Sub: Regarding non-compliance of DoT’s instructions by Basic Service Providers.  

Vide letter under reference above, DoT had allocated the short code 1072 for Train Accident Enquiry. This is an unrestricted category I service and is supposed to be available on STD/ISD network of all telecom service providers. This number is also to be treated as toll free in SDCA. 1072 is a very important number and is used to disseminate information to public when an accident occurs.

Almost all the Railways have represented to this Ministry that this short code is not available on any of the telecom service provider other than BSNL. Further, even on BSNL network, it is not available at many of the places through STD.

This Ministry has issued instruction to all its zonal Railways to enhance their efforts to co-ordinate with all the local service provider to have the number 1072 opened in their network. Despite continuous liaisoning and chasing with local service providers zonal Railways have failed to achieve this in the past several gears when the 1072 service was commissioned. It is therefore, strongly fell that, provide push for opening the 1072 by service provider, intervention of DoT needed.

It is therefore, requested that DoT reiterate its instructions to all the service providers to open 1072 in their network in co-ordination with the zonal Railways.
