Review of iuc

Sir

We as the citizen of this country find charges discriminatory and unjust and hope that the same are scrapped and not renewed. as we have been paying iuc charges for very long time and now appears no pressing reason for its continuation.

The continuation of iuc regime is regulatory safeguard for not adopting new technology and allowing telcos to profiteer out of this. All technologies should be allowed to operate with competitive benchmarks set for all of them. If technology is available which has zero cost of carrying voice traffic then all other technology should be brought to same platform and reduce the burden on customer.

The reasons put forward in the consultation paper of TRAI dated 18th september on this subject do not have much merit. Hence the iuc should be withdrawn w/e

designated date.
