**Re: Responses to TRAI on Consultation Paper dated 22nd December 2011 on
“Issues related to Implementation of Digital Addressable Cable TV Systems.”**

Dear Sir,

We are the members of a RWA in VasantKunj, we have come to know that Cable TV will be Digital by June 12. We have few questions to ask from your good self, sending our points for your consultation.

1. We are already having a STB which was given to us by our Cable Operator few years back saying, CAS has come.
2. Now, He is saying DAS is coming.Do we have to buy new STBs for all TV sets in home.
3. Can we use our old STB
4. Do we have to buy new STB for all TV sets in home.
5. Are there STB will be interoperable.
6. What will be consumption of electricity?
7. How much charges new have to pay now for all the channels.
8. Do, the monthly charges will go up?
9. Some of our members stay in Janta Quarter will they be able to afford Digital TV.
10. How many remotes will be there to handle?
11. Who will give service of Faulty STB and how many days will it take?
12. Can we exchange our STB, if yes then how much price?
13. First it was CAS, Now DAS, what new is there in this Technology?
14. Do consumer have to keep buying STBs?
15. Can it be one STB for all new technology like we can change the SIM card in mobile phone?

With Regards
Mr V Sharma and Mr YD Methpal
