during the visit of Arunachal Pradesh was appraised by senior officers of Seema Suraksha Bal (SSB)/Indo-Tibetan Border Police (ITBP) that in large no of villages adjoining to Border Out Post (BOP) mobile coverage (especially 4G) is very poor and they suggested that SSB/ITBP will provide suitable land/space where ever available in the BOPs for installation of additional 4G towers under the ongoing 4G Saturation Project by BSNL. In a meeting with senior officers of SSB with Authority SSB had requested the Authority to take it up with DoT for installation of additional 4G sites under 4G saturation projects at certain forward post

locations. There are no mobile services in large part of the border areas. For the safety of tourists visiting border areas, and also to empower local population all villages adjoining border areas and all BOP locations must be connected with 4G Mobile coverage under the ongoing 4G saturation projects in the NE states and other states.

4.64 Accordingly, Authority vide its DO letter No. G-17/(41)/ 2023-NSI-I dated 14 July 2023 has already approached DoT for provisioning of 4G based cellular mobile coverage at forward post locations of SSB/ITBP/Army/BSF. **The Authority recommends for DoT to take up this work as a priority.**

4.65 To make the 4G saturation project more impactful, **the Authority recommends that:**

a. In the first phase, in consultation with respective state governments of NER including Sikkim, priority should be given to all such uncovered/non-4G villages which have Schools, Health Centres, Police Stations, Post Offices, Ration Shops, Anganwadi Centres, etc. irrespective of the population of the village.

b. Next priority should be given to all other villages with populations of 250 or more, and all the locations planned for improvement in highway 4G coverage.

4.66 However, after a careful examination of targets envisaged in different USO funded projects and its effective utilization, few gaps at policy level, and at the planning stages are noticed. These gaps, if addressed suitably beforehand, then the actual benefits will reach the targeted populations. Following issues at the policy level and at the planning stage need urgent attention of DoT/USOF:

Sharing of infrastructure/network built from USO fund/subsidy:

- 4.67 It is observed that under the various USOF sponsored schemes/ projects, more than 12000 villages in the NE States will be getting connected to the mobile networks through 2G/4G. However, the service of only one operator would be available in each of these 12000 villages, that of the TSP implementing the project. In this regard the findings of the Operator Assisted Drive Tests (OADT) conducted in NE region by the TRAI, also corroborate the fact; wherein, it is found that in large parts of Arunachal Pradesh, Mizoram, Meghalaya etc., coverage of only Bharti Airtel is available through the mobile tower sites funded through USOF. It is very unlikely to have networks of all TSPs in these areas due to economic viability issues and that is the reason why these projects are being funded through USOF. In this regard, TRAI through its consultation paper on “Telecom Infrastructure Sharing, Spectrum Sharing and Spectrum Leasing” dated 13 January 2023 is examining, *inter-alia*, the need for any obligation on TSPs to share infrastructure that has been funded either partially or fully, by the Government through USOF or otherwise, with other TSPs.

Intra-Circle Roaming in NER:

- 4.68 In the entire NER, many places have connectivity of one TSP only. While one TSP may have seamless/uninterrupted connectivity in some areas, in others, some other TSP may be having coverage. Because of the lack of sufficient traffic, installation of their own BTSs by all TSPs is not a viable business proposition. Moreover, it will also result in duplication of infrastructure. In this regard, TRAI through its consultation paper on “Telecom Infrastructure Sharing, Spectrum Sharing and Spectrum Leasing” dated 13 January 2023, is examining, *inter-alia*, as to what measures could be taken to encourage roaming arrangements among TSPs in remote and far-flung areas.

Covering shadow areas of villages in 4G saturation project:

4.69 The Authority applauds the efforts of DoT in envisaging 4G saturation project. The project aims to provide 4G connectivity in all villages that were hitherto uncovered and also those villages which had non-4G connectivity. However, it has been observed that many villages which have partial/incidental coverage, such villages have been considered as covered. The Authority is of the view that the entire area of village should be covered so that all residents of the village are able to avail digital communication services. Keeping few houses in a village out of digital inclusion will not be a desired outcome. Therefore, the Authority is of the view that DoT/USOF should get field level survey done in all villages in NER and plan additional sites in such villages where parts of the village fall in shadow zone of the hills, or which have uncovered areas.

4.70 **The Authority, therefore, recommends that DoT/USOF should get survey of all villages in Northeastern states including Sikkim done and additional sites should be planned and installed in such villages which have partial coverage or where part of village falls in shadow zones.**

Chapter-5

High Speed Broadband Connectivity for digital inclusion and overall Socio-economic development in the NE states

- 5.1 Govt of India through USOF/DoT has undertaken several initiatives for digital inclusion and overall socio-economic development in India. BharatNet is one such scheme aimed at establishing OFC connectivity from Block to Gram Panchayat (GP) or up to Village level wherever GP structure is not functional. The BharatNet Project was initiated in 2014 and BSNL was given the job of laying OFC from Block to GP in Assam and Sikkim, and RailTel was given the job of OFC laying in remaining 6 NE states. It is observed that for states like Arunachal Pradesh, Assam and Sikkim, there is GP under a Block called Community Development Block (or CD Block). However, in Meghalaya, Mizoram, Nagaland, and hill and tribal area of Manipur and Tripura, there is no GP structure, but there is Village Council/Committee or Village directly under a CD Block.
- 5.2 There are a total of 13,154 GPs & VCs in the 8 NE states (as per data compiled from different sources including census data of 2011). As per the initial plan of USOF/DoT, OFC laying was targeted to be completed in 6654 GPs & VCs in 2014 in Phase-I. However, the progress of BharatNet OFC laying in Sikkim by BSNL and in all NE states (except Tripura) by RailTel was extremely poor. Considering the poor progress, USOF/DoT subsequently decided to connect GPs/VCs on VSAT media. As of March 2023, OFC connectivity has been established only in 2919 GPs/VCs out of total 13,154. While establishing connectivity to GP/VC through VSAT it was decided by USOF/DoT to provide BharatNet connectivity on VSAT only to the remaining GPs/VCs wherever 4G services are not available. Accordingly, BharatNet connectivity on VSAT has been established only in 3,621 GPs & VCs out of remaining 10,235 GPs & VCs. No of GPs/VCs to

which BharatNet connectivity on OFC and VSAT has been established as on Mar 2023 is shown in Table 5.1 below:-

Table 5.1: BharatNet OFC/VSAT Connectivity in NE States

State	No of Dist.	No of Blocks	No of GP/VC planned in 2014	No of GP/VC in 2023	No of GP/VC on OFC	No of GP/VC on VSAT	Remarks
Arunachal Pradesh	25	98	675	2108	88	1230	Note1
Assam	31	217	2205	2904	1635	5	
Manipur	16	67	650	3704	325	1189	Note1
Meghalaya	12	46	948	967	98	593	Note1
Mizoram	11	27	262	834	41	479	Note1
Nagaland	16	75	874	1280	116	120	Note1
Sikkim	6	33	176	181	44	13	Note1
Tripura	8	58	864	1176	683	142	
NE States	125	621	6654	13154	2919	3621	

Note1: At many places the BharatNet OFC is damaged.

- 5.3 From the above Table 5.1, it is observed that except in Assam and Tripura, progress of BharatNet OFC connectivity in all the remaining 6 NE states has not been as expected. In addition to the slow progress, the OFC connectivity established earlier for BharatNet is now not operational in many places (except in Assam, Manipur, and Tripura). Involving two agencies i.e. M/s BSNL for existing OFC and M/s Railtel for incremental OFC (till Jun 2019) for maintenance of end to end BharatNet OFC connectivity (from OLT located near BHQ to ONT located in GP/VC building) has been an issue. Since Jul 2022, BSNL has been given the responsibility of OFC maintenance for the incremental part of BharatNet OFC (i.e. the OFC which was earlier laid by M/s Railtel till June 2019). BSNL has now engaged agencies for end-to-end maintenance of BharatNet OFC and GPs/VCS are progressively being made operational in Assam, Manipur and Tripura. However, the utilization is not satisfactory.

- 5.4 During the field visits it was observed that even though OFC connectivity is established and operational, services (e.g. FTTH broadband) are not preferred for usage by the majority of GPs. One of the major reasons for this is high Mean Time To Repair (MTTR) due to involvement of multiple agencies (RailTel & BSNL till Jun 2019, and subsequently CSC & BSNL from Jul 2019 to June 2022). BSNL, during the interactions with TRAI, informed that cost of maintenance of only one connection in the GP premises is very high compared to the revenue and it is not commercially viable to provide only one connection in the GP premises. The OPEX to maintain OFC and provide good uptime in a GP area can be recovered if at least 40 to 50 FTTH connections are provided from one GP connected using BharatNet OFC.

Schemes for Special Assistance to States for Capital Investment:

- 5.5 Department of Expenditure (DoE), Ministry of Finance (MoF), Government of India vide a letter dated 6th Apr 2022, had issued guidelines to all states on “*Scheme for Special Assistance to States for Capital Investment for 2022-23*”. Under Part-V (Optical Fibre Cable) of the scheme, an amount of Rs 3,000 crore was earmarked to states for capital projects on Optical Fibre Cable (OFC) Network. Funds were proposed to be used “to extend BharatNet to village level institutions (like School, Health Centre, Anganwadi, Police Station, Krishi Vikas Kendra, Post Office, Ration Shop, etc)” from GPs covered at present for Last Mile Connectivity (LMC) on the OFC to Govt. grants in the form of interest free loan for 50 years to various state governments. The primary purpose of this grant is to lay last mile lateral OFC connectivity from BharatNet GP/VC to various village level establishments and in process utilize BharatNet OFC wherever it has already been laid up to GP/VC. Using the grant, OFC for last mile connectivity in villages can be laid for providing high speed broadband internet connectivity to schools, health centres, police chowkis, ration

shops, Anganwadi Centres, etc. All NE states (except Nagaland) submitted the proposal to DoE through USOF/DoT. DoE has given grant of Rs 69 Crores to Assam and 50 Cores each to other NE states for setting up last mile OFC connectivity in villages. A brief of the proposal submitted by state governments and funds granted by DoE is given in Table 5.2 below:

Table 5.2: Project Proposal of State Government in NER and funds granted by DoE, Government of India

State	Amount Proposed for funding for CAPEX & OPEX (in Rs Cr.)	Amount Granted by MoF for the Project (in Rs Cr.)	OFC (km) Planned	No of Blocks to be Conn.	No of GPs to be Conn.	No of FTTH to be Provided	No of WiFi Hotspot to be Commercialised
Arunachal Pradesh	264.57	50	18550	104	1855	18550	1855
Assam	307	69	4500	219	0	3000	3000
Manipur	148	50	3076		325	1695	400
Meghalaya	174	50	1510	13	98	500	
Mizoram	70.74	50	1963	31	120	205	41
Nagaland	Proposal yet to be submitted						
Sikkim	300	50	2000	32	181	20000	500
Tripura	53.63	50	6413		583	29150	583

Progress of Governments of NER in establishing last mile OFC to provide FTTH broadband connections:

- 5.6 The Government of Meghalaya and Government of Tripura are executing the project funded by DoE through BSNL. The government of Assam is executing the project funded by DoE through it's PSU i.e. AMTRON. Other State governments are executing the projects funded by DoE by engaging agencies through tender. Laying of OFC in NE states is challenging, and as such these types of projects generally take 2-3 years for survey, planning, procurement, and project execution. It is observed that the

works of OFC laying in most of the states including those awarded to BSNL (i.e. in Tripura and Meghalaya) is yet to start.

5.7 In Arunachal, BharatNet OFC connectivity was established by Railtel in 88 out of 2,108 GPs and most of this OFC connectivity got damaged due to road expansion works, O&M issues and also due to non-utilization for a prolonged period. Government of Arunachal Pradesh thus submitted a proposal for laying of OFC of 18,550km and providing 18,550 nos of FTTH connections and 1,855 nos of WiFi hot spots to households/government institutions/Private Enterprises, under 1,855 nos of GP areas in all the blocks at an estimated cost of Rs 264.57 crores. However, DoE/MoF has granted Rs 50 crores against their projected requirement of Rs 264.57 crores. The government of Arunachal Pradesh has now finalized the amount of works to be executed against this allotted Rs 50 Cr special assistance fund. The Government of Arunachal Pradesh has completed last mile connectivity on OFC for providing FTTH & WiFi connectivity to nearly 880 Govt offices/Pvt. Households establishments, etc from the 88 GPs where BharatNet OFC connectivity was earlier established by Railtel. However, not all the 88 GP sites which were made live under BharatNet Phase-I, are functional as on date. State Government has requested BBNL to make these GPs live in a time bound manner.

5.8 In Assam, BharatNet OFC connectivity was established by BSNL in 1635 out of 2904 GPs and a large proportion of these OFC connectivity is not operational now due to a number of reasons including O&M issues and non-utilization for a prolonged period. Government of Assam had submitted proposal for creation & upgrade of existing OFC networks (i.e. Inter-DHQ, DHQ to BHQ, and inter-BHQ) by laying around 4500km OFC for smooth running of e-Governance Services and provisioning Internet to the remote parts of the state with a total of 3,000 FTTH connections & 3,000 WiFi hotspot in 219 blocks at an estimated cost of Rs 307 crore.

However, DoE/MoF has granted only Rs 69 crore against the requirement of Rs 307 crore. Govt. of Assam has now finalized the amount of works to be executed against Rs 69.00Cr. M/s Amtron the state government PSU is currently in the process of implementation of the project under special assistance to strengthen the e-Governance backbone which was earlier known as Assam Statewide Area Network (ASWAN).

