Dear Sirs,

We wish to bring your kind attention that we are depending on the cable network services namely Multitech Electronics and Cable Network located in Kerala State, Thrissur District and Kaipamangalam, Kalamuri area.

15 members of staff and technicians are working in this organization, whom are entirely depending on their homely requirements such all of the cable networkers working in all over in Indian Constitution. These circumstances the new rules and regulations applied by respected firm of TRAI is spoiling the life of cable operators in India.

Previously, we have served average 150 channels for an amount of Rs. 200/- per month but now as per TRAI rules the customers need to be provided minimum Rs. 245/- per month to observe 114 channel, which is a burden of them. Also, 45% of Network Capacity Fee for each LCO's is not enough to continue the existence of cable operators life because all of them as mentioned above are depending on the income of network institutions so we humbly requested to increase the LCO charge.

Link Charge, Electricity Bill, Building Rent, Equipments and Employees Salary etc, etc..... all of them are need to be fulfilled by the basic income of the cable network organizations so we are requested to increase NCF charge as 100% unless otherwise the life of cable network dependers would be collapsed. As you are aware some of the cable operators committed suicide side due to lack of enough income received in the cable operating works.

Further more, we noticed the TRAI questionnaire number 30 for which our response indicated below:-

Stakeholders may also provide their comments on any other issue relevant to the present consultation

--
for and on behalf of **Multitech Electronics and Cable Network**
