

Dear Sir,

This is in regarding unwanted calls & SMS on mobile

My suggestions are as under

**1.** Instead of making list of "do not call subscriber" I suggest to make list of "You can call us" subscriber.

as most of the subscriber do not want such calls but they do not know where to register or they do not register themselves due to short of time. Rather who are interested in getting such call will find the ways & means to get register themselves.

**2.** The co's authority / person who dials phone to non register list should be penalized by heavy penalty for first time & imprisonment plus penalty from next time onwards.

**3.** TRAI should suspend the licence of the co. who dials phone to non register person.

Thanking you

Prakash Shah