5.9 In Manipur, BharatNet OFC connectivity was established by M/s Railtel in 325 out of 3,704 VCs and a large proportion of this OFC connectivity is not operational currently due to a number of reasons including O&M issues and non-utilization for a prolonged period. The government of Manipur had submitted proposal to extend BharatNet connectivity to villages and provide FTTH connections and Wi-Fi services by laying LMC on OFC of 3076 km from the 325 GPs where BharatNet OFC was connected by M/s Railtel. The Project proposal was aimed at providing 1,695 nos of FTTH connections, 400 nos of Wi-Fi Hotspots in the 325 GP areas, and to connect 83 Police Stations and 600 Anganwadi at an estimated cost of Rs 148 crores. However, DoE/MoF has granted only Rs 50 crore against the projected requirement of Rs 148 crore. The Government of Manipur has conveyed the approval (vide a letter dated 25th Jul 2023) that 50% of the works against the grant of Rs 50 Crore will be executed by M/s BSNL. BSNL is in the process of signing an agreement with the Government of Manipur for 50% of the works against Rs 25 Crore. Balance 50% of the works will be executed by State Government PSU M/s Cyber Corporation Manipur Ltd. (CCML).

5.10 In Meghalaya BharatNet OFC connectivity was established by M/s Railtel in 98 out of 967 GPs and most of this OFC connectivity got damaged due to road expansion works, O&M issues and non-utilization for a prolonged period. The government of Meghalaya had submitted proposal for laying of aerial OFC of 1,110 Km and underground OFC of 400 Km to connect 13

nos of block headquarters which are not connected on OFC and to provide 500 FTTH connections from 98 GPs where BharatNet OFC was earlier established by M/s Railtel at an estimated cost of Rs 174 Cr. However, DoE/MoF has granted Rs 50 crores against the projected requirement of Rs 174 crores. The government of Meghalaya has inspected the present conditions of BharatNet OFC connectivity to the 98 GPs and found that the OFC connectivity is badly damaged, and as per present condition, the OFC connectivity up to these 98 GPs cannot be used to extend last mile connectivity on OFC for provision of FTTH connections as was planned. The government of Meghalaya is currently in the process of finalizing the utilization of Rs 50 Cr granted under this scheme.

- 5.11 In Sikkim BharatNet OFC connectivity was established by BSNL (under Phase-I & Phase-II) in 44 out of 185 GPs and most of this OFC connectivity got damaged due to road expansion works, O&M issues and also due to non-utilization for a prolonged period. Govt. of Sikkim had submitted proposal for fiberization of all villages of Sikkim by laying OFC of 2000 Km to provide 20,000 FTTH connections and 500 Wi-Fi hot spots under all the 185 GP area in 32 blocks at an estimated cost of Rs 300 crores. However, DoE/MoF has granted only Rs 50 crores against the requirement of Rs 300 crores. The government of Sikkim has revised the scope of the project to provide OFC connectivity to all villages under 2 out of the 6 districts of Sikkim i.e. in Soreng and Pakyong at tender approved cost of Rs 120 Cr. The government of Sikkim has so far utilized Rs 50 Cr received from DoE/MoF for the works in Soreng district. Sikkim government will itself provide the balance Rs 70 Cr. for the project in these planned 2 districts. Project Implementing Agency (PIA) was selected through open tender for laying OFC on Over Head alignment. Agreement was signed in February 2023. Pole erection was completed for 20 out of 36 GPs of Soreng district, and physical works related to OFC laying in all the 36 GPs are targeted to

be completed by Oct 2023. Works for Pakyong district will be taken up after the supplementary fund allocation against FY 2023-24.

5.12 In Tripura, BharatNet OFC connectivity was established by M/s Railtel in 583 out of 1176 GPs/VCs; and a large proportion of these OFC connectivity is not operational now due to a number of reasons including O&M issues and non-utilization for a prolong period. The government of Tripura had submitted proposal for laying 6,413 km OFC for last mile connectivity from 583 nos of BharatNet GPs where OFC connectivity was established by M/s Railtel. The project was aimed at providing 5 nos of FTTH connections in government institutions, 45 nos of FTTH connections to private individuals, and 1 no of WiFi Hotspot in each of 583 GPs/VCs at an estimated cost of Rs 53.63Cr. However, DoE/MoF has granted Rs 50 crores against the requirement of Rs 53.63 Cr.

5.13 **Present status of the Project:** Govt. of Tripura has awarded the works to M/s BSNL for OFC laying and provision of 50 FTTH connections (i.e. 5 nos of FTTH connections in government institutions and 45 nos of FTTH connections to private individuals) and one Wi-Fi Hot-spot in each of 300 GPs/VCs which are operational now. BSNL Tripura has already received 300 Mini-OLTs to be installed in each of the 300 allotted GP, and 38 of them have already been integrated with BSNL networks for provisioning FTTH connections. As of date, a total of 52 FTTH connections (2 in govt. institutions and 50 in private households) have been provided under this scheme. For Wi-Fi hot spot, an agency for supply, installation and integration of equipment has already been finalized by BSNL. Work execution related to Wi-Fi hot spot is expected to start shortly and targeted to be completed by September 2023.

5.14 All states of NER (except Nagaland) submitted proposal towards the scheme and based on recommendation of USOF/DoT, DoE/MoF Government of India has allotted grants in terms of interest free loan for 50 years to the respective state government. The Government of Nagaland did not submit any proposal. State wise details of the works to be executed and services to be provided for provision of FTTH broadband and Wi-Fi hotspots with the requirement of funds submitted by state governments and funds granted by DoE/MoF are summarized in Table 5.3 below:-

Table 5.3: Brief works as per Proposal of State Government in NER and funds granted by DoE/MoF

State	Amount Proposed by State for CAPEX & OPEX (Rs Cr.)	Amount Granted by DoE/MoF (Rs Cr.)	Brief of the Works to be executed and services to be provided as per Proposal					Fund Utilised (in Rs Cr.)
			OFC (km) Planned	No of Blocks to be Conn.	No of GPs to be Conn.	No of FTTH to be Provided	No of WiFi Hotspot to be comm.	
Arunachal Pradesh	264.57	50	18550	104	1855	18550	1855	NA
Assam	307	69	4500	219	0	3000	3000	NA
Manipur	148	50	3076		325	1695	400	NA
Meghalaya	174	50	1510	13	98	500		NA
Mizoram	70.74	50	1963	31	120	205	41	NA
Nagaland	Proposal not yet submitted							
Sikkim	300	50	2000	32	181	20000	500	Rs 50 Cr
Tripura	53.63	50	6413		583	29150	583	Rs 5 Cr advance given to BSNL
Total	1317.94	669	38012	399	3162	73100	6379	

- 5.15 In light of the recent decision by the Department of Expenditure (DoE), Government of India, to divert un-utilized funds allocated for last mile Optical Fiber Cable (OFC) connectivity, the initiatives undertaken by the state governments of the North-East (NE) states are at risk. Further, USOF under its amended charter for BharatNet in phase -III will now extend connectivity to all villages also.
- 5.16 **The Authority, therefore, recommends that the Department of Telecommunications (DoT) must engage with Department of Expenditure (DoE) to extend the execution timeline for projects proposed by states under the 'Special Assistance to States for Capital Investment for FY 2022-23' scheme especially Part V which involves the scope of extending last mile connectivity using OFC. The proposed extension should be a minimum of 2-3 years, aligning with the timelines provided for similar Universal Service Obligation (USO) funded projects. This extension is crucial to ensure that the planned development efforts by the NE states are not disrupted or halted due to the shortage of time allocated for project implementation.**
- 5.17 The Authority is of the opinion that USOF already has planned for extending BharatNet connectivity to villages beyond GP under BharatNet Phase -III of its implementation plan. Thus, utilizing the Central assistance to States for laying optical fiber cable for connecting villages somewhat duplicates the efforts/ the very purpose of this allocation. The Authority during the interaction with the stakeholders have observed that most village level Government institutions like Anganwadi, Police chowki, primary health centre primary schools, veterinary centre etc. do not have the budget for obtaining connection, sustaining connection or for devices used in these institutions. It would, therefore, be prudent to use this assistance from Centre only for providing budgetary support to State Governments for funding connectivity for village level Government

institutions. While this budget assistance for Northeastern states including Sikkim is 100%, the Authority opines that for all other states having relatively healthier tele-density index compared to Northeast, this budget assistance from centre may be suitably apportioned. This funding should be used for procuring required terminal end digital communication devices like router/modem, switches, UPS, for extending connectivity and Laptop/ computers for data processing and also for paying monthly usage charges from the BharatNet point of presence.

5.18 The Authority, therefore, recommends that:

- a. Centre should provide budgetary assistance in the form of grant to the states (including those in NER) only for the purpose of assisting certain village level government institutions to obtain a BharatNet connection, to procure digital communication devices such as routers, modems, switches , UPS, PC/ Laptop and most essentially for paying the monthly usage charges for the connectivity. Certain suggestive village level institutions who can be benefactors of such central assistance should inter-alia, include :-**
 - I. Gram panchayat / village Council/Anchalik samiti Office.**
 - II. Aanganwadis.**
 - III. Primary and Middle School.**
 - IV. Primary Health Centres.**
 - V. Police Chowki.**
 - VI. Post office.**
- b. The grant should be divided in proportion of 25:75 wherein the 25% of the grant should be used by these institutions for procuring terminal end digital communication devices and 75% of the grant should be utilized for paying the cost of connectivity and monthly usage charges thereof to BSNL.**

- c. For each State BSNL should raise a consolidated monthly bill centrally to the State Government who should make payment to BSNL within 10 working days. BSNL should raise bill only for such connections where there is an incremental meter reading or data has been used during the month. The payment from State Government to BSNL should be centralized and should not be delayed on account of verification. Any verification, if required should be done post-facto or through a centralized online mechanism.**
- d. The Authority further recommends that DoT may consider the above in other states as well for utilization of BharatNet project. The percentage of grants to be given to other states may be appropriately decided by DoT.**

5.19 Project Kranti (also known as Network For Spectrum (NFS)) and ASCON-Phase-IV are two distinct Nationwide OFC Network projects being implemented for defence communication needs in hinterland and forward areas respectively, wherein almost 60,000+ km of OFC is being rolled out for exclusive use by defence forces. Owing to ab-initio deployment of defence forces along the border areas in the state, the aforementioned two OFC resources have percolated extensively into these forward regions. The continued serviceability of this network is also being ensured using microwave and satellite-based overlay to cater for disruptions occurring in terrestrial based fiber network. Further, it is also learnt that these OFC resource laid out especially in the forward regions are sufficiently abundant to cater for F by security forces. These spare OFC media/bandwidth in NFS network will not only prove to be significantly instrumental in rolling of 4G based telecom coverage in remote and border villages under ongoing '4G Saturation Scheme' but will also expedite in

rolling out these services in such targeted areas. In this regard TRAI in its recommendations on “Improving Telecom Connectivity/ Infrastructure in far-flung areas of Himachal Pradesh” dated 12.12.2022 recommended for allocation of bandwidth/ fibre to BSNL by MoD (Para 2.32(b)). The same is equally applicable for NER States.

5.20 On lines of its earlier recommendation made vide recommendations on “Improving Telecom Connectivity/ Infrastructure in far-flung areas of Himachal Pradesh” dated 12.12.2022, **the Authority recommends that DoT should take up with Ministry of Defence (MoD) for allocation of one/two pair of OFC of NFS network to BSNL for extending telecom coverage (including broadband services) to the villages located in far-flung or border areas of the NE states under BharatNet project to provide seamless connectivity to all the population (including defense personal) living near such villages. In case the same is not feasible, MoD may be approached to allocate suitable bandwidth on its existing functional OFC to extend the telecom coverage to such villages.**

5.21 In a meeting with Authority at Gangtok on Aug 2021, Hon’ble Chief Minister of Sikkim had raised concerns with respect to inadequate mobile and Internet connectivity at schools, health centres and at Homestay locations in Sikkim. The Authority had written a letter to DoT on 07.10.2022 in which certain action points were proposed for Improving Telecom Connectivity/ Infrastructure in Sikkim State (Copy of the letter is attached as **Annexure I**). Some of the action points of the letter including Creation of state-wise special project division under LSA field units with personnel having technical expertise and experience for project implementation and maintenance of BharatNet and other USOF funded projects need urgent attentions of DoT for all NE states. The authority is of the view that there is an urgent need for a dedicated team under DoT at

state level to coordinate with state government departments/State PSUs (e.g. AMTRON in Assam), BSNL, RailTel, PGCIL/TCIL, and implementing agencies for all Government/DoT/USO funded projects so that all the projects can run in synchronism. Considering above, **the Authority recommends that DoT should initiate actions on priority on all the points related to Sikkim, as mentioned in TRAI's DO Letter No M-5/9/(4)/2021-QoS dated 07.10.2022 (Copy at Annexure-I). The points mentioned in the DO letter are also equally relevant for all other NE states, and therefore should also be implemented for all NE states at the earliest.**

- 5.22 Common Service Centre (CSC)- Special Purpose Vehicle (SPV) provides a centralized collaborative framework for delivery of a large number of services to citizens through on-line platform. CSCs are a reliable and ubiquitous IT-enabled network of citizen service points connecting local population with government departments, business establishments, banks, insurance companies and educational institutions, with an impact on primary, secondary and tertiary sectors of the country's economy. CSCs are the access points for delivery of essential public utility services, social welfare schemes, healthcare, financial, education and agriculture services, apart from host of B2C services (sales and distribution) to citizens in rural and remote areas of the country. CSC is enabling the Government's mandate of a socially, financially, and digitally inclusive society. In remote and hilly areas travelling to govt offices or health centres is not only time-consuming but also geographically challenging. In addition, in remote far-flung areas of NER population living in villages do not have adequate IT infrastructure, suitable digital literacy to avail e-services on their own and stable network connectivity to every household, and therefore adequate number of CSCs are required compared to the other parts of the country.

- 5.23 In order to understand the issues being faced by village population and the persons (i.e. private entrepreneurs) delivering the services through

CSCs, TRAI interacted with few CSC franchisees. Detailed discussions were also held with the State Heads of CSC-eGovernance Services India Ltd of NE states. There are mainly three state heads of CSC, monitoring the activities of CSCs established in NE states: (i) CSC State Head Assam; (ii) CSC State Head NE, looking after six NE states; and (iii) CSC State Head West Bengal, looking after Sikkim. Each State Head is supported by a number of District Managers (DMs); each DMs looks after the activities of CSCs for one or more than one districts depending upon area and population to be served. District wise number of CSCs operational as on 31st Mar 2023 in NE States has been compiled (attached in **Annexure -V**), and a state wise summary is provided below in Table 5.4.

Table 5.4: State wise number of CSCs Operational in NE States

State	Area	Population	No of Blocks	No of GP/VC	No of CSC Operational	No of CSC per 10000 Pop.
Arunachal Pradesh	83,743	13,83,727	98	2108	374	2.7
Assam	78,438	31,205,576	217	2904	18207	5.8
Manipur	22,327	28,55,794	67	3704	1848	6.4
Meghalaya	22,429	29,64,007	46	967	1488	5.0
Mizoram	21,087	10,91,014	27	834	682	6.2
Nagaland	16,579	19,78,502	75	1280	959	4.8
Sikkim	7,096	6,10,000	33	181	246	4.0
Tripura	10,486	36,74,000	58	1176	2108	5.7
NE States	2,62,185	4,57,62,620	621	13154	25912	5.7

5.24 CSCs are providing several e-governance services of various departments of respective states and services under the central government schemes like (Aadhaar enrollment, etc). From the above Table 9.1 it is observed that on an average one CSC is serving around 1500 to 2000 population in NE states. For states like Arunachal Pradesh, Mizoram, and thinly populated districts of Assam, Meghalaya, Manipur, Nagaland, Sikkim and Tripura where villages are scattered and majority of the villages have population

less than 250, more numbers of CSCs are required as travelling from one village to nearby CSC will be challenging. Ideally, in such states/districts minimum one CSC should have been located in each and every village. However, establishment of CSCs in such thinly populated states/districts and keeping them operational have a number of challenges including financial viability i.e. recovery of establishment cost and running cost. TRAI took up the matter of allocation of space in the GP/VC premises for establishment of CSC with Dept. of IT Government of Tripura. It was informed that the Government of Tripura has given permission to set up CSCs in the GP building but for few areas GP building is not suitable for CSC due to their location being away from main market area and also due to limited opening hours.

5.25 During the interactions with CSC franchisees, following operational problems were highlighted –

- a. The villagers from nearby village travel 3-5 kms to get the services from the CSC. Most of the time they are inconvenienced due to power cut. It was suggested that if the government can give subsidy for installation of high-capacity solar panel for a backup of 3-4 hours then uninterrupted services can be given to the villagers.
- b. It was also suggested that special kind of printers are required for certain services like e-stamp paper sale, printing of plastic Aadhaar card and cost of such printers should be subsidized by government.
- c. Some CSCs are providing tele-medicine services of few private hospital and suggested that if this service can be provided for Government hospital also, then villagers will be immensely benefitted.
- d. It was informed that for Aadhaar Registration a static IP is required. Until FTTH broadband connection is present in the village, obtaining static IP is difficult. It was also informed that if government gives some incentives, then Local Cable TV operators who are providing television

services to houses will be able to provide FTTH broadband services to the CSC, to the village population, and also to government institutions in the GP area.

5.26 Following issues have been identified which are creating impediments in setting up and keeping CSCs operational in the remote areas at village level in NE States:

- a. Stable high speed Internet connectivity either through Mobile or FTTH.
- b. Initial cost (e.g. cost of Computers, Printers, UPS, etc) of setting up of CSCs.
- c. Operational cost like electricity charges, house/room rent, etc.
- d. Assured monthly income (especially in area with thinly scattered population like Arunachal Pradesh and Mizoram).
- e. Digital literacy in remote areas.

5.27 Digital inclusion efforts in remote and far-flung regions of India including the northeastern states have gained significant momentum in recent years, aiming to bridge the digital divide and ensure equal access to digital technologies and services for all citizens. The government has initiated various programs and policies to promote digital literacy, connectivity, and affordable access to the internet. Initiatives such as Digital India, BharatNet to name a few have been instrumental in providing digital infrastructure, expanding internet connectivity, and facilitating digital literacy training across the country. Additionally, partnerships with private sector entities and civil society organizations have also been fostered to enhance digital inclusion efforts. These initiatives recognize the transformative power of digital technologies in empowering individuals, fostering socio-economic growth, improving access to education and healthcare, and driving innovation. However, challenges such as infrastructure gaps, regional disparities, and socio-economic barriers still

need to be effectively addressed to ensure that the benefits of digital inclusion reach every citizen, regardless of their location or socio-economic background. In this regard, continued efforts are also underway at TRAI in the form of a parallel consultation wherein all the aforesaid challenges are being dealt with in detail. TRAI will address most of these challenging aspects of 'Digital inclusion' through release of its recommendations to the aforementioned parallel consultation soon, in near future.

Chapter-6

SUMMARY OF RECOMMENDATIONS

- 6.1 The Authority recommends that Department of Telecommunications (DoT) should engage with respective state governments of Northeastern States of India including Sikkim to harmonize their respective state RoW policy in line with “The Indian Telegraph Right of Way Rules, 2016 (RoW Rules, 2016)” and its amendments thereon at the earliest.**

[Para 4.10]

- 6.2 The Authority recommends that Department of Telecommunications (DoT) should engage with the respective state governments of the Northeastern states including Sikkim, to implement the following recommendations:**

- a. Exemption of Right-of-Way (RoW) Charges in Rural, Tribal and Hilly Regions – The Authority recommends that the DoT must actively pursue discussions with respective state governments, to secure a complete exemption of RoW charges in their rural, tribal and hilly regions for a duration of five years. This exemption will provide an incentive for TSPs and will give them a nudge to invest in the deployment of telecom projects in sparsely populated regions of Northeastern India.**
- b. Waiver of Tribal Development Charges - The Authority recommends that wherever applicable in the Northeastern states of India including Sikkim, DoT must also engage with the respective state governments, seeking a complete waiver of the additional 25% 'Tribal Development Charges' being imposed upon**

TSPs. However, it should be made incumbent upon the TSPs to ensure that any damage(s) to the private property/ public infrastructure is made good.

[Para 4.11]

- 6.3 The Authority recommends that DoT should take it up with State Governments of NER including Sikkim to immediately form the District Level Committees as already recommended vide paragraph 5.50 (iii) of its earlier recommendations on ‘Roadmap to Promote Broadband Connectivity and Enhanced Broadband Speed’ dated 31.08.2021. The meetings of these District Level Committees should be held online every month to ensure that regular monitoring and evaluation is carried out to assess the progress made in deploying telecom infrastructure and to address any issues that may arise during effective implementation of TSP/USOF sponsored telecom projects.**

[Para 4.15]

- 6.4 The Authority recommends that DoT should engage with Ministry of Environment and Forests of respective Northeastern states including Sikkim to facilitate creation of enabling provisions in their policy to expedite accord of environmental clearance to TSPs for installing Mobile towers and DG sets for tower locations.**

[Para 4.19]

- 6.5 The Authority recommends that DOT should take it up with the State Governments of NER including Sikkim for:**
- a. Providing electricity to telecom sites as a priority (within 15 days of connections request) at Utility/Industrial tariff.**

- b. Waiving off or subsidizing last mile installation charges for extending electricity connection to telecom sites in remote and hilly areas.**
- c. Respective State Electricity Regulatory Commissions (SERCs) to spell out utility tariffs which should be lower than the Industrial tariff. Telecom Service/Infrastructure Providers should be subjected to such utility tariffs only.**

[Para 4.29]

- 6.6 The Authority recommends that USOF should continue to provide full reimbursement support for installing solar backup at such USOF funded sites that do not have any power connectivity and are running on DG sets only. For sites where electric connection can be obtained from state DISCOM, the preference should be given to the same.**

[Para 4.30]

- 6.7 The Authority recommends that the DoT should take up with the MNRE and concerned state Government for coming up with a scheme (in line with Central Financial Assistance for RWA/GHS under Roof Top Solar Program Phase-II) to fund installation of renewable energy sources at all important (existing and new) strategic telecom sites in remote hilly areas immediately.**

[Para 4.31]

- 6.8 The Authority recommends that DoT/USOF should immediately provide CAPEX subsidy on viability gap funding (VGF) model through competitive bidding process for OFC backbone connectivity on ring topology (of commensurate bandwidth with add-drop facility at each BHQ) from DHQ or State Capital to all the 119 BHQ (as per Annexure-IV) which have no OFC connectivity. The Bandwidth created by the agency who wins the project on VGF model, will have to be**

mandatorily made available to all service providers on a chargeable basis. USOF should fix charges for sharing the bandwidth so created on lines it did in an earlier agreement with BSNL dated 12-02-2010.

[Para 4.43]

- 6.9 The Authority recommends providing funding through USOF for operation and upkeep of network so created initially for 5 years on service level agreement (SLA) model, beyond which a decision can be taken for further continuation of operational subsidy depending on uptake of services in these BHQs.**

[Para 4.44]

- 6.10 The Authority recommends that DoT should encourage consortium of IP-I, proposed DCIPs (refer paragraph 2.24 of TRAI “Recommendations on ‘Introduction of Digital Connectivity Infrastructure Provider (DCIP) Authorization under Unified License (UL)’ dated 08 August 2023) and TSPs to participate in the bidding process.**

[Para 4.45]

- 6.11 In line with recommendations made earlier vide Para 2.34 (a) and (b) of “Improving Telecom Coverage and Backhaul Infrastructure in far-flung areas of Ladakh” dated 24th April 2023, the Authority recommends that-**

- a. All operating TSPs in NER including Sikkim having their backhaul transmission media must provide, on fair and non-discriminatory terms and conditions, access to their spare backhaul transmission media resource capacity via lease/ rent or on mutually agreeable terms and conditions, to any eligible licensed TSP/ ISP including implementing agencies of ongoing and futuristic USOF projects, who seeks access to such resource.**

- b. A committee headed by a Senior officer from DoT field unit of the respective state/LSA level, and also involving suitable representative(s) of all operating TSPs of the NER LSAs including Sikkim be formed at the earliest to help resource pooling across TSPs for optical fibre-based ring formation, and to periodically review and resolve such representations at state/LSA level. In case of any impediment being experienced by any affected entity, a second level Committee at the DoT headquarters should be formed to periodically review all such cases and provide resolution by intervention at higher levels, if required.

[Para 4.48]

6.12 The Authority reiterates its earlier recommendation made vide paragraph 2.113 of its recommendations on 'Use of Street Furniture for Small Cell and Aerial Fibre Deployment' dated 29th November 2022 that *"the charges paid by lessee (a TSP) to any lessor TSP for use of spare backhaul media transmission resource capacity of the latter, should be reduced from the Gross Revenues of the lessor TSP to arrive at Applicable Gross Revenue (AGR) of such Lessor TSP. To implement this, a new item named as "Revenue earned from other licensed TSPs from sharing/leasing of infrastructure" should be inserted under existing license condition, named as "List of other items to be excluded from GR to arrive at AGR". This modification may be carried out in UL, NLD and ISP licenses. Also, the information collected in "Format of Statement of Revenue and License Fee" that is attached with respective authorization chapter in UL, and also in NLD and ISP licenses needs to be modified to capture information from such revenues under a separate head."*

[Para 4.50]

6.13 Considering the analysis made on the provision of satellite backhaul to mobile tower sites in remote and difficult to access locations in Northeastern states including Sikkim, the Authority makes the following recommendations:

- a. In lines with its earlier recommendations made vide para 2.40 of the Recommendations on “Improving Telecom Connectivity/ Infrastructure in far-flung areas of Himachal Pradesh” dated 12.12.2022 the Authority recommends that DoT should do a site-wise analysis of all such sites that are being run by any TSP on VSAT in remote and hilly areas of NER including Sikkim. For all such sites that are being run to serve strategic or service delivery needs of the Government, the entire operational costs of running these sites should be borne by the Government.**
- b. The Authority recommends that 100% reimbursement on account of the satellite link charges shall be made by USOF/DoT to BSNL against 4G Saturation Project for all the links for the entire duration of the maintenance agreement i.e., for 5 years in place of the present formula-based duration as made in the agreement.**
- c. The Authority recommends that subsidies on account of the satellite links shall be given by USOF/DoT to TSPs against the 4G coverage Project for the entire duration of the maintenance agreement i.e., for 5 years in place of 2 years as made in the agreement.**

[Para 4.57]

6.14 The Authority reiterates its earlier recommendation made vide paragraph 1.20 of its earlier recommendation on ‘Improving Telecom Services in the North-Eastern States: An Investment Plan’ dated 26 September 2013 that “USOF/DoT should ensure compliance to stringent timelines in USO funded projects. USOF should build in

severe penalty clauses for delays in its agreements with the agencies implementing the project. At the same time, USOF should also incentivize executing agencies in case the work is completed before the stipulated timeframe.”

[Para 4.61]

6.15 The Authority recommends that field units of DoT should be entrusted with the task of project monitoring for timely completion of the projects.

[Para 4.62]

6.16 The Authority vide its DO letter No. G-17/(41)/ 2023-NSI-I dated 14 July 2023 has already approached DoT for providing connectivity and 4G coverage at forward post locations of SSB/ITBP/Army/BSF. The Authority recommends that DoT should take up this work as a priority.

[Para 4.64]

6.17 To make the 4G saturation project more impactful, the Authority recommends that:

- a. In the first phase, in consultation with respective state governments of NER including Sikkim, priority should be given to all such uncovered/non-4G villages which have Schools, Health Centres, Police Stations, Post Offices, Ration Shops, Anganwadi Centres, etc. irrespective of the population of the village.**
- b. Next priority shall be given to all other villages with populations of 250 or more, and all the locations planned for improvement in highway 4G coverage.**

[Para 4.65]

6.18 The Authority recommends that DoT/USOF should get survey of all villages in Northeastern states including Sikkim done and additional sites should be planned and installed in such villages which have partial coverage or where part of village falls in shadow zones..

[Para 4.70]

6.19 The Authority recommends that the Department of Telecommunications (DoT) must engage with the Department of Expenditure (DoE) to extend the execution timeline for projects proposed by states under the 'Special Assistance to States for Capital Investment for FY 2022-23' scheme especially Part V which involves the scope of extending last mile connectivity using OFC. The proposed extension should be a minimum of 2-3 years, aligning with the timelines provided for similar Universal Service Obligation (USO) funded projects. This extension is crucial to ensure that the planned development efforts by the NE states are not disrupted or halted due to the shortage of time allocated for project implementation.

[Para 5.16]

6.20 The Authority recommends that:

- a. Centre should provide budgetary assistance in the form of grant to the states (including those in NER) only for the purpose of assisting certain village level government institutions to obtain a BharatNet connection, to procure digital communication devices such as routers, modems, switches , UPS, PC/ Laptop and most essentially for paying the monthly usage charges for the connectivity. Certain suggestive village level institutions who can be benefactors of such central assistance should inter-alia, include :-**

- I. Gram panchayat / village Council/Anchalik samiti Office.**

- II. Aanganwadis.**
 - III. Primary and Middle School.**
 - IV. Primary Health Centres.**
 - V. Police Chowki.**
 - VI. Post office.**
- b. The grant should be divided in proportion of 25:75 wherein the 25% of the grant should be used by these institutions for procuring terminal end digital communication devices and 75% of the grant should be utilized for paying the cost of connectivity and monthly usage charges thereof to BSNL.**
 - c. For each State BSNL should raise a consolidated monthly bill centrally to the State Government who should make payment to BSNL within 10 working days. BSNL should raise bill only for such connections where there is an incremental meter reading or data has been used during the month. The payment from State Government to BSNL should be centralized and should not be delayed on account of verification. Any verification, if required should be done post-facto or through a centralized online mechanism.**
 - d. The Authority further recommends that DoT may consider the above recommendations for implementation in other states as well for utilization of BharatNet project. The percentage of Central grant to be given to other states may be appropriately decided by DoT.**

[Para 5.18]

6.21 The Authority recommends that DoT should take up with Ministry of Defence (MoD) for allocation of one/two pair of OFC of NFS network to BSNL for extending telecom coverage (including broadband services) to the villages located in far-flung or border areas of the NE states under BharatNet project to provide seamless connectivity to

all the population (including defense personal) living near such villages. In case the same is not feasible, MoD may be approached to allocate suitable bandwidth on its existing functional OFC to extend the telecom coverage to such villages.

[Para 5.20]

6.22 The Authority recommends that DoT should initiate actions on priority on all the points related to Sikkim, as mentioned in TRAI's DO Letter No M-5/9/(4)/2021-QoS dated 07.10.2022 (Copy at Annexure-I). The points mentioned in the DO letter are also equally relevant for all other NE states, and therefore should also be implemented for all NE states at the earliest.

D.O. No. M-5/9/(4)/2021-QoS
Dated: 07th October 2022

Dear Sir,

During visit of Chairman to Sikkim, a meeting was held between Hon'ble Chief Minister of Sikkim with Chairman TRAI on 23.08.2021 wherein concern was raised with respect to inadequate mobile and Internet connectivity at villages, schools, health centers and at Home Stay locations in addition to poor progress on BharatNet project in Sikkim. Subsequently, Chairman TRAI and Chief Secretary, telecom operators & Chairman State Broadband Committee Govt. of Sikkim had conducted a detailed review meeting with all TSPs, BSNL, BBNL, PGCIL, and DoT and various secretaries of the Sikkim government.

2. A standing Sub-Committee under the State Broadband Committee, consisting of DDG (Sikkim) DoT as chairman, Advisor TRAI RO Kolkata, and Secretary (DIT), Govt of Sikkim as members, was constituted for making suggestions for improving telecom services and infrastructure in Sikkim. Since the formation of committee and pursuance by it, certain progress has been made by some of the service providers in rolling out network in Sikkim State. The report of the committee (**Annexure-I**) has several observations/deliberations and recommendations which require consideration after examining the suggestions made. However, based on the interaction of Authority with the Stakeholders and the State Government of Sikkim, the Telecom regulatory Authority has identified the issues with respect to telecom infrastructure and connectivity in Sikkim (annexed as **Annexure-II**) and has also zeroed down on certain points that will require action on behalf of DoT/USOF as well as the State Government of Sikkim. TRAI has already written to Government of Sikkim in respect of points (refer **Annexure-III**) on which action is required to be taken by them.

3. The while points on which action is required to be taken by DoT/USOF are as follows:

i. BharatNet Project related:

(a). Where the GPU OFC laying work is completed, the GPU may immediately be lit (connected to network). A mechanism to display all lit GPUs on BSNL/BBNL and USOF portal may be made so that information for those seeking connections/bandwidth on this connectivity is available. Mechanism to inform State Government for all lit GPUs should also be put in place.

(b). In many cases, GPU connectivity is not operational due to OFC damage/cuts. With merger of BBNL with BSNL, it is the understanding of the Authority that now the

maintenance of BhartNet assets will be done by BSNL or designated outsourced agency. Post this merger, the Authority has its own concern on the maintenance aspects of BharatNet assets.

- Firstly, as can be seen from the attached report, BSNL has not been able to maintain its own assets. Several of them have been shut down or waiting for repairs due to lack of funds. During the meeting with the committee, BSNL has raised requirement of several crores for maintaining its own assets. In such a situation, it is highly unlikely that the assets of BharatNet Project can be maintained by BSNL until and unless a clear-cut mechanism for financial support, accounting and maintenance is formulated by USOF/DoT. A separate escrow account for managing BharatNet/USOF funded project needs to be operated by BSNL. The cashflows of this account needs to be monitored/audited for intended use of funds.
- Secondly, the role of O&M agency, post this merger, will require to be tightly monitored. BSNL needs to put in place an effective monitoring mechanism as there are delays in maintaining the assets of BharatNet from O&M outsourced agency side. O&M is a continuous process and maintenance/restorations need to be done as soon as the fault occurs. In Sikkim, it has been informed that the agency has not even started the work.
- Thirdly, the Authority is of opinion that if the optical fibre cable maintenance issue of BharatNet Project is not sorted out, it will render the entire project ineffective. The Authority, therefore, is of the opinion that DoT/USOF should seriously think of deploying VSAT based connectivity instead of OFC in the hilly and difficult terrane where maintenance is likely to suffer due to lack of required resources. For such GPUs, where OFC was damaged and is not likely to be made available immediately, connectivity through VSAT terminals should be extended on priority. As and when the OFC connectivity is restored, these VSAT terminals can be shifted to other GPUs/villages as per the requirement based on assessment of frequency of occurrence of faults.

(c). The data submitted to Authority by various stakeholders indicate that for last two and half years, BSNL has barely made any progress as far as outcomes of the BharatNet project are concerned in Sikkim. The Authority is of the view that for monitoring progress (including maintenance aspects) of BharatNet and other USOF funded projects, DoT should exercise due control. Special project division with personnel having technical expertise and experience of project implementation and maintenance aspects should be created state-wise under LSA field units for this purpose. In bigger states, even more than one unit should be created. Government of India is spending thousands of crores on these ambitious projects which are critical for development of rural economy. There are clear gaps in overall framework of implementing USO funded projects and DoT should immediately take action, as proposed above, to rectify them.

(d). Several GPUs that were earlier declared service ready, are now not operational due to damage of OFC during smart city work at Namchi and Gangtok. BSNL has submitted the requirement of Rs. 2.23 crore to Sikkim Government for restoration of BharatNet OFC routes and BSNL copper cable which were damaged during smart city work at Namchi and Gangtok. However, despite repeated requests, as seen from the report that BSNL has yet not submitted separate cost-estimate for BSNL own cable and

BharatNet OFC. Also, the exact details of the patches where the cable has been damaged by contractors has not been provided. DoT should immediately take up with BSNL for submitting these details early. Though Authority is writing to state government of Sikkim for making efforts to recover damages from the contractor as per due process, but at the same time Authority would like DoT/USOF to examine funding of restoration work of this critical network element. DoT/USOF can subsequently adjust payments received, if any, from State Government.

(e). USOF has informed the Authority that under the "4G saturation Scheme", USOF is planning to connect 246 Villages by December 2023 on 4G through USO funding. This project will also be executed by BSNL in Sikkim. Given the implementation status of Phase-I and Phase-II of BharatNet, the Authority feels that USOF should seriously consider connecting all such villages (out of these 246 villages) that do not have OFC backhaul on Satellite medium on priority. The VSAT equipment can be taken on monthly rental model or other prevailing models suitable for this interim purpose. The VSAT connectivity can be surrendered as soon as stable OFC backhaul is made available. In future, for execution of USOF projects in far flung areas, preference may be given for satellite connectivity and overhead OFC instead of underground OFC.

ii. Connectivity of Sikkim with rest of the country

(a). PGCIL has backhaul connectivity from Sikkim (Rangpo/Ranipool) to Siliguri via two power lines via Darjeeling: (i) 132 KV to Siliguri; (ii) 400 KV to Binagudi. This is used by all the TSPs including BSNL. Authority has observed that JIO has formed a ring for its transmission network thus ensuring redundancy in Sikkim. It has been brought to the notice of Authority that two underground OFC routes of BSNL from Siliguri to Gangtok (via Darjeeling and via Kalimpong) need to be restored by re-laying some cable. This will ensure redundancy to BSNL network as well. DoT may take this up with BSNL or plan funding of these routes through USOF. This will also ensure that BSNL has adequate backhaul connectivity to Sikkim which is currently getting saturated.

iii. Connectivity of Districts and BHQs

(a). PGCIL is constructing the power line and laying OFC (i.e. OPGW) along the power line on behalf of Sikkim Power department up to Block level. If Sikkim Govt. allocates 2 fibres from DHQ to respective Blocks, then PGCIL will be able to provide adequate bandwidth (e.g. 10 Gbps and above) to all TSPs. In case there is delay on part of BSNL to connect BHQs/GPUs, DoT/USOF may plan to take connectivity from PGCIL, wherever feasible, and lit BHQs/GPUs as an immediate measure.

iv. Others

(a). As per licensing provisions, TSPs are supposed to maintain waiting list of each and every demand raised to them. The Authority in its recommendations on "Roadmap to Promote Broadband Connectivity and Enhanced Broadband Speed" dated 31.08.2022 has observed that a proper assessment of demand cannot be done unless the demand is registered properly. After due deliberation, the Authority had recommended that the licensee should declare the availability of fixed line broadband services in specific geographic areas on GIS map accessible to public through its website. It was also recommended that in each Telecom Circle/Metro, service providers should use all verifiable means of communication like the Website, App, Interactive Voice Response (IVR) system, text message etc. to register demand for fixed line connectivity and

maintain a transparent, open to inspection, waiting list. DOT should ensure that implementation of this recommendation. In addition, DoT may explore to put in place a mechanism by which DoT's LSA field units get the data of waiting list from all TSPs/ISPs and analyse that on monthly basis.

4. In view of above, it is requested that action with regard to point at para 3 above may please be initiated at the earliest for improving telecom infrastructure and connectivity in state of Sikkim.

With regards,

Encl: As above

Sub: Report of the Sub-Committee for Improvement in the Coverage and Quality of Telecom Services in Sikkim

1. Introduction & Background:

A meeting was held between Chairman TRAI and Chief Secretary & Chairman State Broadband Committee Govt. of Sikkim on 23rd Aug 2021 to review the issues affecting the quality of Telecom services in Sikkim with emphasis in the City of Gangtok. Prior to this meeting Chairman TRAI and Chief Secretary (CS) Govt. of Sikkim had a brief meeting with Hon'ble Chief Minister (CM), Govt. of Sikkim. Hon'ble CM raised concern with respect to inadequate mobile and Internet connectivity in important sectors like **education** (i.e. connectivity at schools), **health** (i.e. connectivity at health centres), and **tourism** (e.g. connectivity at Home Stay locations). Hon'ble CM further emphasised that major part of the economy of Sikkim is dependent on tourism, and tourists are now preferring to stay in Home Stay's which does not have adequate Internet connectivity. Hon'ble CM requested Chairman TRAI to help in the improvement of mobile and Internet connectivity in Sikkim and especially in Schools, Health Centres, and for Home Stay locations. MOM is available in **Annexure-1**

Subsequent to the meeting with Hon'ble CM Govt. of Sikkim Chairman TRAI and Chief Secretary & Chairman State Broadband Committee Govt. of Sikkim had a detailed review meeting with all TSPs, BSNL, BBNL, PGCIL, and DoT. CGM BSNL, CGM BBNL, CTO JIO, and representative of Airtel made brief presentation and discussed the issues which are creating bottlenecks in the establishment of network infrastructure, which in turn affecting quality of mobile and Internet services in City as well as in remote areas.

CGM BSNL informed that during road widening/drain repair works underground copper/OFC cables in Gangtok/Namchi City got damaged and as a result, the landline and broadband services provided to Govt. Offices and important organisations are getting interrupted frequently. BSNL does not have sufficient resources (including manpower, funds and materials) to lay cable afresh, and requested that DoT/USOF may provide some fund to restore the underground OFC networks especially in Gangtok and Namchi Cities. He has also informed that around 60km underground OFC of BharatNet got damaged in Namchi and Jorethang during constructions of Smart City works and, around Rs 5.5Cr is required for re-laying the OFC and providing BharatNet OFC connectivity to Gram panchayat Unit (GPUs) in these 2 Blocks.

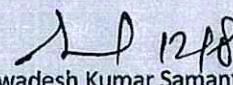

CGM BBNL informed that even though OFC laying were completed in 22 out of 52 GPUs & 9 BHQs in 9 Blocks of BharatNet under Ph-I, OFC of most of these GPUs & BHQs are now damaged in many places, and as a result not a single GPU can be made operational. CGM BBNL also informed that 5 GPUs out of these 22 have been handed over to CSC-SPV in Sikkim for restoration of OFC, and start services but CSC-SPV is taking time in restoring the connectivity. CGM BBNL also informed that revised estimate for BharatNet Ph-II (Rs96.28 Cr as CAPEX+ Rs14.46 Cr as OPEX for 3 years) has been approved by

Shri N. Murali Krishna
DDG Sikkim, WBLSA, DoT
Chairman

Shri Yogendra Sharma
Secretary IT, Govt. of Sikkim
Member

Dr. Swadesh Kumar Samanta
Advisor, TRAI, RO Kolkata
Member

DoT/USOF in May 2021. He further informed that BSNL is implementing the connectivity in 122 GPUs and 24 BHQs. CGM BBNL also informed that BSNL exchanges in around 9 Blocks are now non-operational and Sikkim Govt. may kindly allot space in these blocks for establishing connectivity to GPUs. **CGM BBNL also informed that 13 GPUs (i.e. 3 from Ph-I and 10 from Ph-II) are being connected using Satellite, as OFC connectivity in these GPUs is not feasible. Annexure-2**

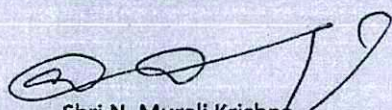

GM PGCIL Kolkata made a brief presentation giving the backhaul connectivity from Sikkim (Rangpo/Ranipool) to Siliguri via two power lines via Darjeeling: (i) 132 KV to Siliguri; (ii) 400 KV to Binagudi. It is learnt that all the TSPs including BSNL is now using the bandwidth from PGCIL for carrying the voice and Internet traffic from Sikkim. GM PGCIL informed that connectivity to all DHQs and important locations like Melli, Ravangla has been established using power line of Govt. of Sikkim and PGCIL is in the process of upgrading the equipment installed at DHQs to provide adequate bandwidth (e.g. 10 Gbps and above) to all TSPs including BSNL. He has also informed that PGCIL is constructing the power line and laying OFC (i.e. OPGW) along the power line on behalf of Sikkim Power department up to Block level. He requested that if Sikkim Govt. allocate 2 fibres from DHQ to respective Blocks and then PGCIL will be able to provide adequate bandwidth (e.g. 10 Gbps and above) to all TSPs including BSNL. This will allow high speed connectivity to all GPUs using BharatNet. In this regard Advisor TRAI Kolkata informed that Govt. of Sikkim had already allotted space (in 2012) to BSNL in all the BHQs.

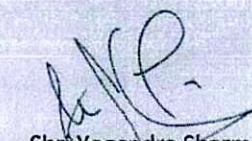

CTO JIO informed that State Govt. is extending helps in establishing the networks but still there are issues which are affecting the rollout of the infrastructure. Major issues which are being faced by most of the TSPs are:

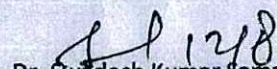

- a. Delay in permission for OFC laying by Forest Department/ Defence Organisations
- b. Delay in getting NoC for establishing new sites
- c. Delay in connection of electricity for the new sites
- d. Restriction in the movement of skilled manpower from Siliguri/Kolkata to Gangtok and other places

DDG (Sikkim) DoT WB LSA informed that backhaul connectivity from Sikkim to Siliguri need to be upgraded by BSNL as traffic has reached to the deployed capacity. Additionally, he emphasised that as all TSPs are using the backhaul connectivity from PGCIL, Gangtok will be isolated if any failure in PGCIL networks happen even for an hour. **He suggested that 2 nos of underground OFC routes of BSNL from Siliguri to Gangtok (via Darjeeling and via Kalimpong) need to be restored by re-laying, and if alternate funding sources to be explored. I.e USOF/any other source.**

DDG DoT also emphasised that rollout of BharatNet is already delayed by more than 4 years and both BSNL and BBNL should post exclusive manpower at DGM/ GM level at Gangtok to monitor, coordinate, and expedite the completion of the project. He also emphasised that all TSPs must post adequate manpower for day to day O&M activities and for resolving network issues in Gangtok and other District HQs.

Shri N. Murali Krishna
DDG Sikkim, WBLSA, DoT
Chairman

Shri Yogendra Sharma
Secretary IT, Govt. of Sikkim
Member

Dr. Swadesh Kumar Samanta
Advisor, TRAI, RO Kolkata
Member

Issues as informed above by respective stakeholders were discussed in detail by Chief Secretary Govt. of Sikkim and Chairman TRAI. **After detailed deliberations a standing Sub-Committee under the state Broadband Committee** was constituted consisting of DDG (Sikkim) DoT as chairman, Advisor TRAI RO Kolkata, and Secretary (DIT), Govt of Sikkim as members. The sub-committee was constituted to examine all the issues noted above and submit a comprehensive plan for the infrastructure development for improvement in the Telecom (i.e. Telephone, Internet and Television) services in the state of Sikkim.

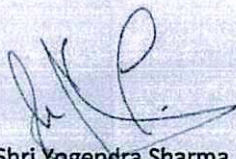

2. Tasks Assigned to the Sub-Committee:

Following tasks and line of actions are decided for the Sub-Committee:

- a. The Sub-Committee shall take the inputs from BSNL, BBNL, PGCIL and other TSPs/ISPs/MSOs and submit the recommendation including required funding from USOF/DoT within 20 days' time.
 Sub-Committee to recommend immediate requirements of Internet connectivity for online education in 500 out of 800 Schools, in all Police Stations, Health Centres, and Gram Panchayats in the state of Sikkim.
 Sub-Committee should give priority for improving Internet connectivity (either using Fixed Wireless Access, Wi-Fi, or through 4G to the providers of **Home-Stay** to boost the tourism industry in Sikkim.
 Sub-Committee should make a recommendation for short- term goals to be achieved in 6 months, intermediate-term goals to be achieved in 12 months, and long-term goals to be achieved in 3 years (including recommendations for infrastructure development in line with PPP model).
- b. The reportedly damaged cable of BharatNet OFC during road construction/Smart City works is to be quantified after necessary test/examination by a committee with members from BBNL, BSNL and USOF/DoT. USOF/DoT shall set-up a committee and may recommend additional expenditure for materials/manpower charges to re-lay of OFC as per established norms of project works in BSNL/BBNL/DoT.
- c. BBNL/BSNL and USOF/DoT should re-examine the present status of OFC connectivity/availability of bandwidth from Block to DHQ/Gangtok and take a fresh decision for laying of further OFC in the pending Blocks. **Considering above Chief Secretary is of the strong opinion that in line with other North Eastern States (like Arunachal Pradesh) BBNL should immediately provide internet connectivity to all the GPUs through satellite where at present 4G coverage is not available.** As and when BharatNet connectivity on OFC will be made available, these satellite connectivity to be extended to uncovered villages based on priority decided by Govt. of Sikkim and DDG (Sikkim) DoT WB LSA.
- d. BBNL/BSNL should ensure to establishing the Internet Connectivity to GPUs where OFC laying has already been completed without further delay.
- e. BBNL/BSNL should submit Block wise target date for starting laying/re-laying of OFC and establishing Internet Connectivity of for all the 31 Blocks to the Sub-Committee latest by 10th Sep 2021.

Shri N. Murali Krishna
DDG Sikkim, WBLSA, DoT
Chairman

Shri Yogendra Sharma
Secretary IT, Govt. of Sikkim
Member

Dr. Swadesh Kumar Samanta
Advisor, TRAI, RO Kolkata
Member

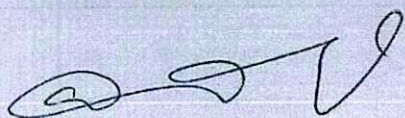

- f. BBNL/BSNL should submit the details of OFC damaged during Smart City works and estimated cost for re-laying of OFC and establishing Internet Connectivity for all the 22 GPs where OFC was damaged to the Sub-Committee latest by 10th Sep 2021.
- g. BSNL should submit details of underground OFC/Copper cable damaged in Gangtok and estimated cost and time lines for re-laying of OFC and establishing Internet Connectivity to important Govt. Offices where cable was damaged to the Sub-Committee latest by 10th Sep 2021.
- h. PGCIL should submit the detailed permission/resources required from Govt. of Sikkim (e.g. 2 no's of Fibre on lease from OPGW laid along the state power line) for providing adequate bandwidth from Gangtok, and other DHQs to individual Blocks to all TSPs including BSNL.
- i. All TSPs should submit proposal for sharing of tower of other TSPs (if any required) to DDG (Sikkim) DoT WB LSA latest by 10th Sep 2021
- j. All TSPs should apply for required permission immediately (e.g. NoC for new tower, emergency pass for permanent employees posted in Sikkim) /resources to Secretary (DIT) Govt. of Sikkim and a consolidated report shall be submitted monthly to DDG (Sikkim) DoT WB LSA for reviewing by issues by the Sub-Committee.
- k. Sub-Committee shall review the progress in the infrastructure development by all TSPs including BSNL, BBNL, and PGCIL and appraise the Chief Secretary & Chairman of State Broadband Committee in Sikkim on a monthly basis.
- l. All TSP's to ensure the periodic checks of all types of services provided to various departments of Govt of Sikkim and resolve issues if any without loss of time.

3. Activities, Observations and Reports of the Sub-Committee:

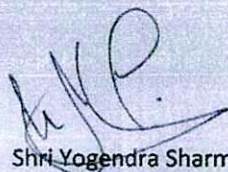

Sub-Committee held detailed review meetings on three occasions on 07.09.2021, 11.03.2022 and 12.07.2022 with all TSPs, BSNL, BBNL, and PGCIL.

3.1 First meeting of the sub-committee was held at Kolkata:

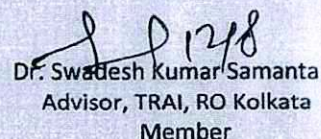

The first detailed review meeting of the sub-committee was held on 7th Sep 2021 in the conference hall of TRAI Regional Office at Kolkata in presence of CGM BSNL WBTC (looking after the charge of Sikkim), CGM BBNL Kolkata (in-charge of Sikkim), GM PGCIL, and CTOs of all the other 3 TSPs, and senior Officers of BSNL, PGCIL, and senior Executives of all 3 TSPs. Additional Director (DIT) Govt. of Sikkim Shri Sonam Wangdi represented Secretary (DIT) Govt. of Sikkim and participated in the meeting on-line. All TSPs, BBNL and BSNL was asked to submit para wise report based on minutes of the meeting held at Gangtok in Aug 2021. All TSPs were also asked to submit the requirement of bandwidth at Block level to PGCIL. MoM of the first Sub-Committee meeting is attached as **Annexure-3**

Shri N. Murali Krishna
DDG Sikkim, WBLSA, DoT
Chairman

Shri Yogendra Sharma
Secretary IT, Govt. of Sikkim
Member

Dr. Swadesh Kumar Samanta
Advisor, TRAI, RO Kolkata

3.2 Follow up meeting was held in TRAI Delhi vide Letter No. M-5/9/(4)/2021-QoS dated 26.11.2021

As a follow up action a detailed review meeting was held at Delhi held on 2nd Dec 2021 under the chairmanship of Chairman TRAI. Meeting was attended by CMD BSNL, and CMD BBNL to discuss progress on action plans for improving Telecom Services in the State of Sikkim.

- (i) At the outset, Secretary TRAI welcomed Chairman and participants in the meeting and set forth the context of the meeting.
- (ii) Chairman TRAI in his opening remarks emphasised need for reliable and good quality of the services in Sikkim and its adjoining parts of Bengal namely Siliguri, Kalimpong and Darjeeling. He also raised concern about non availability of any kind of telecom services in remote villages and locations having local habitants and defence establishments and thereby denying basic needs of connectivity to individuals and the personnel deployed at border posts and at difficult locations.
- (iii) Chairman further emphasised need for BSNL to be more proactive, not only in terms of continuity of its services provisioned to various state and central Govt Offices but also to expand their reach to meet current demands and be ready for futuristic challenges of 5G and beyond.
- (iv) On BharatNet project progress and functioning, Chairman conveyed his displeasure and asked both the CMDs BSNL & BBNL to synchronise various activities, not only to complete pending works of Phase-1 & 2 in time but also to ensure smooth functioning with adequate utilization of the Bharatnet assets.
- (v) CMD BSNL informed that all OFC laying contractors are now agreed to start laying of PLB/OFC but facing issues to get labours to Sikkim from outside. However, he said that all out efforts are made for making additional 12 GPs/BHQs of Phase 1 Service Ready by Jan 2022.
- (vi) With regard to BharatNet Phase 2, CMD BSNL told that required materials like PLB, Over Head ADSS Cable, U/G OFC required for completion of Phase 2 have been arranged and getting transported to Sikkim. He said that all out efforts are made for making additional 96 GPs/BHQs of Phase 2 Service Ready by Jan 2022.

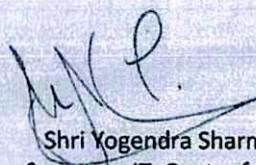

3.3 Second Sub Committee meeting held at Kolkata.

The 2nd detailed review meeting of the sub-committee was held on 11th March 2022 at Kolkata. At the outset Director Sikkim, DoT welcomed all the participants. Meeting was chaired by DDG DoT Sikkim, WB LSA, Advisor TRAI RO Kolkata along with senior officers of TRAI RO Kolkata was present in the meeting. Shri Wangdi, Addl. Director, Dept. of IT, Govt. of Sikkim joined online. Representatives from TSPs, BBNL and PGCIL joined the meeting. Brief of the main points discussed are:

- (i) Shri Wangdi, Addl. Director, Dept. of IT, Govt. of Sikkim informed that Sikkim State RoW portal is ready and it has been integrated with Centralized RoW portal of Govt. of India. Now, TSPs need to file application through RoW portal only.

Shri N. Murali Krishna
DDG Sikkim, WBLSA, DoT
Chairman

Shri Yogendra Sharma
Secretary IT, Govt. of Sikkim
Member

Dr. Swadesh Kumar Samanta
Advisor, TRAI, RO Kolkata
Member

- (ii) Airtel/VIL requested DDG DoT to help in regularization of tower in the residential premises of Hon'ble CM. Matter was discussed in detail and it was decided that matter will be taken up with State Broadband Committee.
- (iii) Shri Wangdi informed that RJIL signed agreement with state Govt. for providing coverage in GPUs. RJIL signed agreement for 134 sites but progress is not good. RJIL was asked to furnish progress/status report for all 134 sites based on this further course of action would be recommended. In the meanwhile, Other TSPs may approach Sikkim State Govt. for remaining 50 GPU locations.
- (iv) Power Department issue: Mr. Wangdi requested the TSPs to apply for the electricity permission in bulk with the knowledge of Secretary, Power department to expedite the process of approval. TSPs informed that PGCIL is demanding huge amount for renting out their OFC Bandwidth. Dr. S. K. Samanta, urged TSPs to get clarification from PGCIL whether they can provide bandwidth at reasonable price. Dr. Samanta also asked the TSPs to inform PGCIL in writing whether they need PGCIL BW or not.
- (v) DDG Sikkim stated since BW is perishable item and hence PGCIL may adopt flexible approach in order to utilize already created BW capacity. Accordingly, PGCIL should think of providing the BW at reasonable rate.

MoM of the 2nd Sub-Committee meeting is attached as Annexure-4

In addition to above two detailed review meetings, sub-committee members individually co-ordinated with TSPs, BSNL and BBNL on a number of occasions and received reports at regular interval on the development of infrastructure during the period of review by Sub-committee. In spite of regular persuasion with BBNL and BSNL and commitment given by CMD BBNL and CMD BSNL in the meeting with Chairman TRAI, very little progress has been made by BBNL and BSNL on the completion of BharatNet in Sikkim. Additionally, no firm targets could be given by BBNL and BSNL on the completion of BharatNet in Sikkim. However, TSPs (especially RJio and Airtel) and PGCIL made some progress in the infrastructure development in Sikkim.

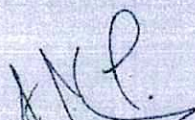

3.4 The third detailed review meeting of the sub-committee was held at Kolkata.

3rd sub-committee meeting was held on 12th Jul 2022 at Kolkata and the following deliberations have taken place:

- i. DGM, BSNL Sikkim submitted that services have been provided in 3 GPUs in Passingdang Block under BharatNet Ph-II as on 30.06.2022. BSNL was asked to provide month-wise target up to March 2023 for commissioning and utilisation plan for all the pending GPUs/BHQ for both BharatNet Ph-I and Ph-II. In spite of repeated persuasions through mail and phone call, BSNL did not submitted any report so far. However, GM BSNL verbally informed that entire BharatNet project is being re-examined to execute the project through over-head instead of underground. Since decision is pending, exact time-frame for completion of project cannot be ascertained as of now.

Shri N. Murali Krishna
DDG Sikkim, WBSA, DoT
Chairman

Shri Yogendra Sharma
Secretary IT, Govt. of Sikkim
Member

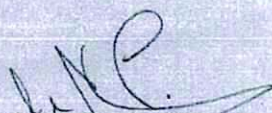

Dr. Swadesh Kumar Samanta
Advisor, TRAI, RO Kolkata
Member

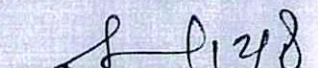

- ii. PGCIL was asked to provide Block-wise availability of Bandwidth as on date and submit plan for establishing connectivity for the remaining blocks for FY 2022-23. PGCIL has submitted that in 16 Blocks they can provide vide **Annexure-5**
- iii. All TSPs were asked to provide Block-wise availability of OFC as on date and submit plan for OFC connectivity (including hiring bandwidth/OFC from PGCIL and other TSPs) for FY 2022-23. TSPs have informed that at present they do not have any plan to hire bandwidth from PGCIL at Block level.
- iv. All TSPs were asked to provide site-wise availability of OFC as on date and plan for fiberisation for remaining sites for FY 2022-23. TSPs are yet to provide complete information as desired.
- v. All TSPs were asked to provide infrastructure development plan including addition of new sites, laying OFC Km and upgradation of the existing sites (e.g. addition of 4G in existing sites, enhancement of bandwidth in the existing sites etc.) for FY 2022-23. TSPs submitted most of the information. Brief is placed in para e(i).
- vi. All TSPs were asked to submit site-wise issues including delay in power connections affecting the commissioning of new sites and upgradation of infrastructure in existing sites. TSPs are yet to submit complete information as desired.
- vii. All TSPs were asked to submit the list of existing sites working only on DG and issues preventing to obtain regular electric supply. TSPs are yet to submit complete information as desired.
- viii. All TSPs were asked to post senior level person (Nodal Officers or equivalent) at Gangtok for day-to-day coordination with DoT and State Govt. Departments. Respective CEO/CTO should provide a letter mentioning Name and Designation of such persons posted at Gangtok. Airtel Nodal officer has informed that one senior level personnel has been posted in Sikkim. VIL and RJIL are yet to submit in writing.
- ix. As desired by State Govt. authority, all announcement provided through mobile network/Landline network shall invariably be in local language in addition to Hindi and English. This is yet to be implemented.
- x. All TSPs have been asked to undertake physical survey and submit availability of 3G and 4G services in all 1300 schools and 1027 Homestays locations and submit report by 12.08.2022. Lists of schools and homestays have already been provided. TSPs are being perused and report will be examined by the sub-committee.
- xi. All TSPs were directed to undertake periodic and routine checks of connections and quality of service provided to all Govt. Departments and submit report on quarterly basis. TSPs are being perused and report will be examined by the sub-committee in the month of October 2022.
- xii. Immediate connectivity to GPUs, Police Stations and Health Care Centres:
 TRAI has identified 40 GPUs where 3G/4G coverage is poor. Additionally, RDD, Govt. of Sikkim has verified the internet connectivity in GPUs and in 50 GPUs video call is not possible or possible only through one TSP. There are 3 Police stations and 79 Health Care Centres where 3G/4G signal is either not available or available only from 1 or 2 TSPs. It was decided that internet connectivity to these 90 Number of

Shri N. Murali Krishna
DDG Sikkim, WBLSA, DoT
Chairman

Shri Yogendra Sharma
Secretary II, Govt. of Sikkim
Member

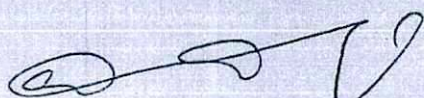

Dr. Swadesh Kumar Samanta
Advisor, TRAI, RO Kolkata
Member

GPUs and in 82 number of police stations and Health Centres may be provided through satellite connectivity as an interim measure. The Chief Secretary, Govt. of Sikkim may be requested to recommend to DoT to allot 172 of satellite connectivity as an interim measure to the Secretary Telecom, Govt. of India.

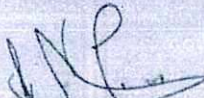

- xiii. With regards to restoration of existing BSNL OFC route between Gangtok and Siliguri, it was decided that BSNL should submit plan by 12.08.2022 along cost involved for the restoration of the routes for further examination of the committee and recommendations. BSNL will be pursued and report will be examined by the Sub-Committee.
- xiv. It was discussed and decided that RailTel shall be asked to provide their plan for providing OFC cable /bandwidth connectivity along the newly constructed railway route from Siliguri to Rangpo. If this route is established then Sikkim will have stable alternative connectivity from PGCIL and RailTel. Based on the readiness of the service TSP's may explore to hire from RailTel. RailTel is being pursued and report will be shared with The TSPs.
- xv. BSNL has submitted the requirement of Rs. 2.23 crore for restoration of BharatNet OFC routes and BSNL copper cable which were damaged during smart city work at Namchi and Gangtok. BSNL should submit separate cost-estimate for BSNL own cable and BharatNet OFC. Sub-Committee decided that BSNL and BBNL should undertake joint physical inspection and submit details of locations for BharatNet OFC, route Km damaged in each location along with copy of the Acceptance Testing report for further examination by Sub-Committee and submission of recommendation. **Annexure-6**
- xvi. BSNL has submitted requirement of Rs. 45 crores for upgradation of network in Gangtok City broadly for following head: as in **Annexure-7**
 - ❖ Cost of Broadband equipment: 1.96 crore
 - ❖ Cost of OFC equipment: 1.34 crore
 - ❖ Cost of OFC routes (Total 119 Km): 13.32 crore
 - ❖ Cost of GSM sites OFC network (90 Km): 10.07 crore
 - ❖ Cost of mobile equipment: 18.59 crore

It has been decided by Sub-Committee that DoT/USOF may be requested to provide fund for cost of OFC equipment, cost of OFC route (total 209 Km) amounting Rs. 24.73 crore subject to the condition that OFC equipment and OFC route created from this fund will be shared with all TSPs and others at a subsidised rate as decided by USOF/DoT.

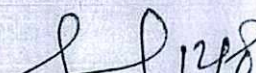

- xvii. BSNL requested for Rs. 4.00 Crore per year as BW charges to be paid to PGCIL for connecting to District Hq as all the OFC routes are working in linear mode and districts are getting isolated frequently due to outage of the route. It has been decided by the Sub-Committee that the Bandwidth charges to be paid to PGCIL is the operational requirement of BSNL and as such Govt. of India/USOF cannot be requested for such funds. Letter is attached as **Annexure-8**

3.5 A brief of the development by TSPs and PGCIL during the period of review by the sub-committee is given below. Telecom Infra development by TSPs during the period of review

TSP wise details of Mobile Networks and Mobile customers in Sikkim:

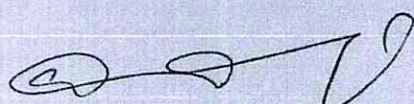

As on June 30, 2022, Airtel has 4G nodes in 209 sites out of existing 216 sites. In addition to this, it has also installed Low-Power 4G Nodes [LP-BTS] at 11 locations. However, Net 4G expansion at sites during the period is two [2] and 2 new LP-BTS.

- RJIO added 62 new 4G sites since August 2021 till June 2022 out of planned 78 4G sites. Moreover, RJio has also added 10 Small Cells [4G] in Sikkim State. RJio has laid 99 Km of OFC and fiberized additional 26 sites in this period. However, RJio has a plan to complete 204 km OFC (in WIP) and further 300km OFC after getting permission from Forest and other state govt. departments.
- VI has expanded its 4G coverage at 12 existing sites and at one new site. Overall 4G count increased by 13. However, one site at CM Bungalow had been dismantled during this period thereby shutting down one 2G and 3G nodes. It has been able to fiberize only one site during the period. Vodafone-Idea has submitted that it will implement LTE in 900 MHz at Gangtok Town in FY 2022-22 at 150 Sites and has a plan to lay 6.5 Km optical fibre.
- No significant progress has been made by BSNL in development of Mobile Telecom network during this period.

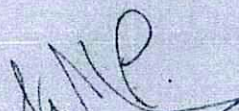

TSP	No of Sites		Active Mobile Subscribers	
	As on 31.07.21	As on 30.06.22	As on 31.07.21	As on 30.06.22
AIRTEL	219	216	245,527	263,518
BSNL	97	95	53,268	36,777
RJIO	243	305	279,671	281,701
VIL	215	215	334,160	322,510
TOTAL	773	831	912,626	904,506

3.6 Telecom Infra development by Powergrid Corporation of India Ltd. (PGCIL) during the period of review

PGCIL has laid its own OFC from Siliguri to Gangtok (with its PoP located at Ranipool) on power line on two different routes. PGCIL is also laying OFC along the power line of the Sikkim State Govt. to all BHQs. As on Jun 2022, PGCIL is ready for providing up to 1 TB bandwidth to each TSPs in 16 BHQ in 2-4 weeks. PGCIL is having a plan to complete the OFC laying works for the remaining 15 BHQs by Dec 2022. All TSPs were informed

Shri N. Murali Krishna
DDG Sikkim, WBLSA, DoT
Chairman

Shri Yogendra Sharma
Secretary IT, Govt. of Sikkim
Member

Dr. Swadesh Kumar Samanta
Advisor, TRAI, RO Kolkata
Member

several times to inform the requirement of bandwidth at BHQ level but all the TSPs have informed that they do not have any plan to hire bandwidth from PGCIL at Block level.

3.7 BharatNet Progress by BBNL and BSNL during the period of review

As directed by Chairman TRAI and Chief Secretary Govt. of Sikkim, Sub-committee spent much time for discussions, meetings, and report collection both from BSNL and BBNL. Sub-Committee held two detailed meetings: first one in Sep 2021, and the 2nd one in Mar 2022. Chairman TRAI also held a meeting with CMD BBNL and CMD BSNL at Delhi in Dec 2021 and CMD BSNL and CMD BBNL jointly agreed for targets on completion of additional 12 GPs & BHQs of Phase-1, and 96 GPs & BHQs of Phase-2 by Jan 2022. However, progress till Jun 2022 is extremely poor compared to targets agreed jointly by CMD BBNL and CMD BSNL in the meeting with Chairman TRAI at Delhi. During the period of review by the Sub-Committee, only 3 GPs of Phase-1 & 9 GPs of Phase-2 has been connected on Satellite by BBNL. Achievement of BSNL in Phase-1 is zero against the targets of 12 GPs & BHQs. BSNL connected only 3 GPs of Phase-2 on OFC against the targets of 96.

Till date BSNL could not provide any firm targets for completion of BharatNet Phase-1 and Phase-2. However, GM BSNL verbally informed that entire BharatNet project is being re-examined to execute the project through over-head instead of underground. Since decision is pending, exact time-frame for completion of project cannot be ascertained as of now.

4. Recommendations of the Sub-Committee:

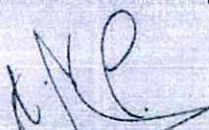

4.1 Connectivity to GPUs, Police Stations, Health Centres: There are 721 unique mobile tower in Sikkim; 3G/4G services are available in most of these sites (except few those with Satellite backhaul). Locations of these 4G sites are mapped with 176 GPU locations (planned to be connected by BharatNet OFC), and based on geographical locations of 3G/4G sites it is estimated that there are around 50 no of Gram Panchayats, and adjoining villages where mobile coverage (especially 4G) may not be adequate. RDD Department Govt. of Sikkim also carried out physical measurement on the availability of adequate Internet services in GPU, and compiled a list of 50 GPU where mobile Internet connectivity is not adequate. Based on these two lists a combined final list of 90 GPUs is made. The list of 90 GPs/BACs may be sent to DoT/USOF with a request to plan for immediate Internet connectivity on Wi-Fi via Satellite as BharatNet OFC laying by BBNL/BSNL is not progressing as expected. In addition, in 3 police stations and in 79 health care centres connectivity is not adequate. ***Sub-Committee recommends that DoT/USOF shall be requested through the Chief Secretary and Chairman, SBC for providing 172 Satellite terminals to provide good internet facility as an interim/immediate measure to 90 GPUs/BACs, 3 Police Stations and 79 Health Center's. Complete list is available Annexure-9***

4.2 Connectivity to Schools:

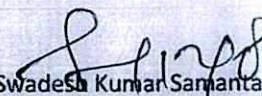

There are around 1300 schools in Sikkim; committee observes that 4G coverage in most of these schools and adjoining areas is not adequate. Govt. of Sikkim has given in

Shri N. Murali Krishna
DDG Sikkim, WBLSA, DoT
Chairman

Shri Yogendra Sharma
Secretary IT, Govt. of Sikkim
Member

Dr. Swadesh Kumar Samanta
Advisor, TRAI, RO Kolkata
Member

principle approval (as per second SBC meeting minutes dated 30.09.2021) consent to install towers in the school premise subject to proper fencing and other safety measures are ensured. Further space and power may be allotted at free of cost by respective authorities of Govt. of Sikkim in all such locations for installation of telecom facilities. For this purpose, the funding arrangement may have to be from USO.

Sub-Committee recommends that respective school authority under the supervision of designated officer of government of Sikkim shall carry out physical verification on the availability of Internet/4G coverage at individual locations. TSPs have been provided the list of schools for submitting present coverage status. Sub-Committee will examine the report and submit the recommendation. List is available in Annexure-10

4.3 Connectivity to Home-Stay locations:

A List of total 1027 numbers of Home-stays was obtained from Tourism Department, Govt. of Sikkim. However, due to want of Lat-Long information, TSPs have not provided the telecom coverage status in those Home-Stays. Dept. of IT, Govt. of Sikkim has been requested to co-ordinate with the Tourism Department to provide the Lat-Long information of the Home-Stay locations so that TSPs can be asked to provide the present coverage details for further examination by the Sub-Committee. List is available in Annexure-11

4.4 Connectivity to uncovered villages:

As per the DOT Hq instructions vide e-mail dated 31.12.2021, DOT Sikkim and Govt of Sikkim represented by IT Department has sent the list of 359 villages where coverage is less than 60% of habitable area. List is prepared based on the criteria that if a village is having total number of BTS (2G/3G/4G of all TSPs combined together) of 10 or less, then the coverage is less than 60% of habitable area. This is a broad-based criterion; list enclosed as Annexure-12. DoT Sikkim, WB LSA has already submitted the list to DOT Hq on 20.01.2022. Sub-Committee is of the opinion that Chief Secretary, Govt. of Sikkim and Chairman, State Broadband Committee may request Secretary DoT to accord approval on priority. Actual requirement can be finalised after physical survey once in-principal approval is received from DoT.

During the meeting held on 03.08.2022 with Addl. Secretary (Telecom), Govt. of India, it was confirmed that for the state of Sikkim 308 villages have been approved to take up survey works as USO norms and instructions list is available in Annexure-13

4.5 Completion of BharatNet – Both Ph-I and Ph-II

Progress of rollout of BharatNet is extremely poor even after a detailed review meeting with CMD BBNL and CMD BSNL with Chairman TRAI in Dec 2021. Sub-Committee strongly recommend to short close/ reduce the scope of the Bharatnet project depending on following:

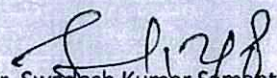

- (i) As per decision taken in the 3rd State Broadband Committee Meeting, BSNL/BBNL may explore any other mode of work execution to expedite the work

Shri N. Murali Krishna
DDG Sikkim, WBSA, DoT
Chairman

Shri Yogendra Sharma
Secretary IT, Govt. of Sikkim
Member

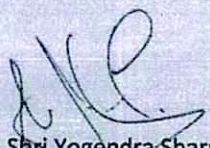

Dr. Swadesh Kumar Samanta
Advisor, TRAI, RO Kolkata
Member

on fast track mode. If no other option is available, then project may be short-closed /reduce the scope in Sikkim. In the event, the decision has been taken by the competent authority to short close BharatNet, then the remaining GPUs which are short closed, can be connected through PPP model or by State led model like other states (e.g. Odisha, Tamilnadu).

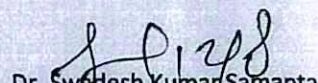

- (ii) BSNL/BBNL has not submitted any firm plan even after several persuasion through e-mail and phone call after 3rd Sub Committee meeting. However, GM BSNL verbally informed that entire BharatNet project is being re-examined to execute the project through over-head instead of underground. Since decision is pending, exact time-frame for completion of project cannot be ascertained as of now.
- (iii) Sub-Committee observed that even after 1027Km PLB, 930Km U/G OFC, and 45km O/H OFC has been laid for both Ph-I and Ph-II, internet services has been provided only in 3 numbers of GPUs. Considering this, Sub-Committee is of the opinion that BBNL/BSNL shall be asked not to take up OFC laying for connectivity to 59 GPU/BAC where OFC laying has not been started.
- (iv) Sub-Committee is of opinion that for future laying of OFC cable in GPU/BHQ preference may be given for overhead laying.
- (v) USOF/DoT may review in details (including sub-committee report and recommendation) and take decision on short closure of the execution of BharatNet by BSNL as deemed appropriate.
- (vi) Very large quantity of PLB/OFC has been laid as reported by BBNL/BSNL but till date only 3 GPUs are operational on OFC, either due to damage of Bharatnet OFC or due to non-availability of backhaul OFC connectivity of BSNL. There is an urgency to review the connectivity plan from actual utilisation perspective in detail, and revise the scope of BharatNet for Sikkim in totality from State Capital to GPs (in line with other NE states) so that laying of OFC by individual TSPs and consequent economic loss is minimized.
- (vii) After persuasions with BSNL Corporate Office, many officers have been posted in BSNL Sikkim. However, no details have been shared by BSNL manpower allocation made for BharatNet Project completion, operation and utilization.
- (viii) Additional CAPEX required (for the damaged routes) to be estimated jointly by BSNL and BBNL for further allotment of fund by USOF/DoT with detailed reasons and justification.
- (ix) BSNL/BBNL should submit details of BharatNet OFC/BW used for providing services (including Broadband, Wi-fi etc.) on monthly basis.
- (x) Installation of mobile tower in GPUs: RJIO was given space in 134 GPU locations by Govt. of Sikkim (vide letter No. 246/DIT/2022 dated 13.04.2022) for installation of mobile towers; progress of RJIO is not satisfactory. RJIL has informed that out of 134 GPU locations at present 4G coverage is available in 123 GPUs from the additional 62 towers commissioned by RJIL in the recent time. RJIL is in the process of installing new towers in 7 locations. RJIL already installed

Shri N. Murali Krishna
DDG Sikkim, WBLSA, DoT
Chairman

Shri Yogendra Sharma
Secretary IT, Govt. of Sikkim
Member

Dr. Swadesh Kumar Samanta
Advisor, TRAI, RO Kolkata
Member

a BTS in 1 Site. RJIL has no plan for installation of towers in 3 locations as it is not commercially viable.

Sub-Committee recommends that there is a need for permanent telecom infrastructure at GPU level and hence this list of GPUs 134-8=126 shall be shared with the other TSPs for installation of mobile towers in line with the agreement between Govt. of Sikkim and RJIL. The committee further recommends that CAPEX for Building/Room/Tower is funded by USOF/DoT for setting up permanent infrastructure in these GPUs. List is available in Annexure-14

(xi) Additional recommendation based on 3rd Sub-committee meeting

a. **Rationalization of power charges:**

Commissioning of a large no of BTS sites by TSPs is getting delayed due to delay in provisioning of electricity connections by state govt/departments and also due to high charges compared to other states (even if compared with other hilly states). State Govt. shall put all out efforts for granting permissions and erecting electrical poles for providing electricity on priority for such sites. State Govt. shall also give priority for regular electricity supply (including those from other non-conventional energy sources e.g. Wind, solar, hydro, etc.) for all such site which are running only on DGs.

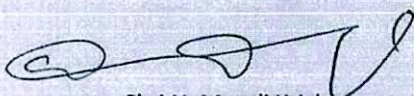

b. DoT/USOF may be requested for grant of CAPEX for setting up of such non-conventional energy resources.

4.6 Permanent Telecom infrastructure at individual BAC/GPU:

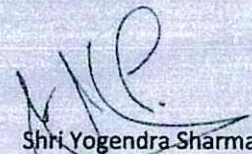

Most of the exchanges and BTSs of BSNL which were earlier installed in private premises are either closed or non-operational due to number of reasons. There is an urgent need to establish regular telecom infrastructure at each GPU/BAC. In this regard sub-committee has observed and recommend the following:

(i) Land has already been allotted by Govt. of Sikkim to BSNL in 2012 for establishing telecom infrastructure in BHQ; BSNL is yet to utilize these spaces. RJIO was given space in 134 GPU locations by Govt. of Sikkim (vide letter No 246/DIT/2022 dated 13.04.2022) for installation of mobile towers; progress of RJIO is not satisfactory. It has been submitted by RJIO, that RJIO has installed 62 additional towers during the period of review of the Sub-Committee and most of the above 134 GPU locations are having coverage from such sites. *Sub-Committee is of the opinion that there is a need for permanent telecom infrastructure at GPU level. It is appropriate that CAPEX for Building/Room/Tower is funded by USOF/DoT, and BSNL is given the job for installation of the permanent infrastructure so that all TSPs can utilize the tower, OFC connectivity, etc.*

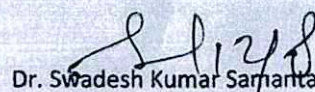

(ii) A time frame may be decided for completion of the infrastructure, and if BSNL fails to complete the project then it can be awarded to PGCIL as PGCIL is in the process of **establishing OFC connectivity to Block level using Power line of Govt. of Sikkim.**

Shri N. Murali Krishna
DDG Sikkim, WBLSA, DoT
Chairman

Shri Yogendra Sharma
Secretary IT, Govt. of Sikkim
Member

Dr. Swadesh Kumar Samanta
Advisor, TRAI, RO Kolkata
Member

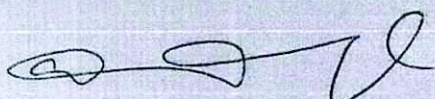

4.7 Efficient Utilisation of existing OFC/Bandwidth of PGCIL:

PGCIL has already established OFC/Bandwidth connectivity to 16 out of 31 blocks and are now ready to provide up to 10 Gbps bandwidth to each TSP. TSPs are not very much keen to use PGCIL bandwidth as they are finding that the bandwidth charges of PGCIL is very high, and it will not be commercially viable for connectivity to mobile towers. ***In this regard sub-committee recommends that:***

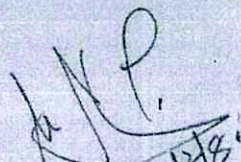

- (i) A reference/base tariff shall be fixed by Govt. of Sikkim and PGCIL for using PGCIL bandwidth up to block level, as Govt. of Sikkim is the owner of the OFC used by PGCIL for providing bandwidth at Block level
- (ii) BharatNet OFC of total 977Km (930Km U/G and 45Km O/H OFC) has been laid in phase 1 and phase 2 for total 152 GPUs & BHQs out of planned 207 GPUs & BHQs. OFC laying work not started in 59 GPUs & BHQs. However, utilization of BharatNet will be limited to only up to GPUs and BHQ. The scope of utilization can be further enhanced if BharatNet OFC can be extended up to village/BTS level. ***Sub-Committee is of the opinion that Bharat Net OFC connectivity to GPU/BHQ wherever laying has already been completed shall be extended to individual BTS sites.*** For this BSNL has to work out the plan for GPUs which are being lit up, identify the number of nearby villages and BTSS, and estimate the OFC Km to be laid for the same. Further lit up GPU list shall also be shared periodically (e.g. monthly) with other TSP's for utilization to reach up to village level and fiberisation of tower /BTS. **This will help in achieving various targets of NBM including fiberisation of towers.**
- (iii) In view of TSPs non-submission of requirement of Bandwidth at Block level to PGCIL in spite of repeated reminders by Sub-Committee, following are the opinion of the Sub-Committee:
 - a. TSPs shall be advised to utilize BharatNet OFC for BTS fiberisation.
 - b. TSPs shall also be advised to utilize the OFCs already laid by PGCIL up to block level.
 - c. Govt. of Sikkim may accord permission to lay fresh OFC by TSPs after careful examination of already available OFC/Bandwidth laid through fund of Govt. of India or Govt. of Sikkim as the case may be.

4.8 Laying of Utility Duct by State Govt.:

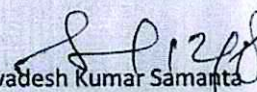

Sub-Committee recommends that Utility Duct for Telecom need to be made while repairing the roads/drains especially in cities/towns (e.g. Gangtok). Expenditure on such ducts need to be funded by USOF/DoT based on proposal by state Govt. State Govt. authority shall charge the cost of maintenance of such ducts from the TSPs for using such ducts.

(Reference para 2 of D.O. No. M-5/9/(4)/2021-QoS dated 07th October 2022)**Telecom infrastructure and connectivity in Sikkim - Issues identified****1. BharatNet related issues:**

A. The status of BharatNet project implementation as of Dec 2021 is

S.No	Phase	Total GPs Including BHQ (Nos)	Service Ready GPs & Pending GPs	OFC to be laid	Laid & Balance OFC (KMs)	Target / Expected time line
		Nos	Nos	KM	Kms	
1	Phase-1 (by- BSNL)	9 BHq+ 51 GPs 60	26 SR (incl 3 vsat) Pending 34	697 (460 U/G+ 254 O/H)	Laid - 347 Balance- 367 (113 U/G + 254 O/H)	Original Target - 17-18 Expected completion- FY 22-23, (BSNL yet to commit firm target)
2	Phase-2 (by- BSNL)	22 BHq+ 114 GPs 136	SR- 5 (vsat) Pending: 22 BHq+114 GPs	1068 (859 U/G+ 209 O/F)	Laid - 648 (583 U/G, 65 O/H) Balance - 420 (276U/G+ 144 O/H)	DPR approved in May21 with target of Nov-21 (work started in 18-19) Expected completion - FY 22-23, (BSNL yet to commit firm target)
3	Satellite (by- TCIL)	13 GPs	SR- 8 GPs Pending - 5 GPs	--	N/A	Was Expected by Dec21 end. Out of 13 sites- - 5 sites: Working satisfactory. - 2 sites: Not working satisfactory - 2 sites: Not working. - 1 site: Installation pending

B. BharatNet targets for OFC laying and making GPUs service ready are much behind target. The work progress in last two years is almost NIL.

C. 13 GPUs (i.e. 3 from Ph-I and 10 from Ph-II) are being connected using Satellite, as OFC connectivity in these GPUs is not feasible. Even after 15 months, satellite

connectivity is pending, despite the fact that Satellite connectivity can be rolled out very quickly.

D. In some cases internet Connectivity to GPUs still not started even after completion of OFC laying.

E. In 9 Blocks, space required to be allotted by Sikkim Govt. to BSNL for establishing connectivity to GPUs as no BSNL exchange is operational there.

2. Operational issues -

A. Damage to existing network by State Government agencies:

i. During road widening/drain repair works underground copper/OFC cables in Gangtok/Namchi City got damaged and as a result, the landline and broadband services provided to Govt. Offices and important organisations are getting interrupted frequently. BSNL does not have sufficient resources (including manpower, funds and materials) to lay cable afresh or restore the underground OFC networks especially in Gangtok and Namchi Cities.

ii. Around 60km underground OFC of BharatNet got damaged in Namchi and Jorethang during construction of Smart City works

B. Damage to BharatNet OFC of Phase-I:

i. Even though OFC laying were completed in 22 out of 52 GPUs & 9 BHQs in 9 Blocks of BharatNet under Ph-I, OFC of most of these GPUs & BHQs are now damaged in many places, and as a result not a single GPU is operational.

C. Outsourced maintenance of BharatNet Project not proper:

i. 5 GPUs out of 22 GPUs, where BharatNet Ph-I work of OFC was completed, but they are not operational due to OFC damages, have been handed over to CSC-SPV in Sikkim for restoration of OFC but CSC-SPV is taking time in restoring the connectivity.

D. Delay in Permissions by State Government:

i. TSPs are facing major delays in getting following permissions from State Government:

(a) Delay in permission for OFC laying by Forest Department/ Defence Organisations

(b) Delay in getting NoC for establishing new sites

(c) Delay in connection of electricity for the new sites

(d) Restriction in the movement of skilled manpower from Siliguri/Kolkata to Gangtok and other places.

E. Right of Way (RoW) permissions on several routes are pending due to ongoing road widening works.

F. Towers installed in residential areas - The towers installed in residential areas without proper permission are being considered.

3. Connectivity of Sikkim State to rest of country:

A. No redundancy - All TSPs are using the backhaul connectivity from PGCIL, Gangtok will be isolated if any failure in PGCIL networks happen even for an hour.

B. Adequacy of backhaul capacity-Backhaul connectivity from Sikkim to Siliguri need to be upgraded by BSNL as traffic has reached to the deployed capacity.

4. Other issues

- A. The tariff charged by PGCIL for their OFC Bandwidth is very high. TSPs are depending on PGCIL network in absence of proper underground OFC network.
- B. The charges for electricity are higher in comparison to other states.
- C. Night DG restriction impact the services during prolonged power cut.
- D. The launch of FTTH project of one of TSP has been delayed due to Non availability of aerial permissions in Gangtok city area.

(Reference para 2 of D.O. No. M-5/9/(4)/2021-QoS dated 07th October 2022)

Action by State Government of Sikkim

- (i) Road widening and Smart City related works have disrupted telecom networks considerably because of which the State Government offices are facing connectivity issues. In all future State Government works, prior coordination with TSPs may be done (through prior notice) and liability of Contractor for making payments for damages to telecom networks may be in-built in the contracts.
- (ii) State Government may make efforts to recover damages from the contractor for damage done to around 60km underground OFC of BharatNet during smart city works in Namchi and Jorethang. BSNL has submitted the requirement of Rs. 2.23 crore for restoration of BharatNet OFC routes and BSNL copper cable which were damaged during smart city work at Namchi and Gangtok.
- (iii) It has been informed that RoW permissions in Sikkim are being given through online portal which has now been linked to GatiShakti Sanchar Portal of DoT. However, to tackle delays faced by TSPs in getting permission for OFC laying by Forest Department/ Defence Organizations, getting NoC for establishing new sites, connection of electricity for the new sites, Sikkim Government may ensure that all permissions including those for electricity connections are also given through this portal and are monitored regularly for delays, if any.
- (iv) The RoW Rules 2016 of DoT do not put any embargo in installing towers in any area, including residential. However, the required RoW permissions have to be taken in accordance with policy outlined in these rules. As a special one-time dispensation, State Government may consider regularizing towers installed in the residential premise.
- (v) Given the importance of connectivity in Government service delivery, commerce, education, health and other sectors, the State Government may consider providing electricity to Telecom sites on priority (within 15 days of connections request) at Utility/Industrial tariff. Currently the charges raised for providing electricity to telecom sites are very high and dissuade installation of new sites. The State Government should also consider waiving off last mile installation charges for extending electric connection to telecom sites as this will facilitate early roll out of Telecom services in these areas and help bridging the digital divide.
- (vi) The Authority is of the opinion that if all GPUs are covered and lit, most of the schools, government institutions and homestays should be able to get connectivity. While the connectivity to GPUs and villages are being planned by Central Government through USOF funding, the connectivity to schools, Police stations and Government offices is to be procured by the State Government. The State Government should raise

their demand for such connectivity to TSPs and seek demand note from them for providing the connectivity through whichever media (like OFC, fixed wireless, Satellite or copper cable) they can. For such institutions where the connectivity is not being provided by any TSP, the list can be provided to DoT.

(vii) TSPs are facing problems in running the sites during prolonged power cuts due to restriction in running DGs at night. This has impacted the services adversely. Provision of 24x7 electricity for running essential services is the responsibility of the State Government. Running DGs have their own operational challenges like higher cost of power, logistics of diesel supply to every site, pilferage of diesel, environmental effect etc. TSPs would prefer not to run DGs if continuous power supply is made available to the sites. The Authority would like to request the State Government to immediately review this policy and issue necessary instructions to local government bodies as well.

(viii) One of the TSPs has informed that its launch of FTTH project is delayed due to non-availability of aerial permissions in Gangtok city area. Providing connectivity through Aerial Fiber is a cost effective and faster way of rolling out services and globally several national jurisdictions are facilitating overhead aerial fiber deployment including many States in India. DoT has already amended its RoW rules recently to facilitate laying of overhead optical fiber cables on posts, street light poles etc. State Government of Sikkim may facilitate the same by aligning its policies to National RoW rules as done by several States in India. Going forward, 5G network deployments already would require lot of small cell deployments on street furniture and these small cells may require aerial fibre connectivity. Delay in giving permissions for aerial fibre and small cell deployment on street furniture like electricity poles, bus stops, billboards etc will adversely affect the 5G network rollouts in Sikkim.

(ix) In case of road widening project, provisions for either incorporating ducts for telecom fibres should be made or mechanism need to be developed where the OFC laying work can run in parallel to road widening work. If works are carried out serially without collaborations, it will introduce delays in the roll out of networks and add to costs.

(x) The Sikkim state government may also explore the possibility of constructing utility ducts in all future road widening and new road construction projects. This will help in quick rollout of all utility infrastructure in the state.

List of 6136 Villages yet to be covered with any Mobile Technology by any TSP in NE States

Refer paragraph 4.32 of Chapter 4

List of 119 Blocks with no OFC from any TSP or any PSU in NE States				
SI No	State	District	Block having no OFC	Remarks
1	Arunachal Pradesh	Anjaw	Manchal	None of the 4 Blocks of Anjaw has OFC connectivity
2			Hawai-Walong	
3			Hayuliang-Goiliang	
4			Chaglagam	
5		Itanagar Capital Complex	Borum	
6		Changlang	Vijaynagar	
7			Yatdam	
8			Nampong	
9			Manmao	
10		Dibang Valley	Mipi-Anini-Alinye	None of the 3 Blocks of Dibang Valley has OFC connectivity
11			Etalin-Malinye	
12			Anelih-Arzoo	
13		East Kameng	Khenewa	4 out of 6 Blocks of East Kameng has no OFC connectivity
14			Lada	
15			Chayang Tajo	
16			Bameng	
17		Kra Daadi	Pania	
18		Kurung Kumey	Damin	6 out of 7 Blocks of Kurung Kamey has no OFC connectivity
19			Sangram	
20			Sarli	
21			Parsi-Parlo	
22			Koloriang	
23			Nyapin	
24		Lepa Rada	Tirbin	
25		Lower Dibang Valley	Hunli-Desali	
26		Lower Siang	Ramle Bango	
27			Gensi	
28		Pakke Kessang	Seijosa	
29		Papum Pare	Balijan	
30			Mengio	
31		SHI YOMI	Menchukha & Tato	
32			Monigong & Pidi	
33		Siang	Lumla	
34			Mukto	
35		Tirap	Lazu	
36			Dadam	
37			Borduria	
38		Upper Siang	Tuting	
39			Jengging	
40			Giba	

SI No	State	District	Block having no OFC	Remarks
41		Upper Subansiri	Nacho	4 out of 8 Blocks of Upper Subansiri has no OFC connectivity
42			Siyum	
43			Taliha	
44		West Kameng	Nafra	
45			Thrizino	
46		West Siang	Liromoba	
47	Assam	Baska	Baska	
48		Barpeta	Mandia	
49		Charaideo	Mahmora	
50		Darrang	Kalaigaon (Part)	
51		Dhubri	South Salmara	
52		Dima Hasao	New Sangbar	
53		Goalghat	Sitalpathar	
54		Kokrajhar	Dotma	
55		Majuli	Ujoni Majuli (Jengraimukh)	
56		Shivsagar	Demow	
57		Udalguri	Kalaigaon	
58	Manipur	Chandel	Khengjoy	
59		Senapati	Mao Maram	5 out of 6 Blocks of Senapati has no OFC connectivity
60			Chillivai Phaibung	
61			Song Song	
62			Paomata	
63			Willong	
64		Tamenglong	Tamei	3 out of 5 Blocks of Tamenglong has no OFC connectivity
65			Nungba	
66			Khoupum	
67		Thoubal	Wangjing Tentha
